

Computerisation of TIR

Dushanbe, 19 May 2015

The TIR System is hosted in the most secure hosting facilities in Switzerland

- ✓ IRU systems are hosted in two highly secure Swisscom data centers
- ✓ Located in Bern in the heart of Switzerland
- ✓ 24/7 monitoring and operations
- ✓ Guaranteed business continuity
- ✓ Green IT

TIR is computerized and includes risks management systems

IRU Real-Time SafeTIR (RTS)

- Starting from 1990s: geopolitical changes with high increase in trade volumes and in TIR transport → risk increase for TIR guarantee chain.
- October 1995: Administrative Committee for the TIR Convention adopted a Recommendation which set out an electronic control system for TIR Carnets.
- August 2006: this control system – **SafeTIR**, was included in the TIR Convention as **Annex 10**.

Real-Time SafeTIR Key Features & Benefits

- Secure real-time guarantee check
- SafeTIR data transmission
- Data reconciliation
- 20 connected countries

IRU RTS – geographic coverage

IRU RTS in the region

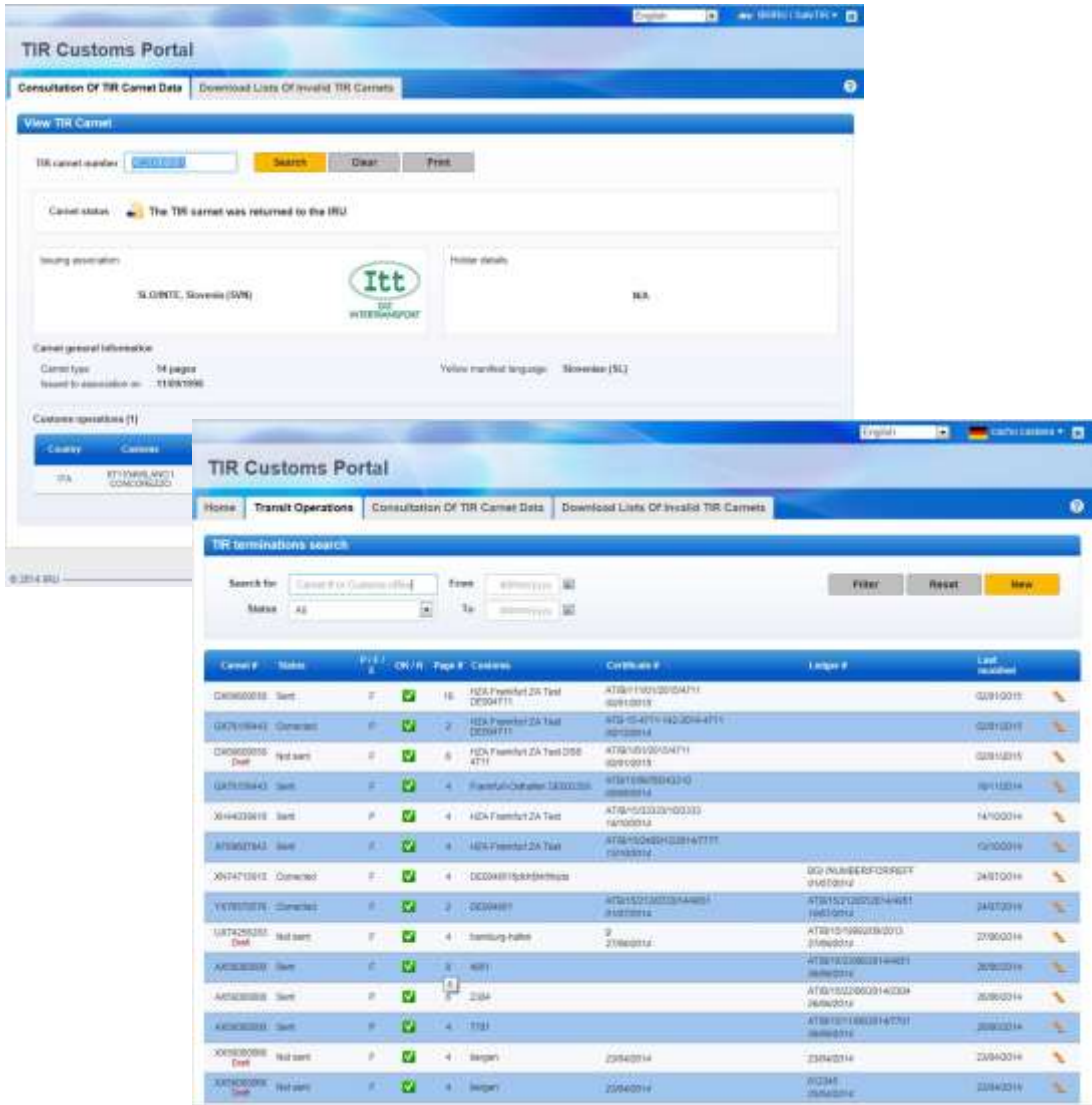

Safe TIR	2.0 days	0 days	3.8 days	0.3 days	2.7 days	21.8 days	40.7 days	2.1 day	0.3 days

