The messages summarized in this document were noted for Status 0 during the March 1996 session of GE.1 based on submitted Status 0 documentation. In many cases, this document was a Conference Room Paper (CRP).

The summary for each message consists of the message TAG, message name, document number from the March 1996 session, and message functional description. The TAG, name and functional description were copied directly from the machine readable versions of the submitted documentation, when available.

The complete documentation for these messages is available from the ECE secretariat and, for messages submitted in machine readable format, from the ECE Internet WWW site: http://www.unicc.org/unece/trafix/.

The Group of Experts is invited to:

note this information.

* The present document is reproduced in the form in which it was received by the secretariat.

**TAG:** AVLREQ  
**NAME:** Availability request - interactive  
**DOCUMENT:** TRADE/WP.4/R.1207

**FUNCTIONAL DESCRIPTION:**

An interactive Travel, Tourism and Leisure Availability Request is sent by a customer or his agent, to a service provider to request availability for a Travel, Tourism and Leisure service. The Travel, Tourism and Leasure Availability Response - Interactive (AVLRSP) is utilised to provide an interactive response to the interactive availability request.
TAG: AVLRSP
NAME: Availability response - interactive
DOCUMENT: TRADE/WP.4/R.1208

FUNCTIONAL DESCRIPTION:

An interactive Travel, Tourism and Leisure Availability Response is sent by a service provider in response to an availability request for a Travel, Tourism and Leisure service. The Travel, Tourism and Leisure Availability Request - Interactive (AVLREQ) is utilised to provide an interactive request for which the interactive availability response is used to respond.

TAG: COPAYM
NAME: Contributions for payment
DOCUMENT: TRADE/WP.4/CRP.66

FUNCTIONAL DESCRIPTION:

A message from an enterprise to detail information that this enterprise has to declare for the payment of its social contributions to the responsible authority.

The contributions declared are generally based on the salary amounts paid by the enterprise to its employees during a given period, called reference period of the declaration. However this message does not contain personal information related to the beneficiaries of the contributions paid by the employer.

This message may be sent either directly by the enterprise or a third party representing the enterprise.

TAG: CUSPED
NAME: Periodic customs declaration message
DOCUMENT: TRADE/WP.4/CRP.61

FUNCTIONAL DESCRIPTION:

This Periodic Customs Declaration Message (CUSPED) permits the transfer of data from a declarant to a customs administration for the purpose of meeting legislative and/or operational requirements in respect of the periodic declaration of goods for import or export. The message may also be used, for example:

- to transmit consignment data from one customs administration to another;
- to transmit data from a customs authority to other governments agencies and/or interested administrations.
- to transmit data from a declarant to the appropriate data collection agency on the movement of goods between statistical territories.
TAG: DGRECA
NAME: Dangerous goods recapitulation message
DOCUMENT: TRADE/WP.4/CRP.53

FUNCTIONAL DESCRIPTION:

A message to specify recapitulations pertaining to the dangerous goods on board of a means of transport, e.g. a vessel.

TAG: FINPAY
NAME: Multiple Customer Payment message
DOCUMENT: TRADE/WP.4/CRP.62

FUNCTIONAL DESCRIPTION:

A Multiple Customer Payment message is sent by or on behalf of the financial institution of the Ordering Customer to another financial institution to request this financial institution to transfer funds in favour of a or several Beneficiary Customer(s) in settlement of the referenced business transaction(s).

Throughout this document, the term 'Ordering Customer' refers to either an Ordering Customer, or a Payor or Agent acting on behalf of the Ordering Customer; likewise the term 'Beneficiary' refers to either a Beneficiary, or a Payee or Agent acting on behalf of the Beneficiary.

TAG: IMPDEF
NAME: EDI implementation guideline definition message
DOCUMENT: TRADE/WP.4/R.1211

FUNCTIONAL DESCRIPTION:

The EDI implementation guideline definition message (IMPDEF) permits the transfer of a document on guidelines for the implementation of one or more EDI messages.

