reporting cycle under the Strategy**

Format for reporting on the implementation of the UNECE Strategy for Education for Sustainable Development (2017–2019)

-Summary

By its terms of reference, the United Nations Economic Commission for Europe (ECE) Steering Committee for Education for Sustainable Development is charged with monitoring progress in the implementation of the UNECE Strategy for Education for Sustainable Development (ECE/CEP/BATUMI.CONF/2016/11, annex II, para. 4 (d)).

On 1 November 2018, States participating in the Strategy are due to submit their national implementation reports. Reports are expected to reflect the progress made in the implementation of the Strategy at the national or State level during the next implementation phase (2017–2019). The present document sets out the format for reporting (annex I). The set of indicators, on which the reporting format is based, was developed by the ECE Expert Group on Indicators for Education for Sustainable Development. The reporting format has been updated by the secretariat in consultation with the Bureau to meet the reporting needs of the current phase.

Based on national reports submitted, the secretariat will prepare a synthesis report in 2019, highlighting progress made, identifying challenges and drawing up recommendations. The synthesis report is vital for monitoring the progress made since the previous implementation phases and setting future priorities for implementing the Strategy and is expected to be presented at the fourteenth meeting of the Steering Committee in 2019.

Introduction

1. The present document presents a format for reporting on implementation of the UNECE Strategy for Education for Sustainable Development for the next implementation phase (2017–2019). It was developed based on the procedure for the review of implementation of the Strategy contained in the draft workplan for 2017–2019 (ECE/CEP/AC.13/2018/3). The reporting format also takes into account the two previous reporting exercises in 2010 and 2014, the related reporting templates (ECE/CEP/AC.13/2009/10 and ECE/CEP/AC.13/2014/5, respectively) and the feedback from countries following those exercises on the workability and feasibility of the indicators and the requested information for reporting.

2. In addition, the workplan for implementation of the current phase of the Strategy sets out the timeline for the reporting exercise in 2018 (*ibid.*, para. 46).

3. The set of indicators was developed by the ECE Expert Group on Indicators for Education for Sustainable Development set up by the High-level Meeting of Environment and Education Ministries (Vilnius, 17–18 March 2005). Three complementary progress reports provide information on the development of the indicators (see CEP/AC.13/2005/9, ECE/CEP/AC.13/2006/5 and ECE/CEP/AC.13/2008/4).

4. In 2014, to reflect the requirements the third phase (2011–2015) of the Strategy’s initial implementation period (2005–2015), in consultation with the Expert Group on Indicators the secretariat introduced the following changes to the reporting template developed by the Group:

(a) The reporting template was updated to use the revised International Standard Classification of Education (ISCED), as adopted by United Nations Educational, Scientific and Cultural Organization (UNESCO) member States in 2011;

(b) To gather important analytical information for the implementation of education for sustainable development (ESD) after the third phase of implementation came to an end, countries were given the possibility to add concluding remarks, i.e., on the main successes, challenges and implications for future implementation for each of the Strategy’s objectives;

(c) Where appropriate, references to educator competences in ESD as developed by the ECE Expert Group on Competences were added (indicator 3.1);

(d) Where appropriate, references to the priority action areas as adopted by the Steering Committee at its seventh meeting (Geneva, 1–2 March 2012) (ECE/CEP/AC.13/2012/2, para. 48) were included (indicator 2.3);

(e) Descriptive remarks on indicators that referred only to phases I and II of the first implementation period were revised to reflect the requirements of phase III, i.e., focusing on an analysis of implementation and implementation outcomes;

(f) Issue 9 of the 2010 reporting template (“Describe any assistance needed to improve implementation”) was revised to read “Future implementation of education for sustainable development”, focusing on priorities for the future ESD implementation framework.

5. In 2018, to reflect the requirements and priorities of the 2017–2019 implementation phase, outlined in the framework for the future implementation of the Strategy (ECE/BATUMI.CONF/2016/11), in consultation with the Bureau, the secretariat has introduced the following changes to the 2014 reporting template developed by the Expert Group:

(a) The tables with ISCED levels provided in the “yes/no” part of indicators 1.2.2, 2.2.1, 2.3.1, 2.3.2, 2.3.3, 2.4.1 and 4.2.2 have been updated to reflect the growing interest in technical and vocational education and training by adding the relevant ISCED programme orientation category for vocational education, as follows: 25. Lower secondary vocational education; 35. Upper secondary vocational education; 45. Post-secondary non-tertiary vocational education; 55. Short-cycle tertiary vocational education. Similarly, the tables containing a breakdown by ISCED levels provided in appendixes I (a), (b) and (c) and appendix III have been also updated with the inclusion of these additional levels 25, 35, 45 and 55 for vocational education. Countries are invited to assess these levels if they have relevant information and data. Additional change was proposed during the thirteenth meeting of the Steering Committee (3-4 May 2018): where appropriate, the tables with ISCED levels have been updated by adding one option for the answer “9. No information available”;