Negotiation stage: Tajikistan
Turkmenistan

RTS countries

IRU TIR Customs Portal

TIR Customs Portal Key Features & Benefits

- Accessible by all customs officers via the internet from anywhere in the world
- Fallback solution to Real-Time SafeTIR
- Up-to-date guarantee status
- Consultation of TIR guarantee information
- Submission of SafeTIR data

Automatic check of
TIR carnet validity

**Reduced resource
intensive activities**

Faster TIR-related
customs operations

**Enhanced cargo
throughput**
performance at
borders

**Prompt reaction to
irregularities**
occurred

Enhanced safety and security

Advance declaration is mandatory

- EU – from 2009
- Customs Union (Belarus, Kazakhstan, Russia)
- Ukraine (*transport data to be submitted electronically*)
- Iran
- Expected soon – in Turkey

TIR Electronic Pre-Declaration System

The banner features a grid of binary code (0s and 1s) on a blue background. A globe icon is positioned in the center of the grid. Below the grid is a blurred image of a white truck driving on a road. At the bottom right, the IRU logo is displayed next to the text "International Road Transport Union".

TIR- EPD satisfies the requirements of all Customs Authorities, connected to TIR-EPD

IRU TIR-EPD in the region

Negotiation stage: Tajikistan
Turkmenistan

 TIR-EPD countries

IRU TIR-EPD vs TIR Carnet

IRU Union Internationale des Transports Routiers
CARNET TIR*
14 volets I.R.U. X825000000

VOUCHER N° 1 / N° 2 TIR CARNET X825000000
IRU
GOODS MANIFEST
FEUILLET NON DOCUMENTAIRE NOT FOR CUSTOMS USE
COUNTERFOL N° 1 / N° 2

Data received by customs:

- HS codes
- Goods description
- Weight
- Package type and quantity
- Itinerary
- Vehicle details
- Driver's details
- Cost of goods

Etc.

TIR-EPD = TIR Carnet + additional information
(in compliance with all national requirements)

IRU TIR-EPD – advantages for **Customs**

No need of manual data entry

Automatic validity check against IRU database

Only **authorised** TIR Holders can submit information on only **valid** TIR Carnets

Identical information is sent to all countries

Possibility to take into account all customs requirements

Advance declaration
Advance risk analysis in line with WCO SAFE Framework of Standards

IRU TIR-EPD – advantages for **transport operators**

Free of charge –
no need of brokers'
services

Confidentiality – no
access to
company's
information by a 3rd
party

Only with TIR-EPD:
advance information
is sent **in one click**
to all countries of
itinerary

Only with TIR-EPD:
user interface in
national languages

Accessible via
Internet from any
place

Faster and simpler customs procedures
at the border

Saving time and money

**Higher competitiveness for a
company**

TIR Holder:
Order an eGuarantee online

Association:
Approve and issue the eGuarantee

TIR Holder:
Pre-declare the transport and GO!

