0. INTRODUCTION

This specification provides the definition of the Social security data request message (SSDREQ) to be used in Electronic Data Interchange (EDI) between trading partners involved in administration, commerce and transport.

1. SCOPE

1.1 Functional Definition

A message to request transmission of information needed to complete social security activities. The information relate to persons, family, health conditions, benefits, incomes, claims, etc..

1.2 Field of Application

1.3 Principles

This message enables the transmission of information relating to a person, members of his family or related persons. For each person it enables the transmission of:

- person's identification information,
- person's related data,
- registration information,

- insurance and insurance benefit related information,
- periods of insurance, registration, employment, etc.

2. REFERENCES

See UNTDID, Part 4, Chapter 2.6 UN/ECE UNSM - General Introduction, Section 1.

3. TERMS AND DEFINITIONS

See UNTDID, Part 4, Chapter 2.6 UN/ECE UNSM - General Introduction, Section 2.

4. MESSAGE DEFINITION

4.1 Data Segment Clarification

This section should be read in conjunction with the Branching Diagram and the Segment Table which indicate mandatory, conditional and repeating requirements.

0010 UNH, Message header

A service segment starting and uniquely identifying a message.

The message type code for the Social security data request message is SSDREQ.

Note: Social security data request messages conforming to this

document must contain the following data in segment UNH, composite S009:

Data element	0065	SSDREQ
	0052	0
	0054	1
	0051	RT

0020 BGM, Beginning of message

A segment identifying the function of the message and, if necessary, the number of the message.

0030 DTM, Date/time/period

A segment indicating the date of preparation of the message.

0040 FTX, Free text

A segment to provide textual information at message level.

0050 QTY, Quantity

A segment providing quantities at message level.

The intended usage of this segment is among others to:

- indicate the number of receivers of the message,
- indicate the number of answers expected to build the message,
- indicate the number of answers taken into account in order to build the message.

0060 LAN, Language

A segment identifying the default language in which the textual information is provided in the message. When required

another  
place language may be stated for textual information at a given  
in the message.

0070 Segment group 1: RFF-GIR  
A segment group providing references and related  
identification numbers at message level.  
The intended usage of this segment group is among others to:  
- specify the regulation under which the message is sent,  
- specify the related regulations' article numbers.

0071 RFF, Reference  
A segment providing message related references.

0072 GIR, Related identification numbers  
A segment providing additional identification numbers  
related to the reference.  
The intended usage of this segment is among others to:  
- identify the corresponding regulation's article  
numbers.

0075 GIS, General indicator  
A segment providing indicators related to the complete  
message.  
The intended usage of this segment is among others to:  
- indicate if a period of insurance of less than one year  
entitle for a pension.

0076 CUX, Currencies  
A segment providing currency details at message level.

0080 Segment group 2: NAD-STIS-BUS-RFF-COM-CTA  
A group of segments identifying parties at message level.  
The intended usage of this segment group is among others to:  
- identify the sender of the message,  
- identify the receiver(s) of the message,  
- identify the original sender of the message when the  
message  
has been forwarded,  
- identify the final receiver of the message when the  
message  
is to be forwarded.

0090 NAD, Name and address  
A segment identifying a party at message level and  
providing  
its address.

0100 STS, Status  
A segment specifying the status of the party in the  
context  
of the message.  
The intended usage of this segment is among others to:  
- indicate if an institution is a competent institution,  
a  
designated body, etc.  
- indicate if its is an institution of the state of  
residence, of the state of stay, etc.

- 0110 BUS, Business function  
A segment to identify the business function of the party.  
The intended usage of this segment is among others to:  
- indicate the social security sector to which the institution belongs.
- 0115 RFF, Reference  
A segment to provide references related to the described party.  
The intended usage of this segment is among others to:  
- specify the identification number of the insured person for at least the investigating institution and the competent institution.
- 0116 COM, Communication contact  
A segment to provide communication numbers related to the described party.
- 0117 CTA, Contact information  
A segment providing contact details related to the party.  
The intended usage of this segment is among others to:  
- identify the responsible clerk within the given institution.
- 0120 Segment group 3: DMD-DTM-FTX-RFF-LAN-SG4  
A group of segments identifying documents or messages related to the current message.  
The intended usage of this segment group is among others to:  
- identify the document or message the current message is responding to,  
- identify a previously sent document or message,  
- identify a document or message associated to the current message,  
- identify the paper form to which the current message corresponds.
- 0130 DMD, Document/message details  
A segment identifying a document or message.
- 0140 DTM, Date/time/period  
A segment specifying date(s) related to the document or message.
- 0150 FTX, Free text  
A segment providing additional information about the document or message.
- 0160 RFF, Reference  
A segment giving additional reference numbers of the document or message.  
The intended usage of this segment is among others to:  
- to provide the identification number of a document or message allocated in relation with another document or message.
- 0170 LAN, Language  
A segment specifying the language in which the textual information is provided in the document or message.
- 0180 Segment group 4: NAD-STS-BUS

or A group of segment identifying the issuer of the message  
document.