(b) The title of indicator 1.3 “National policies support synergies between processes related to sustainable development (SD) and ESD” has been revised to read “National policies support synergies between processes related to the Sustainable Development Goals (SDGs), sustainable development (SD) and ESD”;

(c) A new sub-indicator 1.3.1 “Does your country have a stand-alone ‘sustainable development’, ‘global understanding’, ‘international understanding’ policy, plan or law in place, in each case using ‘sustainable development’ language?” has been added;

(d) Former sub-indicator 1.3.1 “Is ESD part of SD policy(ies) if these exist in your country?” has been renamed as sub-indicator 1.3.2;

(e) A new sub-indicator 2.4.2 “Which of the following dimensions of learning is your country planning to reinforce in student assessment or examinations in the next five years, in relation to ESD?” has been added, which includes the following options for an answer: (a) Knowledge; (b) Skills and competencies; (c) Values and attitudes; (d) Behaviours; (e) None; and (f) No information available;

(f) Issue 9 of the 2014 reporting template (“Future implementation of education for sustainable development”) has been revised to read “Describe any assistance needed in implementing the Strategy in your countries”, as the political mandate for the future implementation of the Strategy has since been agreed at the High-level Meeting of Education and Environment Ministries in 2016;

(g) Appendix I (a) has been revised and several new themes have been added to the listing of proposed themes, as follows: “Sustainable lifestyles”; “Gender equality”; “Oceans and sea”; “Renewable energy”; Sustainable cities and communities”; and “Culture’s contribution to sustainable development”. Also, several themes have been revised as follows: “Ethics and philosophy” has been revised to read “Environmental ethics and philosophy”; “Citizenship, democracy and governance” has been revised to read “Global citizenship, democracy and governance”; “Environmental protection (waste management, environmental monitoring, risk assessment, etc.)” has been revised to read “Environmental protection (waste management, environmental monitoring, risk assessment, etc.”); “Climate change” has been revised to read “Climate change and desertification”; and “Economics” has been revised to read “Economic growth and good jobs”.

6. The main elements of the reporting procedure are as follows:

(a) ECE member States should prepare reports through a transparent consultative process involving all relevant stakeholders at the national or State level;

(b) Although the “yes/no” part of sub-indicators was required to be reported on in the initial phase I (2007) and the “descriptive” part in phase II (by 2010) and phase III

(by 2015), countries are encouraged to report on the full set of indicators at the end of each phase, to the extent possible, in line with a country's progress in implementing the Strategy for ESD;

(c) Thirty-eight member States reported on a voluntary basis by preparing reports for the Environment for Europe Ministerial Conference in Batumi in 2016. Thirty-six member States submitted national implementation reports for the Environment for Europe Ministerial Conference in Belgrade in 2007, and 36 member States responded to the first formal call for reporting in 2010. Countries are requested to prepare an updated version of their most recent report for 2018;

(d) Reports should be submitted to the secretariat electronically in Word format. The text should be in English. Member States are also encouraged to provide the text in the two other official languages of ECE, French and Russian. Reports will be made available in the languages in which they are received. No editing will be provided;

(e) The deadline for submission of reports to the secretariat, taking into account United Nations document management procedures, is 1 November 2018;

(f) The ECE secretariat will post the reports on its website;

(g) The ECE secretariat will prepare a synthesis report for 2019, highlighting achievements, identifying challenges and drawing conclusions regarding future ESD implementation. It is expected that the reporting results will be presented at the fourteenth meeting of the Steering Committee in 2019;

(h) Key stakeholders are encouraged to provide the secretariat with their reports on programmes or activities that support the implementation of the Strategy.

7. The key documents for the preparation of the 2018 national implementation reports include the following:

(a) The UNECE Strategy for Education for Sustainable Development (CEP/AC.13/2005/3/Rev.1);

(b) The format for reporting presented in annex I to the present document;

(c) The guidance for reporting on the implementation of the UNECE Strategy for Education for Sustainable Development (ECE/CEP/AC.13/2009/5);

(d) The first progress report on the implementation of the Strategy (2005–2007), “Learning from each other: achievements, challenges and the way forward” (ECE/BELGRADE.CONF/2007/INF/3-ECE/CEP/AC.13/2007/2 and Add.1 and Corr.1);

(e) The second evaluation report on the implementation of the Strategy (2008–2010), “Learning from each other: achievements, challenges and ways forward” (ECE/CEP/AC.13/2012/3);

(f) The third evaluation report on the implementation of the Strategy (2011–2015), “Learning from each other: achievements, challenges and ways forward” (ECE/CEP/AC.13/2016/3);

(g) The publication: *Ten Years of the UNECE Strategy for Education for Development — Evaluation Report on the Implementation of the UNECE Strategy for Education for Sustainable Development from 2005 to 2015* (ECE/CEP/179).

