

Informal document N° 24  
(48<sup>th</sup> GRE, 9-12 April 2002,  
agenda item 3.)

**PROPOSAL FOR DRAFT AMENDMENT  
TO DOCUMENT TRANS/WP29/GRE/2001/6  
(GTR INSTALLATION OF LIGHT)**

**A Proposal**

Paragraph 6.5.4.3., amend to read:

"6.5.4.3. In length:

Side direction indicator lamps:

The distance between the side direction indicator lamp and the front of the vehicle shall not exceed ~~1800 mm~~ **2500 mm** or  $\frac{1}{2}$  of the vehicle's overall length, whichever is less...".

**B JUSTIFICATION**

The prescription of 1800 mm dates the 01 series of amendment to Regulation 48, while ECE-R48.02 allows for 2500 mm. This bigger distance provides with more flexibility, while 1800 mm would be more design restrictive.