0190 NAD, Name and address  
A segment identifying the issuer of the document or  
message and providing his address.

0200 STS, Status  
A segment providing the status of the issuer.  
The intended usage of this segment is among others to:  
- indicate if the issuer is a competent institution, a  
designated body, etc.  
- indicate if the issuer is from the state of stay,  
from the state of residence, etc.

0210 BUS, Business function  
A segment to identify the business function of the  
party.  
The intended usage of this segment is among others to:  
- specify the social security sector to which an  
institution belongs.

0220 Segment group 5:  
REL-PNA-PDI-DTM-NAT-ATT-SG6-LOC-GIR-FTX-QTY-

GIS-STG-DMD-SG7-SG8-SG9-SG11-SG15-SG16-SG22-  
SG23-SG24-SG26-SG27  
A group of segments providing details about a person, the  
members of his family or other persons associated.  
The intended usage of this segment group is among others to:  
- provide details about the insured person,  
- provide details about the concerned person,  
- provide details about family members,  
- identify the legal representative of the person,  
- identify any rightfull claimant,  
- identify the person(s) who is receiving benefits.

0230 REL, Relationship  
A segment identifying the relationship between the  
information provided in the occurrences of the group.  
The intended usage of this segment is among others to:  
- to identify the relationship qualifier as level of  
concern (person concerned, insured person), family (family  
members),  
legal representation (legal representative),  
- to identify the relationship as child, spouse,  
ex-spouse,  
etc., when required.

0240 PNA, Party name  
A segment identifying the person concerned by the  
message.  
The intended usage of this segment is among others to:  
- identify the person concerned by the message,  
- provide his different names.

0250 PDI, Person demographic information  
A segment providing person's related demographic  
information.  
The intended usage of this segment is among others to:  
- provide the sex of the person,

- provide the family status of the person.

- 0260 DTM, Date/time/period  
A segment specifying dates related to the person.  
The intended usage of this segment is among others to:  
- specify the date of birth,  
- specify the date of naturalization,  
- specify the date of family status,  
- specify the date of death,  
- specify the date of last heard.
- 0270 NAT, Nationality  
A segment specifying the nationality of the person.
- 0280 ATT, Attribute  
A segment providing person's related attributes.  
The intended usage of this segment is among others to:  
(employed, self-employed, pensioner, etc.).  
- specify the social security skill of the person
- 0290 Segment group 6: ADR-DTM  
A group of segment providing the addresses of the person  
and  
the related dates.
- 0300 ADR, Address  
A segment providing an address of the person.
- 0310 DTM, Date/time/period  
A segment specifying the dates or periods related to  
the  
address.
- 0320 LOC, Place/location identification  
A segment specifying places related to the person.  
The intended usage of this segment is among others to:  
- specify the place of birth,  
- specify the place of death.
- 0330 GIR, Related identification numbers  
A segment providing reference numbers related to the  
person.  
The intended usage of this segment is among others to:  
- provide national identification numbers,  
- provide fiscal numbers.
- 0340 FTX, Free text  
A segment providing additional information on the person.  
The intended usage of this segment is among others to:  
- provide the unememployment reason,  
- provide the reason for termination of employment,  
- provide the employment reason.
- 0350 QTY, Quantity  
A segment providing quantities related to the person.  
The intended usage of this segment is among others to:  
- provide the age of the person.