8. A proposed timeline for reporting is provided in annex II to the present document.

Indicator 2.3 A whole-institution approach¹⁴ to SD/ESD is promoted	Sub-indicator 2.3.1	Do educational institutions ¹⁵ adopt a “whole-institution approach” to SD/ESD?	
Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>		<i>The Steering Committee has adopted as one priority action area that every school adopts an ESD school plan by 2019.¹⁶ ESD school plans are one means to implement a whole-institution approach. Please provide information on the implementation of this priority action area in your country.</i>	<i>Also, please provide information for all levels of your education system in accordance with ISCED by ticking (✓) in the table as appropriate and specify for non-formal and informal education, as appropriate. “Green Schools Program” (www.sostenibilitat.ad) is a voluntary program addressed to formal education (from Early childhood education to Upper secondary education). It promotes a whole-institution approach, focusing on: knowledge, values, greening institutions; involving all the educational community and promoting an exchange network between the institutions.</i>

¹⁴ A “whole institution approach” means that all aspects of an institution’s internal operations and external relationships are reviewed and revised in the light of SD/ESD principles. Within such an approach each institution would decide on its own actions, addressing the three overlapping spheres of Campus (management operations); Curriculum; and Community (external relationships).

¹⁵ For higher education institutions: whole-university, whole-college or whole-faculty approach (including inter-faculty approaches).

- (a) Yes No
 (b) Yes No
 (c) Yes No

Please elaborate.

In **Higher Education**, the Quality Assurance Agency of Higher Education of Andorra (AQUA) (<http://www.aqua.ad/en>) is a public law institution, which aims to guarantee the quality of the higher education offered in Andorra. The evaluation system is the tool for the ongoing improvement of higher education, taking the guidelines of the **European Higher Education Area** as a benchmark. The AQUA's mission is to watch over the quality of higher education in Andorra with the permanent demand for quality and rigour derived from social and employment needs. AQUA assesses official bachelors, master and doctoral programmes; and it will start to assess also vocational higher education in 2019.

- In 2016, the Steering Committee of AQUA decided to include the principles of sustainability into the national quality assurance model.
- In 2017, AQUA coordinated the study **Guidelines to include sustainability in the HE quality assurance framework in Andorra**, developed by Grup de Recerca Còmplex *of the Universitat Autònoma de Barcelona*.
- In 2018-2019, AQUA is developing the project **Making connections between the Institutional Evaluation and the Sustainable Development Goals (United Nations)**, Empowering stakeholders for quality enhancement, in collaboration with ACPUA and financed by INQAAHE.

From Early childhood education to Upper secondary education: Green Schools Program (formal education, from Early childhood to Upper secondary education) is an initiative of the department of Environment and the Department of Education of the Government, and a private company manages it.

Higher Education: both internal and external stakeholders are participating in the project Making connections between the Institutional Evaluation and the Sustainable Development Goals (United Nations). Empowering stakeholders for quality enhancement, such as: universities, national government, quality Assessment Agency, research centre on Sustainability, Chamber of Commerce, Industry and Services, UNESCO.

¹⁸ For higher education institutions: this covers the issue of university “outreach” (meaning a wide spectrum from regional integration, business cooperation and transdisciplinarity to eco-procurement and research-education-cooperation).

Annex II

Proposed timeline for reporting

The proposed timeline for the preparation and submission of national implementation reports set out below aims to facilitate the reporting exercise at the national level. Member States are asked to respect the deadline of 1 November 2018 to ensure sufficient time for the preparation of the report on progress in implementation during the first post-2015 phase of implementation of the Strategy at the regional level, and the reflection of any review of implementation in the discussions on education for sustainable development within the framework of the Steering Committee.

<i>National preparation process</i>	<i>Time required</i>	<i>Tentative timing</i>
First draft of the report	1 month	December 2019
Multi-stakeholder consultation on the draft	1-2 months	January - February 2019
Final report preparation (including translation, where required)	1 month	February 2019
Deadline for submission of national implementation reports to ECE		1 November 2018
