

**PROPOSAL FOR AN AMENDMENT TO PARAGRAPH 2.7.1  
OF DOCUMENT TRANS/WP29/GRE/2001/31**

**A Proposal**

Paragraph 2.7.1.1., amend to read:

“Light source” means one or more elements for ~~optical~~ **visible** radiation, which ...”

Paragraph 2.7.1.1.4., amend to read:

“Filament light source” (filament lamp) means a light source where the element for ~~optical~~ **visible** radiation is one or more heated filaments producing thermal radiation;

Paragraph 2.7.1.1.5., amend to read:

“Gas-discharge light source” means a light source where the element for ~~optical-visible~~ radiation is a discharge arc producing electro-luminescence/fluorescence;

Paragraph 2.7.1.1.6., amend to read:

“Light-emitting diode” (LED) means a light source where the element for ~~optical~~ **visible** radiation is one or more solid state junctions producing injection-luminescence/fluorescence;

Paragraph 2.7.1.1.7., amend to read:

“Electro-luminescence plate” means a light source where the element for ~~optical~~ **visible** radiation is an active layer producing electro-luminescence.

**B JUSTIFICATION**

The change of the word “optical” into “visible” would permit future technologies, such as infra-red and ultra-violet radiation, to be regulated in ECE-R48.