- 0360 GIS, General indicator  
A segment providing general indicators relating to the person.  
The intended usage of this segment is among others to:  
- specify the type of separation if the person is separated.  
- specify the level of education of the person,  
- indicate if the person is living with the person concerned,  
- indicate if the person is raising a child,  
- indicate if the person was receiving a pension at date of marriage,  
- indicate if the death was caused by a third party,  
- indicate if the person has child in common with spouse.
- 0370 STS, Status  
A segment specifying person's related statuses.  
The intended usage of this segment is among others to:  
- specify the living status of a person (dead, missing, etc.).
- 0380 DMD, Document/message details  
A segment specifying the type and number of an identity document belonging to the person.
- 0390 Segment group 7: NAD-STS-BUS-RFF-DTM-FTX  
A group of segment identifying relevant social security institutions.  
The intended usage of this segment group is among others to:  
- identify any registration institution and provide registration numbers,  
- identify the institution responsible for granting benefits,  
- identify the competent institution.
- 0400 NAD, Name and address  
A segment identifying a registration institution and providing its address.
- 0410 STS, Status  
A segment specifying the status of an institution in the social security context.  
The intended usage of this segment is among others to:  
- specify if the institution is a competent institution,  
a designated body, etc.  
- specify if the institution is in the state of residence, state of stay, etc.
- 0420 BUS, Business function  
A segment identifying the business function of the related institution.  
The intended usage of this segment is among others to:  
- specify the social security sector to which the institution belongs.
- 0430 RFF, Reference  
A segment providing registration numbers of the person within the institution.  
The intended usage of this segment is among others to:

- provide the registration number of the person,
- provide any file number related to the person,
- provide any inventory number related to the person.

0440 DTM, Date/time/period  
A segment providing dates related to the registration of the person.

0450 FTX, Free text  
A segment providing any additional information related to the registration of the person.

0460 Segment group 8: SAL-MOA-PAT-DTM-QTY  
A group of segments providing details about the incomes of the person.  
The intended usage of this segment is among others to:  
- describe the incomes of the person,  
- describe the salary of the person,  
- identify any additional wages.

0470 SAL, Remuneration type identification  
A segment identifying a type of remuneration or income.

0480 MOA, Monetary amount  
A segment providing income related amounts.

0490 PAT, Payment terms basis  
A segment providing payment related information.

0500 DTM, Date/time/period  
A segment providing payment related dates.

0501 QTY, Quantity  
A segment providing salary related quantities.  
The intended usage of this segment is among others to:  
- specify the number of meals per day when the remuneration is provided in the form of meals.

0510 Segment group 9: EMP-GIS-FTX-DTM-NAD-LOC-ADR-QTY-SG10  
A group of segments providing employment related information.  
It may be the current or last employment(s).

0520 EMP, Employment details  
A segment specifying the employment or occupation of the person.

0530 GIS, General indicator  
A segment specifying employment related indicators.  
The intended usage of this segment is among others to:  
- specify if the employment is a mining activity,  
- specify if the employment is of diplomatic type,  
- specify if the employment has been posted,  
- specify if a contract exists.

- 0540 FTX, Free text  
A segment providing additional information about the employment or activity.  
The intended usage of this segment is among others to:  
- the reason why the employment is persued.
- 0550 DTM, Date/time/period  
A segment specifying employment or activity related dates.
- 0560 NAD, Name and address  
A segment identifying the employer and providing his address.
- 0561 LOC, Place/location identification  
A segment to provide employment related locations.  
The intended usage of this segment is among others to:  
- indicate the country in which the employment or activity is located.
- 0562 ADR, Address  
A segment to provide employment related addresses.  
The intended usage of this segment is among others to:  
- specify the address of activity of a self-employed person.
- 0563 QTY, Quantity  
A segment providing employment related quantities.  
The intended usage of this segment is among others to:  
- specify the number of hours worked.
- 0570 Segment group 10: SAL-MOA-PAT-DTM-QTY  
A group of segments specifying incomes related to the employment or activity.
- 0580 SAL, Remuneration type identification  
A segment identifying a type of remuneration.
- 0590 MOA, Monetary amount  
A segment providing remuneration related amounts.
- 0600 PAT, Payment terms basis  
A segment providing payment related information.
- 0610 DTM, Date/time/period  
A segment specifying salary or remuneration related dates.
- 0611 QTY, Quantity  
A segment providing salary related quantities.  
The intended usage of this segment is among others  
to:  
- specify the number of meals per day when the remuneration is provided in the form of meals.
- 0620 Segment group 11:  
EDC-DTM-QTY-GIS-LOC-MOA-FTX-SG12-SG13-SG14  
A group of segments providing education or apprenticeship

details concerning the person.

