2   Introduction

The current practice of the exchange of business documents by means of telecommunications – usually defined as e-Business presents a major opportunity to improve the competitiveness of companies, especially for Small and Medium Enterprises (SME).

The Quotation process is used to agree on delivery and payment of goods or services between the supplier and the customer.

Started as an initiative by CEN/ISSS Work shop eBES, the European Expert Group 1 (EEG1) – Supply Chain & e-Procurement developed the first draft of Cross Industry Quotation. The Cross Industry Quotation has been compiled using the EUROFER ESIDEL version 1.0 as the base, with contributions and submissions from: EUROFER, GS1, CIDX, EDIFICE, AIAG/ODETTE/JAMA, GHX and EDS.

The structure of this document is based on the structure of the UN/CEFACT Requirements Specification Mapping (RSM) – Documentation Template and Conformity Rules, document reference CEFACT/ICG/006

Version 1.0.12 of the BRS was taken as the basis to develop the CCBDA Requirements Specification Mapping (RSM) version 1. The structure of this document is based on the structure of the UN/CEFACT Requirements Specification Mapping (RSM) – Documentation Template Guidelines.

2.1   Audience

The main audiences for this document are the potential authors of individual RSMs. These are primarily the UN/CEFACT business and IT experts who are responsible for specifying the business requirements for e-business solutions in a specific domain and for furthering the development of solutions as relevant standards. Authors may include other standards bodies or users and developers in developed or developing economies.

2.2   Reference Documents

Knowledge and application of the following standards is crucial to the development of quality business requirements specifications. Other key references are shown in the appropriate part of the document.

- UN/CEFACT. Techniques and Methodologies Group (TMG). UN/CEFACT's Modelling Methodology (UMM): UMM Meta Model Core Module. (Candidate for 2.0). 2009-01-30.

Formal definitions of many of the technical terms used in this RSM guideline may be found in the above references but for convenience some key definitions are included in Annex 1 of this document.

3.1 Purpose and Scope

This project aims to standardize the business process and information entities of cross-industrial electronic quotation. In various industries all over the world, there are all sorts of quotation actions being performed. With the explosive spread of the Internet and the rapid growth of information technology, quotation activity is being performed electronically through the Internet as well as other business activities. With the realization of electronic quotation through the Internet and spreading practice of international electronic qoutation, the needs for international standardization are thought to increase. According to such trends, the goal of this project is to make the business process and information entities within quotation activities standard.

3.2 Target Solution

The target solution is an implementation using XML schema based on the following UN/CEFACT specifications: CCTS 2.01, NDR 2.1, CCBDA 1.0 and the UN/CEFACT standard Supply Chain Reference Data Model.

4 Business Requirements Summary

In conjunction with the BRS document (UN/CEFACT Business Requirement Specification Cross Industry Quotation Process Version 1.00.09), the purpose of this document is to provide a standard framework for the exchange of information.

4.1 Business Processes, Information Envelopes and Authorised Roles

The BRS Cross Industry Quotation Process defines the following processes:

- The Customer sending a Quotation Request to the Supplier
- The Supplier responding on a Quotation Request Response from the Customer (or not)
- The Supplier sending a Quotation Proposal to the Customer
- The Customer responding on a Quotation Proposal towards the Supplier

4.2 Business Partner Types and Authorised Roles

- Buyer
- Seller

Table 3 Business Partner Types and Authorized Roles

Authorised Role Name	Business Partner Type Name
Quotation Requester	Buyer
Qoutation Request Responder	Seller
Quotation Provider	Seller
Quotation Receiver	Buyer

5 Conceptual Model

The conceptual model identifies the main Entity Classes. The following model is shown in the form of class diagram.