IRU TIR-EPD: user-friendly interface for operators

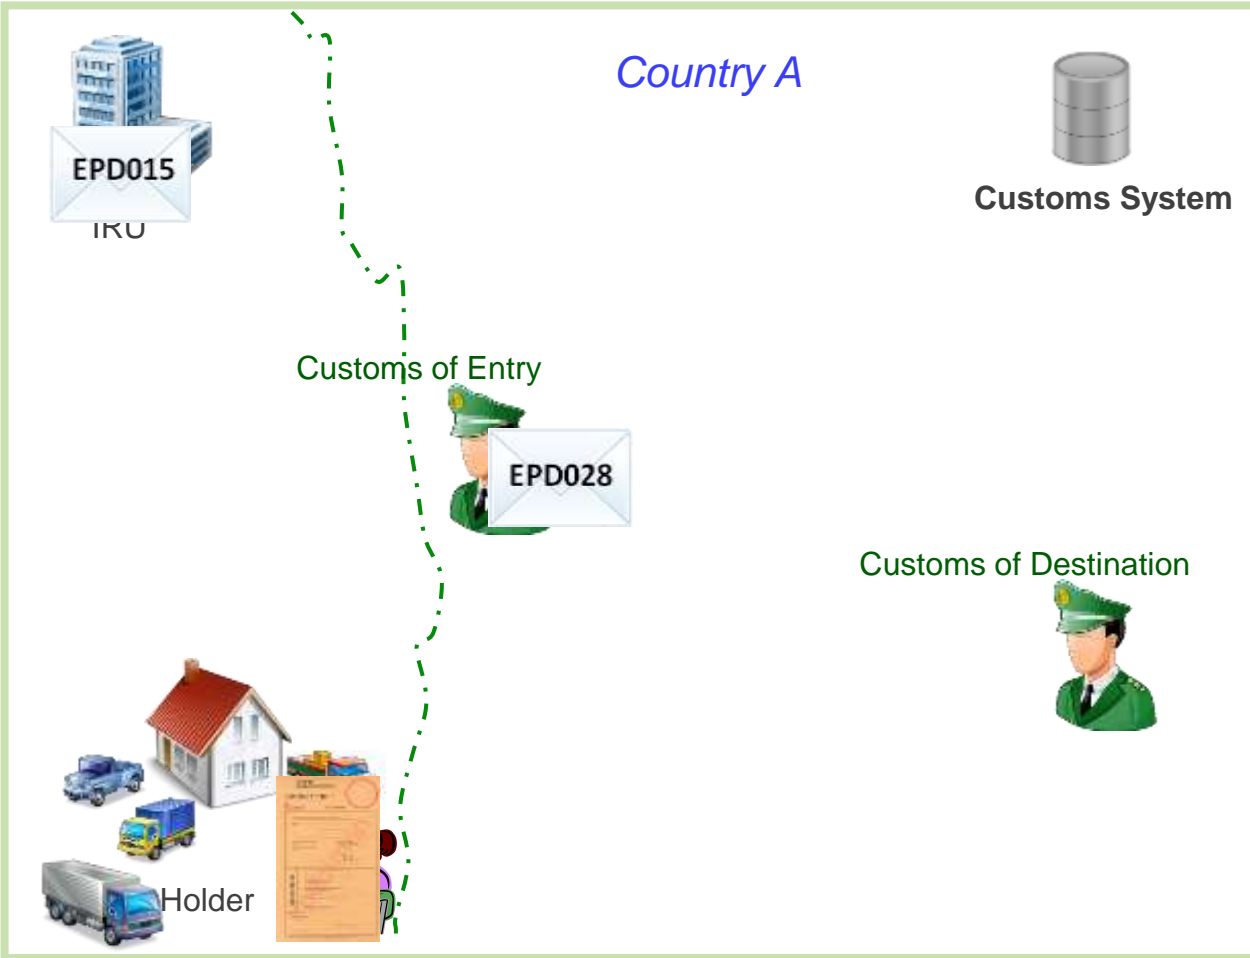

<https://tirepd.iru.org/>

<https://demo-tirepd.iru.org/>

The screenshot displays the TIR-EPD web application interface. At the top, there is a blue header with the 'TIR EPD' logo on the left, a language dropdown set to 'English', and a user profile for 'Valentin Zaytsev'. Below the header is a banner image of a road with the ZMPD logo (1957) on the right. A navigation menu includes 'Home', 'EPDs', 'Company info', and 'Admin'. A progress bar below the menu shows steps: 'Carnet' (active), 'Itinerary', 'Customs operations', 'Vehicle info', 'Consignments', and 'Send'. The main content area is titled 'New EPD' and features a 'Carnet validity' section with the following fields:

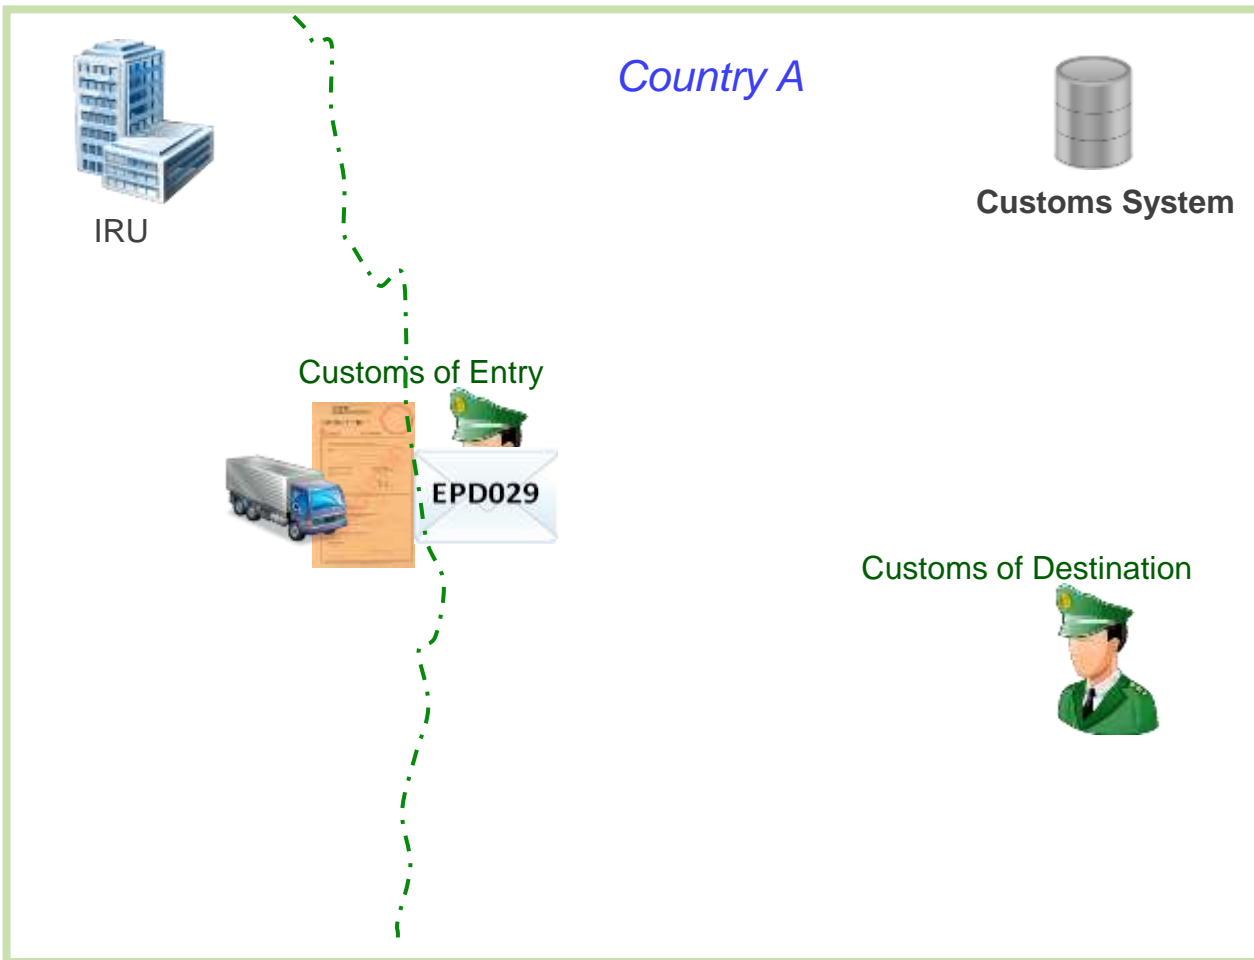

- TIR Carnet number: JX76774535
- Holder unique ID: POL/051/9999
- Expiry date: 13/05/2015

At the bottom, there is a 'Mandatory fields' indicator and two buttons: 'Cancel' and 'Next >'.