- 0630           EDC, Education  
A segment identifying a type of education or apprenticeship.  
The intended usage of this segment is among others to:  
- to identify a type of education followed,  
- to identify an apprenticeship,  
- to identify special types of education.
- 0640           DTM, Date/time/period  
A segment specifying education or apprenticeship  
related  
dates.  
The intended usage of this segment is among others to:  
- provide the start and end dates of education,  
- specify holidays periods,  
- specify thesis related dates.
- 0650           QTY, Quantity  
A segment specifying quantities related to the  
education.  
The intended usage of this segment is among others to:  
- specify the number of half-days of education or training per week,  
- specify the number of hours per week,  
- specify the number of homework hours,  
- specify the number of days of absence.
- 0660           GIS, General indicator  
A segment providing education or apprenticeship  
related  
indicators.  
The intended usage of this segment is among others to:  
- indicate if a contract exists,  
- indicate if the program is recognised by state,  
- indicate if lessons are provided before 7 PM,  
- indicate if the education includes a thesis.
- 0670           LOC, Place/location identification  
A segment specifying the location of the education or apprenticeship.
- 0680           MOA, Monetary amount  
A segment providing amounts related to the education  
or  
apprenticeship.  
The intended usage of this segment is among others to:  
- provide the college fee
- 0690           FTX, Free text  
A segment providing additional information concerning  
the  
education or apprenticeship.  
The intended usage of this segment is among others to:  
- provide the reason of absence.
- 0700           Segment group 12: SAL-MOA-PAT-DTM-QTY  
A group of segments providing details about the  
salaries  
or incomes received during the education or

apprenticeship.

0710                  SAL, Remuneration type identification  
                  A segment specifying a type of remuneration.

0720                  MOA, Monetary amount  
                  A segment providing remuneration related amounts.

0730                  PAT, Payment terms basis  
                  A segment providing payment information about the  
                  remuneration.

0740                  DTM, Date/time/period  
remuneration          A segment providing dates related to the  
                  and payment.

0741                  QTY, Quantity  
                  A segment providing salary related quantities.  
                  The intended usage of this segment is among others  
to:  
                  - specify the number of meals per day when the  
                  remuneration is provided in the form of meals.

0750                  Segment group 13: LES-QTY  
                  A group of segments providing details about lessons  
                  followed during the education or apprenticeship.

0760                  LES, Lesson  
                  A segment identifying a lesson or course.

0770                  QTY, Quantity  
                  A segment specifying lesson related quantities.  
                  The intended usage of this segment is among others  
to:  
                  - provide the number of lessons per week,  
                  - provide the number of lessons per month,  
                  - provide the number of hours per week.

0780                  Segment group 14: NAD-STS-BUS-GIS  
university          A group of segments identifying the school or  
                  also                  where the education or apprenticeship occurs. It may  
                  be used to identify the social security institution  
                  supervising the education.

0790                  NAD, Name and address  
                  A segment identifying an education institution and  
                  providing its address.

0800                  STS, Status  
                  A segment specifying the status of the institution.  
                  The intended usage of this segment is among others  
to:  
                  - indicate if the institution supervising the  
                  education is a competent institution, a designated  
                  body, etc.  
                  - indicated if the institution supervising the  
                  education is an institution of the state of  
residence,

- of the state of stay, etc.
- 0810 BUS, Business function  
A segment identifying the business function of the related party.  
The intended usage of this segment is among others to:  
- indicate the social security sector to which the supervising institution belongs.
- 0820 GIS, General indicator  
A segment providing indicators related to the education institution.  
The intended usage of this segment is among others to:  
- specify the type of school.
- 0821 Segment group 15: ICD-FTX-EMP-GIS  
A group of segment providing social security insurance cover of the person.
- 0822 ICD, Insurance cover description  
A segment providing insurance cover information.  
The intended usage of this segment is among others to:  
- identify the type of social security insurance of the person,  
- identify the social security insurance regime of the person,  
- identify the risks for which the person is covered.
- 0823 FTX, Free text  
A segment providing additional information about the social security insurance cover.  
The intended usage of this segment is among others to:  
- provide the insurance reason.
- 0824 EMP, Employment details  
A segment identifying the type of employment corresponding to the insurance cover.
- 0825 GIS, General indicator  
A segment providing indicators related to the insurance cover.  
The intended usage of this segment is among others to:  
- indicate if the insurance cover is corresponding to a mining activity.
- 0830 Segment group 16:  
ALC-DTM-SG17-RFF-MOA-GIS-QTY-FTX-LOC-SG18-SG19-SG20-SG21  
A group of segment providing details about social security benefits applied for or received by the person.
- 0840 ALC, Allowance or charge  
A segment identifying a social security benefit.

0850 DTM, Date/time/period  
security A segment providing dates related to the social  
benefit.  
The intended usage of this segment is among others to:  
- specify the start date of benefit,  
- specify the end date of benefit,  
- specify the duration of the benefit,  
- specify the limit date of benefit receipt,  
- specify the date for lumpsum calculation of benefit.