Figure 1 Cross Industry Quotation conceptual data model
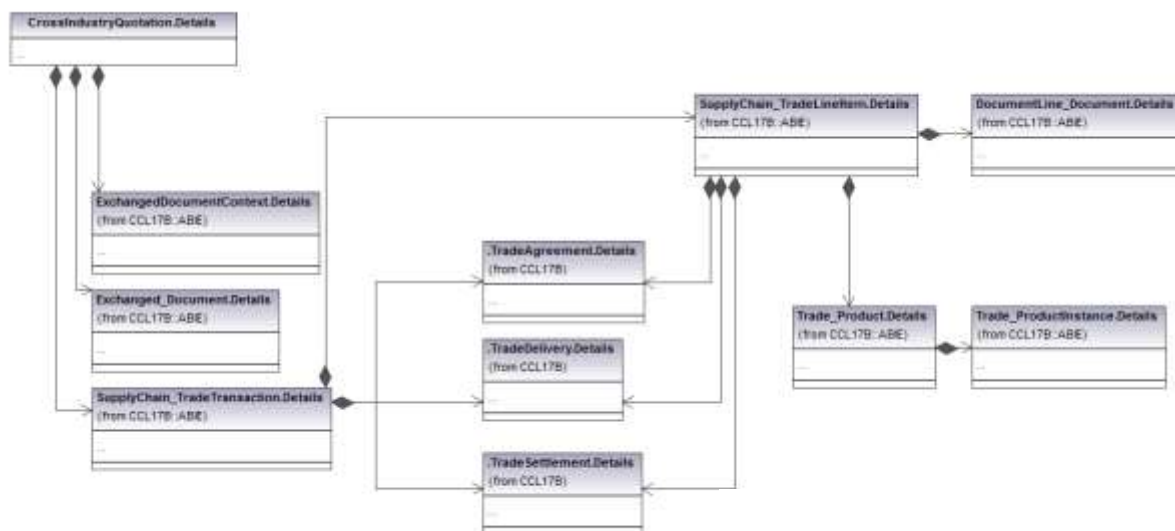

Philosophy behind the conceptual design

The conceptual design is based on the assumption that information exchanged in the order-to-pay process tends to have a large degree of similarity. Therefore rather than linking the information to message specific entities three neutral entities have been defined: Trade Agreement, Trade Delivery and Trade Settlement. These entities contain the main semantic payload for all communication exchanges, on header as well as on line level.

A fourth essential entity is the Product entity. This entity holds all characteristics of the trade product that are independent of a particular trade transaction.

The Trade Transaction and Trade Line Item entities serve to structure the entities mentioned before.

Description of the main entities

- Document Context: Application processing information for the business document.
- Document Heading: Generic document heading information such as Quotation number, Issue date.
- Trade Transaction: Information on the trade transaction(s) to which the Quote applies.
- Trade Line Item: Information on the line items that are being quoted.
- Trade Agreement: information on the commercial agreement on which the quoted trade transaction or line is based.
- Trade Delivery: information on the fulfillment of the quote trade transaction or line.
- Trade Settlement: information on the financial settlement of the quote trade transaction or line.
- Product: Information on the generic object that is being quoted.
- Product Instance: Information on the individual objects that are being quoted.

CCL17B

Remark: Additions or changes to this CCL are included later in this section. During the harmonization process the change requests will be considered against the whole CCL and may lead to suggestions for the re-use or modification of existing core components.

6.2 Business Information Entity Model

For readability reasons the canonical model is provided in multiple diagrams, each providing a full description of a segment in the Cross Industry Request For Quotation, Request For Quotation Response, Quotation Proposal, Qoutation Proposal Response. The three entities Trade Agreement, Trade Delivery and Trade Settlement support the entire Order-to-Pay process. In the individual steps of the process, such as the Quotation, further refinements can be made on what is communicated on header and line level. Therefore in the canonical model for the Quotation message the Trade Agreement entity is realized as two supply chain entities, one for the header and one for the line.

6.4 Detailed class diagrams

333 Below diagrams are detailing the CCTS Business Informati
334 Cross Industry Catalogue. Compared to the canonical data model, as presented earlier, these
335 multiple diagrams are broken down in a logical fashion. The Class Diagrams show the Aggregate
336 Business Information Entity, and its properties (Basic Business Information Entities and its
337 Association Business Information Entities), and relevant cardinalities.

Disclaimer (Updated UN/CEFACT Intellectual Property Rights Policy – ECE/TRADE/C/CEFACT/ 2010/20/Rev.2)

ECE draws attention to the possibility that the practice or implementation of its outputs (which include but are not limited to Recommendations, norms, standards, guidelines and technical specifications) may involve the use of a claimed intellectual property right.

Each output is based on the contributions of participants in the UN/CEFACT process, who have agreed to waive enforcement of their intellectual property rights pursuant to the UN/CEFACT IPR Policy (document ECE/TRADE/C/CEFACT/2010/20/Rev.2 available at http://www.unece.org/cefact/cf_docs.html or from the ECE secretariat). ECE takes no position concerning the evidence, validity or applicability of any claimed intellectual property right or any other right that might be claimed by any third parties related to the implementation of its outputs. ECE makes no representation that it has made any investigation or effort to evaluate any such rights.

Implementers of UN/CEFACT outputs are cautioned that any third-party intellectual property rights claims related to their use of a UN/CEFACT output will be their responsibility and are urged to ensure that their use of UN/CEFACT outputs does not infringe on an intellectual property right of a third party.

ECE does not accept any liability for any possible infringement of a claimed intellectual property right or any other right that might be claimed to relate to the implementation of any of its outputs.