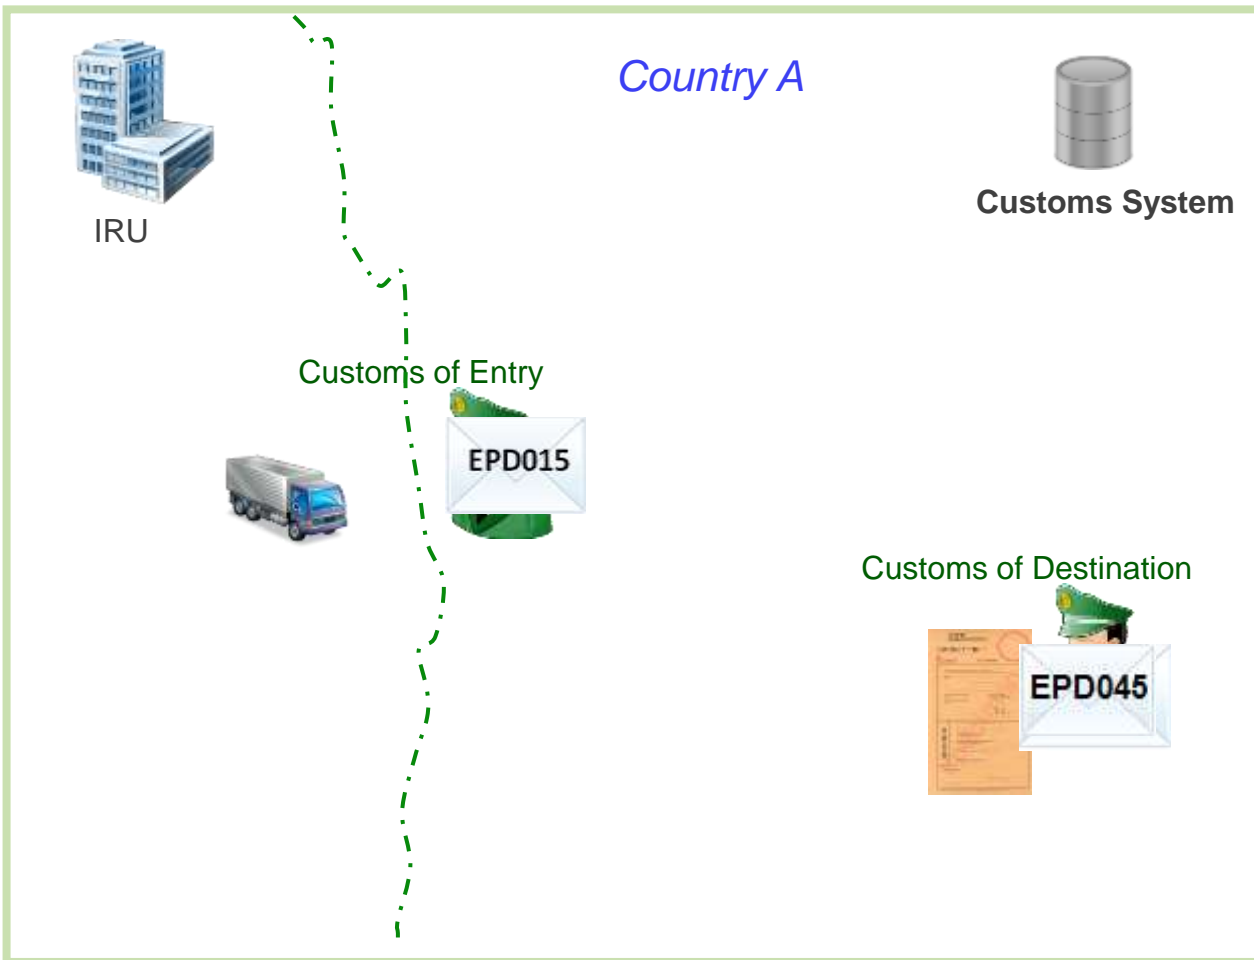

- Holder fills in Electronic Advanced Cargo information and provides it to Customs (EPD015)
- Customs confirm the receipt of the electronic data (EPD928)
- Customs allocate the Transportation Reference Number (EPD028)

Risk assessment and decision is made!

- Holder presents documents and pre-information reference number to Customs Officer
- Automatically Customs system checks the status of the TIR Carnet (RTS TCHQ)
- Customs validates electronic data against paper – based documents
- Goods are released for transit (EPD029)

- Electronic data becomes available in the Customs Office of destination
- Holder presents the documents to Customs Officer
- Customs checks the status of the TIR Carnet in Real - Time (RTS TCHQ)
- Upon completion of the customs clearance procedures the TIR Carnet (RTS WSST) termination record is transmitted to the IRU
- Discharge record is transmitted to the IRU (EPD045)

IRU RTS/TIR-EPD implementation

- Hardware** → No additional hardware required
- Software** → SafeTIR Client
TIR-EPD Data Exchange System
- Internet access** → High speed internet connection
- HR requirements** → 1 or 2 IT experts
- Time required** → 1 to 3 months
- IRU support** → Technical support and assistance;
consulting and source code examples

IRU Green Lanes with TIR-EPD

without Green Lane

TRANSPORT CORRIDOR ENTRY **with Green Lane**

- Green Lane with TIR-EPD means:**
- ✓ Selectivity of customs control based on advance risk assessment
 - ✓ Facilitated and faster procedure for reliable transport.

**TIR-EPD Green Window
Ak-Tilek, Kyrgyzstan**