0860 Segment group 17: STS-DTM  
of A group of segments providing details about the status  
the of the benefit and the status of the person justifying  
benefit (cause).

0870 STS, Status  
to: A segment describing a status event.  
The intended usage of this segment is among others  
- specify the administrative status of the benefit:  
received, granted, applied for, ended, etc.  
- specify the status of the person justifying the  
benefit: sickness, maternity, etc.

0880 DTM, Date/time/period  
A segment providing dates related to the status.

0890 RFF, Reference  
benefit. A segment specifying references related to the  
The intended usage of this segment is among others to:  
- specify the pension number when the benefit is a  
pension.

0900 MOA, Monetary amount  
A segment providing benefit related amounts.  
The intended usage of this segment is among others to:  
- provide the benefit amount,  
- provide the amount of increase for dependants,  
- provide the amount before taxes,  
- provide the amount from basic scheme,  
- provide the amount from supplementary scheme,  
- indicate the amount of comparable earning,  
- provide the reimbursed amount,

0910 GIS, General indicator  
as A segment providing indicators related to the benefit.  
The intended usage of this segment is among others to:  
- indicate the weekdays of provision,  
- indicate the excluded weekdays,  
- indicate if the benefit is provided at the same rate  
for unemployment,  
- indicate if the rights have been waived,  
- indicate if the benefit has been deferred,  
- indicate if gainful employment is intended,  
- indicate if an increase is awarded,  
- indicate if a rule against overlapping is  
applicable,

- 30

  - indicate if reductions has been applied,
  - indicate if there are grounds for deductions,
  - indicate if the benefit is provided on the basis of days per month.
  
- 0920

QTY, Quantity

A segment providing quantities related to the benefit. The intended usage of this segment is among others to:

  - indicate the number of days of provision per month,
  - indicate the number of units when the benefit is provided on the basis of units.
  
- 0930

FTX, Free text

A segment providing additional information about the benefit. The intended usage of this segment is among others to:

  - provide the reason for deduction,
  - provide information about restrictions to hospitalisation,
  - provide details about the reason why the person has moved,
  - provide adjustment information.
  
- 0940

LOC, Place/location identification

A segment specifying benefit related locations. The intended usage of this segment is among others to:

  - specify the country of deferment when the benefit is deferred.
  
- 0950

Segment group 18: DMD-STG-DTM-GIS-LOC-ICD

A group of segments identifying documents related to the benefit. The intended usage of this segment group is among others to:

  - identify the claim(s) related to the benefit.
  
- 0960

DMD, Document/message details

A segment identifying a document or message. The intended usage of this segment is among others to:

  - identify a claim.
  
- 0970

STS, Status

A segment specifying the status of the document. The intended usage of this segment is among others to:

  - indicate the administrative status of the claim: submitted, etc.
  
- 0980

DTM, Date/time/period

A segment providing document related dates. The intended usage of this segment is among others to:

  - provide the date of submission of the claim.
  
- 0990

GIS, General indicator

A segment providing indicators related to the claim. The intended usage of this segment is among others

to: - indicate if other claim(s) has(have) been submitted.

1000 LOC, Place/location identification  
A segment specifying locations related to the document.  
The intended usage of this segment is among others

to: - specify the country of submission of the claim.

1010 ICD, Insurance cover description  
A segment providing details about insurance cover.  
The intended usage of this segment is among others

to: - identify the type of insurance the claim is corresponding to,  
- identify the insurance regime the claim is corresponding to,  
- identify the risk for which the claim is submitted.

1020 Segment group 19: AGR-FTX-GIS-ATT-DTM-QTY-PNA  
A group of segments providing details about decisions taken on benefit and entitlement to benefit.

1030 AGR, Agreement identification  
A segment identifying an agreement about the benefit.  
The intended usage of this segment is among others

to: - specify the administrative decision taken about the benefit.

1040 FTX, Free text  
A segment providing additional information about the agreement.  
The intended usage of this segment is among others

to: - provide further description of the decision,  
- provide the decision reason,  
- provide details about the information used as a basis for taking the decision,  
- provide decision limitation details,  
- provide reduction reasons.

1050 GIS, General indicator  
A segment providing indicators related to the agreement.  
The intended usage of this segment is among others

to: - indicate if the person is entitled to benefit,  
- indicate if there are rules against overlapping,  
- indicate if there are grounds for decision,  
- indicate if there are grounds for deduction,  
- indicate if an increase is awarded,  
- indicate if the rights are waived,  
- indicate if a reduction is applied.

