Correct use of one of the pictograms for wheelchairs as introduced with informal document for 89th GRSG session

Para 3.6.6 amend to read:

3.6.6. 3.4.1.— Vehicles fitted with a wheelchair space ~~and/or priority seats~~ shall have pictogram(s) in accordance with annex 4, figure 23A visible from the outside, both on the front nearside of the vehicle and adjacent to the relevant service door(s). ~~Appropriate~~ **A ONE OF THESE pictogramS shall will also** be placed internally adjacent to the wheelchair space ~~or to the priority seat~~ **REFLECTING WHETHER THE WHEELCHAIR IS TO BE POSITIONED FACING THE FRONT OR THE REAR OF THE VEHICLE.**

Justification:

According to the report of the 88th meeting of GRSG Germany was to provide a symmetrically mirrored wheelchair pictogram.

Subsequently it seems necessary to define their correct use.