TAG: INSDES
NAME: Instruction to Despatch message
DOCUMENT: TRADE/WP.4/CRP.50

FUNCTIONAL DESCRIPTION:

A message from a party to another party who has control over ordered goods, providing instructions to put on hold or to despatch goods according to conditions specified in the message.

TAG: LREACT
NAME: Life Reinsurance Activity message
DOCUMENT: TRADE/WP.4/R.1206

FUNCTIONAL DESCRIPTION:

The LREACT message is used by companies to exchange insured
and policy coverage detail for reinsurance purposes. The message will be used for both ceded and assumed reinsurance.

The trading partners utilizing the Life Reinsurance Activity message will be direct companies, reinsurance companies, reinsurance intermediaries and retrocessionaires. The message will be used to transmit data required by ceding and assuming companies to maintain the records on reinsured cessions. This data supports the reinsurer's ability to appropriately account for, manage, study, value (reserve) and complete their financial reporting. It also facilitates the reconciliation of the reinsurance records in order to maintain the integrity of the data between the trading partners.

TAG: MEQPOS
NAME: Means of transport and equipment position message
DOCUMENT: TRADE/WP.4/CRP.55

FUNCTIONAL DESCRIPTION:

A message containing the position of a means of transport (e.g. a vessel or truck) and/or equipment related to a means of transport.

TAG: MESCONS
NAME: Metered Services Consumption Report message
DOCUMENT: TRADE/WP.4/CRP.48

FUNCTIONAL DESCRIPTION:

A Metered Services Consumption Report is a communication between trading parties, or their agents, providing consumption and where associated technical, information at a location(s) for a product(s) or service(s) where the supply is recorded using a meter(s).

TAG: OSTRPT
NAME: Order Status Report message
DOCUMENT: TRADE/WP.4/CRP.57

FUNCTIONAL DESCRIPTION:

A message by means of which a seller or seller's agent reports information on a order. This may be a reply to an order status status enquiry sent by a buyer or buyer's agent or a report as agreed between the partners.

TAG: PRDSRC
NAME: Product Source Information Message
DOCUMENT: TRADE/WP.4/R.1183

FUNCTIONAL DESCRIPTION:

A message to enable automated resource discovery through the transmission of the classification and categorization of information regarding an organization's products, and facilities.
TAG: PRIHIS
NAME: Pricing History message
DOCUMENT: TRADE/WP.4/R.1210

FUNCTIONAL DESCRIPTION:
A message furnishing the Pricing History and related information of goods previously ordered under conditions agreed to between a seller and a buyer.

TAG: QLSPEC
NAME: Specification message
DOCUMENT: TRADE/WP.4/R.1184

FUNCTIONAL DESCRIPTION:
A Specification Message is exchanged by trading partners to specify a set of requirements for various functional, quality, and performance aspects of a product, process, or service. The Specification Message applies to all generic product categories defined by the International Organization for Quality Management and Quality Assurance:

- hardware, software, processed materials, and services.

The set of requirements may be supplied in the Specification Message in various forms appropriate to the particular functionality being specified, including graphic, parametric, image, spectral, text, or digitized audio data.

The contents of the Specification Message include complete or partial specifications or technical data or other information required to define any specific product, process, or service.

TAG: REBORD
NAME: Reinsurance Bordereau Message
DOCUMENT: TRADE/WP.4/CRP.60

FUNCTIONAL DESCRIPTION:
A reinsurance bordereau message is made of individual policy data and their impact on a reinsurance contract. More specifically, the REBORD can be used to report how the reinsurance premiums or claims figures are built up, or to report individual cessions affecting a reinsurance contract.

TAG: RECALC
NAME: Reinsurance Calculation message
DOCUMENT: TRADE/WP.4/CRP.58

FUNCTIONAL DESCRIPTION:
RECALC is a generic message used in reinsurance environment to show various types of calculation that are either based on the loss ratio or on the technical result of a reinsurance contract or program, mainly in the area of commissions and commission adjustments and in
stop loss claims. This message supports results shown in the RETACC message.