1070 ATT, Attribute

to: A segment providing agreement related attributes.  
The intended usage of thsi segment is among others

- specify the level of importance of the benefit (normal, reduced, major).

1080 DTM, Date/time/period  
A segment providing dates related to the agreement.  
The intended usage of this segment is among others

to:

- provide the date of reason,
- specify the duration of the benefit,
- indicate the last possible date of registration.

1090 QTY, Quantity  
A segment providing quantities related to the agreement.  
The intended usage of this segment is among others

to:

- indicate the number of days of provision of the benefit,
- indicate the number of days per month during

which the benefit is provided.

1100 PNA, Party name  
A segment identifying the persons concerned by the agreement.  
The intended usage of this segment is among others

to:

- identify the persons who are also covered by the entitlement.

1110 Segment group 20: NAD-STS-BUS  
A group of segments providing details about the parties related to the agreement.  
The intended usage of this segment group is among others

to:

- identify the institution which is responsible for the payment of the benefit.

1120 NAD, Name and address  
A segment identifying a party or organisation.  
The intended usage of this segment is among others

to:

- identify the institution responsible from payment of the benefit and provide its address.

1130 STS, Status  
A segment specifying the stautus of the party.  
The intended usage of this segment is among others

to:

- indicate if the institution is a competent institution, a designated body, etc.
- indicate if the institution is from the state of stay, the state of residence, etc.

1140 BUS, Business function

A segment identifying the business function of the related party.  
The intended usage of this segment is among others to:

- indicate the social security sector to which the institution belongs.

1150 Segment group 21: PAT-MOA-DTM  
A group of segment providing payment related details.

1160 PAT, Payment terms basis  
A segment providing payment related details.

1170 MOA, Monetary amount  
A segment providing payment amounts.

1180 DTM, Date/time/period  
A segment providing payment related dates.

1190 Segment group 22: ASS-MOA-LOC-MEA-FTX-GIS  
A group of segments providing details about assets of the person.

1200 ASS, Asset  
A segment identifying a type of asset.

1210 MOA, Monetary amount  
A segment providing quantities related to the asset.  
The intended usage of this segment is among others to:

- provide the value of the asset,
- provide the value at the time of transfer,
- provide the amount from transfer,
- to provide the let out amount.

1220 LOC, Place/location identification  
A segment identifying locations related to the asset.  
The intended usage of this segment is among others to:

- identify the location of the asset,

1230 MEA, Measurements  
A segment providing measurements related to the asset.  
The intended usage of this segment is among others to:

- indicate the surface of farmed area.

1240 FTX, Free text  
A segment providing additional information about the asset.  
The intended usage of this segment is among others to:

- describe the type of legal connection the person has with the asset,
- describe the nature of the proceeds from transfer.

1250 GIS, General indicator  
A segment providing indicators related to the asset.  
The intended usage of this segment is among others to:

- indicate the type of ownership,
- indicate if the proceeds are passed by the person.

- 1260 Segment group 23: CIN-FTX-PCD-DTM-GIS  
A group of segments describing the disabilities declared  
by  
the person.
- 1270 CIN, Clinical information  
A segment identifying a type of disability.
- 1280 FTX, Free text  
A segment providing additional information about the  
disability.  
The intended usage of this segment is among others to:  
- further describe the disability,  
- describe the origin of the disability,  
- provide a prognosis.
- 1290 PCD, Percentage details  
A segment specifying percentages related to the  
disability.  
The intended usage of this segment is among others to:  
- provide the percentage of diminution of faculties,  
- provide the percentage of invalidity or incapacity.
- 1300 DTM, Date/time/period  
A segment providing dates related to the disability.  
The intended usage of this segment is among others to:  
- provide the date of diagnose,  
- provide the start date of incapacity,  
- indicate the probable duration of incapacity.
- 1310 GIS, General indicator  
A segment providing indicators related to the  
disability.  
The intended usage of this segment is among others to:  
- indicate if the disability results in an incapacity.
- 1320 Segment group 24: CLI-DTM-STS-FTX-GIS-NAD-SG25  
A group of segments providing details about a medical  
examination or hospitalisation.
- 1330 CLI, Clinical intervention  
A segment identifying a type of medical intervention.  
The intended usage of this segment is among others to:  
- identify a medical examination,  
- identify an hospitalisation.
- 1340 DTM, Date/time/period  
A segment providing dates related to the medical  
examination or hospitalisation.
- 1350 STS, Status  
A segment specifying the status of the medical  
examination or hospitalisation.  
The intended usage of this segment is among others to:  
- specify if the examination has been performed or is  
to  
be performed.  
- specify if additional examinations are needed.

- 1360 FTX, Free text  
A segment providing additional information about the medical intervention.  
The intended usage of this segment is among others to:  
- provide the reason of hospitalisation.
- 1370 GIS, General indicator  
A segment providing indicators related to the medical intervention.  
The intended usage of this segment is among others to:  
- indicate if the intervention acknowledging an incapacity.
- 1380 NAD, Name and address  
A segments identifying parties related to the medical intervention.  
The intended usage of this segment is among others to:  
- identify the doctor who performed the medical examination.  
- identify an hospital.
- 1390 Segment group 25: CIN-FTX-PCD-DTM-GIS-MEA  
A group of segments describing the disabilities identified during the medical examination.
- 1400 CIN, Clinical information  
A segment identifying a type of disability.
- 1410 FTX, Free text  
A segment providing additional information about the disability.  
The intended usage of this segment is among others to:  
- further describe the disability,  
- describe the origin of the disability,  
- provide a prognosis.
- 1420 PCD, Percentage details  
A segment providing percentages related to the disability.  
The intended usage of this segment is among others to:  
- provide the percentage of diminution of faculties,  
- provide the percentage of invalidity or incapacity.
- 1430 DTM, Date/time/period  
A segment providing dates related to the disability.  
The intended usage of this segment is among others to:  
- provide the date of diagnose,  
- provide the start date of incapacity,  
- indicate the probable duration of incapacity.
- 1440 GIS, General indicator  
A segment providing indicators related to the

disability.  
The intended usage of this segment is among others  
to:  
- indicate if the disability results in an  
incapacity.

1441 MEA, Measurements  
A segment providing medical information related  
quantities.  
The intended usage of this segment is among others  
to:  
- provide the weight and height of the patient.

1450 Segment group 26: FII-ADR  
A group of segment specifying bank related information  
for  
the person.

1460 FII, Financial institution information  
A segment identifying a bank account.

1470 ADR, Address  
A segment providing the address of the bank.

1530 Segment group 27:  
SEQ-DTM-FTX-ADR-SG28-SG29-SG30-SG31-SG35  
A group of segment providing details about social  
security  
periods.  
The intended usage of this segment group is among others  
to:  
- describe a period of insurance,  
- describe a period of employment,  
- describe a period of activity,  
- describe a period of unemployment,  
- describe a period of benefit,  
- describe a period used as a basis for calculation of  
benefit,  
- etc.

1540 SEQ, Sequence details  
A segment providing the sequential order of the  
periods  
for the person within the message.

1550 DTM, Date/time/period  
A segment providing the period dates and identifying  
the  
type of period concerned.  
The intended usage of this segment is among others to:  
- specify the start date of the period,  
- specify the end date of the period,  
- specify the duration of the period

1555 FTX, Free text  
A segment to provide additional information about the  
period.  
The intended usage of this segment is among others to:  
- indicate the type of period when the period is  
treated  
as insurance period.

1556           ADR, Address  
              A segment providing addresses related to the period  
              concerned.

1560           Segment group 28: NAD-STB-BUS-RFF  
              A group of segment providing details about a period of  
              registration.

1570           NAD, Name and address  
              A segment identifying a registration institution  
and  
              providing its address.

1580           STS, Status  
              A segment specifying the status of an institution  
in  
              the social security context.  
              The intended usage of this segment is among others  
to:  
              - specify if the institution is a competent  
              institution, a designated body, etc.  
              - specify if the institution is ins state of  
              residence, state of stay, etc.

1590           BUS, Business function  
              A segment identifying the business function of the  
              related institution.  
              The intended usage of this segment is among others  
to:  
              - specify the social security sector to which the  
              institution belongs.

1600           RFF, Reference  
              A segment providing the registration numbers of the  
              person.

1610           Segment group 29: EMP-GIS-FTX-DTM-NAD-QTY-LOC  
              A group of segments describing a period of employment.

1620           EMP, Employment details  
              A segment specifying an employment, occupation or  
              activity.

1630           GIS, General indicator  
              A segment specifying employment related indicators.  
              The intended usage of this segment is among others  
to:  
              - specify if the employment is a mining activity,  
              - specify if the employment is of diplomatic type,  
              - specify if the employment has been posted,  
              - specify if the employment was under contract.