===========================================================================
TAG: REGENT
NAME: Registration of enterprise message
DOCUMENT: TRADE/WP.4/CRP.65
FUNCTIONAL DESCRIPTION:

This message is designed to transmit legal, administrative and statutory information concerning the creation, change or cessation of a business activity within an enterprise. It can be exchanged between an enterprise and a responsible authority.

===========================================================================
TAG: REPREM
NAME: Reinsurance Premium Message
DOCUMENT: TRADE/WP.4/CRP.59
FUNCTIONAL DESCRIPTION:

The Reinsurance Premium Message (REPREM) allows to support the technical entries for any premium or brokerage adjustment amount. For this purpose, it enables to render all the relevant data (mainly amounts and the way they are built up) used in the actual calculation of the adjustment, as well as the other relevant elements used in the specific formula.

===========================================================================
TAG: RETANN
NAME: Announcement For Returns message
DOCUMENT: TRADE/WP.4/CRP.49
FUNCTIONAL DESCRIPTION:

A message by which a party announces to another party details of goods for return due to specified reasons (e.g. returns for repair, returns at end of leasing period, returns because of damage).

===========================================================================
TAG: RETINS
NAME: Instruction for Returns Message
DOCUMENT: TRADE/WP.4/CRP.51
FUNCTIONAL DESCRIPTION:

A message by which a party informs another party whether and how goods shall be returned.

===========================================================================
TAG: STLRPT
NAME: Settlement Transaction Reporting message
DOCUMENT: TRADE/WP.4/R.1209
FUNCTIONAL DESCRIPTION:

A Settlement Transaction Reporting message is exchanged between participants in Billing and Settlement Plan (BSP) to report transaction data for processing
and account settlement purposes. BSP participants includes airlines, agents, Computer Reservations Systems (CRS) and the BSP Centre.

TAG: **TINREQ**
NAME: Tourism Information Request Message
DOCUMENT: TRADE/WP.4/CRP.63

**FUNCTIONAL DESCRIPTION:**

The TINREQ message requests information about tourism and leisure services, products and facilities, to be responded in a TINRSP message. For example, required information may be about accommodation and gastronomy, sites and sightseeing, sports and leisure, cultural activities and events, etc.

TAG: **TINRSP**
NAME: Tourism Information Response Message
DOCUMENT: TRADE/WP.4/CRP.64

**FUNCTIONAL DESCRIPTION:**

The TINRSP message provides information about tourism and leisure services, products and facilities, in response to a TINREQ message. For example, this information may be about accommodation and gastronomy, sites and sightseeing, sports and leisure, cultural activities and events, etc.

TAG: **TRADIN**
NAME: Traffic or travel details of individual traveller message
DOCUMENT: TRADE/WP.4/CRP.54

**FUNCTIONAL DESCRIPTION:**

A message to serve parties that send and/or receive traffic or travel information (e.g. traffic or travel information and control centres, telecommunications services, broadcasters, police, road authorities, public transport operators, breakdown services, search and rescue organisations, freight operators, individual travellers), giving details of a means of transport and/or individual travellers (e.g. passengers) such as a breakdown call or an emergency call.

TAG: **TRAVAK**
NAME: Traffic or travel information acknowledgement message
DOCUMENT: TRADE/WP.4/CRP.56

**FUNCTIONAL DESCRIPTION:**

A message to serve parties that send and/or receive traffic or travel information (e.g. traffic or travel information or control centres, telecommunications services, broadcasters, police, road authorities, public transport operators, breakdown or rescue services, freight operators, individual travellers), acknowledging the follow-up of another traffic or travel related message. Typically, it gives an interim response to, or a negative answer to a traffic or travel information
request message (TRAREQ).

TAG: WASDIS
NAME: Waste disposal information message
DOCUMENT: TRADE/WP.4/CRP.52

FUNCTIONAL DESCRIPTION:

A message to convey information on last inspection and on waste on board of a means of transport (e.g. vessel) and/or equipment related to a means of transport - and still to be disposed in the next place or port of call of the means of transport.