1640           FTX, Free text  
              A segment providing additional information about  
the  
              employment.

1650           DTM, Date/time/period  
              A segment providing additional dates related to the  
              employment.

1660           NAD, Name and address  
              A segment identifying the employer and providing

his address.

1665 QTY, Quantity  
A segment to provide employment related quantities.  
The intended usage of this segment is among others  
to :  
- specify the number of hours worked.

1666 LOC, Place/location identification  
A segment providing employment or activity related  
places.  
The intended usage of this segment is among others  
to: - specify the place of activity.

1670 Segment group 30: ICD-FTX-EMP-GIS  
A group of segments describing a period of insurance.

1680 ICD, Insurance cover description  
A segment describing an insurance cover.  
The intended usage of this segment is among others  
to: - identify a type of insurance,  
- identify an insurance regime,  
- identify a risk covered by insurance.

1690 FTX, Free text  
A segment providing additional information about  
the insurance cover.  
The intended usage of this segment is among others  
to: - provide insurance period reasons.

1700 EMP, Employment details  
A segment specifying the type of employment the  
insurance cover is corresponding to.

1710 GIS, General indicator  
A segment providing indicators related to the  
insurance cover.  
The intended usage of this segment is among others  
to: - indicate if the insurance cover is corresponding  
to a mining activity.

1720 Segment group 31:  
ALC-DTM-SG32-RFF-MOA-GIS-QTY-FTX-LOC-  
SG33-SG34  
A group of segments providing details about a period  
of benefit.  
The intended usage of this segment group is the same  
as in group 14.

1730 ALC, Allowance or charge  
A segment identifying a social security benefit.

1740 DTM, Date/time/period  
A segment providing additional dates related to the benefit.

1750 Segment group 32: STS-DTM  
A group of segments providing details about the status of the benefit and the status of the person justifying the benefit (cause).

1760 STS, Status  
A segment describing a status event.

1770 DTM, Date/time/period  
A segment providing dates related to the status.

1780 RFF, Reference  
A segment providing references related to the benefit.

1790 MOA, Monetary amount  
A segment providing benefit related amounts.

1800 GIS, General indicator  
A segment providing indicators related to the benefit.

1810 QTY, Quantity  
A segment providing quantities related to the benefit.

1820 FTX, Free text  
A segment providing additional information about the benefit.

1830 LOC, Place/location identification  
A segment specifying benefit related locations.

1840 Segment group 33: DMD-STs-DTM-GIS-LOC  
A group of segments identifying documents related to the benefit.

1850 DMD, Document/message details  
A segment identifying a document or message.

1860 STS, Status  
A segment specifying the status of the document.

1870 DTM, Date/time/period  
A segment providing additional dates related to the document.

1880 GIS, General indicator

1890 A segment providing indicators related to the document.  
LOC, Place/location identification  
A segment identifying locations related to the document.

1900 Segment group 34: AGR-FTX-GIS-ATT-DTM-QTY  
decisions A group of segments providing details about  
taken on the benefit and entitlement to benefit.

1910 AGR, Agreement identification  
A segment identifying an agreement about the benefit.

1920 FTX, Free text  
A segment providing additional information about the agreement.

1930 GIS, General indicator  
A segment providing indicators related to the agreement.

1950 ATT, Attribute  
attributes. A segment providing agreement related

1960 DTM, Date/time/period  
the A segment providing additional dates related to  
agreement.

1970 QTY, Quantity  
A segment providing quantities related to the agreement.

1980 Segment group 35: SAL-MOA-PAT-DTM-QTY  
A segment providing details about a period of income.

1990 SAL, Remuneration type identification  
A segment identifying a type of remuneration or income.

2000 MOA, Monetary amount  
A segment providing income related amounts.

2010 PAT, Payment terms basis  
A segment providing payment related information.

2020 DTM, Date/time/period  
A segment providing payment related dates.

2021 QTY, Quantity  
to: A segment providing salary related quantities.  
The intended usage of this segment is among others  
- specify the number of meals per day when the remuneration is provided in the form of meals.

- 2030 Segment group 36: AUT-DTM  
A group of segments specifying the details of authentication.
- 2040 AUT, Authentication result  
A segment specifying the details of any authentication (validation) procedure applied to the SSDREQ message.
- 2050 DTM, Date/time/period  
A segment identifying the date and where necessary, the time of authentication.
- 2060 UNT, Message trailer  
A service segment ending a message, giving the total number of segments in the message and the control reference number of the message.
