

# IRU B2C-C2B AskTIR Presentation

Presentation to GE.1  
Belgrade, 13-14 September 2011

*Philippe GROSJEAN*  
**CIO**

# What is AskTIR ?

---

- Association software for knowledge of TIR
- For National Associations to effectively manage the TIR process and risks
- Covers the entire TIR Carnets life-cycle and records the complete history of all TIR operations
- Incorporates features from the best TIR carnet management practices at IRU member Associations
- 'Benchmark' for all TIR Management IT systems

## Why AskTIR ?

---

To enable National Associations to:

- Apply strict rules as laid down in the TIR Convention in a harmonised manner. Also to apply additional IRU best practice rules & regulations;
- Apply risk control to TIR Holders by monitoring authorizations, security measures, quotas and performance;
- Ensure security by restricting sensitive TIR operations at the national level;
- Ensure secure daily electronic data exchange with IRU;
- Manage TIR activities through follow-up reports, task lists;
- Benefit from constant improvements and IRU support

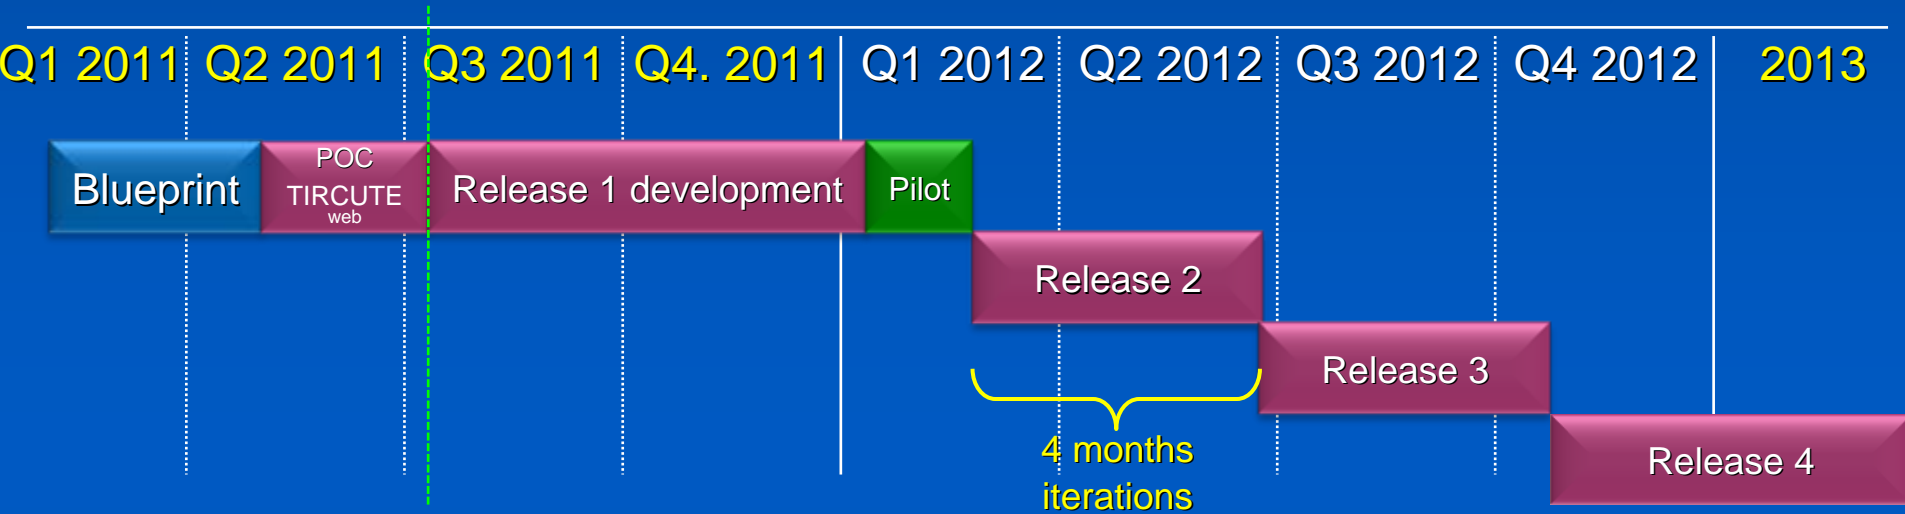

## Vision

Provide Associations with a IRU **hosted, secure, high performance web application ...**

...that will reduce local infrastructure costs, improve real-time integration, **user friendliness** and **customisability ...**

...to further facilitate the TIR related work of the associations in accordance with the **TIR convention** as well as **IRU rules and regulations ...**

...and support the coming **dematerialisation of the TIR Carnets**

## Release 1:

- ✓ Subset of AskTIR functionality
- ✓ Enhanced User Interface and Experience
- ✓ Software as a Service
- ✓ Real-time integration with IRU systems

## Later releases:

- ✓ Remaining AskTIR functionality (e.g. Claims & Branch Management)
- ✓ New features (e.g. enhanced haulier portal)
- ✓ Advanced needs of some associations

## Release 1

## Later releases

<p><b>Haulier Mgt</b></p>	<p><b>Carnet Stock Mgt</b></p>	<p><b>Extended Haulier Mgt</b> Vehicles Claims Automatic suspension</p>	<p><b>Extended Stock Mgt</b> Branches Centralized / decentralized Alerts &amp; warnings</p>
<p><b>Carnet Issuance</b></p>	<p><b>Carnet Return &amp; Control</b></p>	<p><b>Contacts and Vehicles</b> Search across hauliers Blacklist Warnings</p>	<p><b>Extended Carnet Return &amp; Control</b></p>
<p><b>Other</b> Lost/Stolen/ Reconciliation</p>	<p><b>Haulier Portal</b> Read-only</p>	<p><b>Other</b> Tasks Letters, invoices Ad-hoc reporting</p>	<p><b>Haulier Portal</b> Edit mode Online payment ...</p>
<p><b>Other</b> User management Export lists to Excel</p>	<p><b>Architecture</b> Software as a Service Real-time integration Multi-tenancy</p>	<p><b>Claims</b></p>	<p><b>Complex Functionalities &amp; Technical interfaces</b></p>

## Completed to date:

- ✓ Definition of all user stories for Sprint 1-3
- ✓ Setup of Development and Q&A environments
- ✓ Completion of the Sprint 1 and 2:  
**Haulier Management & Issuance and Return process**
- ✓ Start implementation Sprint 3:  
**Control & Stock managements**

- Software as a Service (SaaS) web application
- Modern architecture
- Secure application & data
- Real-time integration with IRU systems

# Development Principles

- Using an agile process that allows us to **focus on delivering the highest business value** in the shortest time.
- Allows to **rapidly and repeatedly inspect** actual working software (every two weeks to one month).
- The business sets the **priorities**. Teams self-organize to determine the best way to deliver the **highest priority features**.
- Every month anyone can **see real working software** and decide to release it as is or continue to enhance it for another sprint.
- IRU's **first focus until mid-2012 is to develop an application covering the needs of associations using currently ATIRS98 and AskTIR.**
- Considering the size of the effort, the IRU plans to **cover most of the proposed by Association's complex business value by end of 2012 with continuation in 2013.**

# IRU ASKTIR<sup>web</sup> Benefits for Associations

- Elegant migration path for all ATIRS98 and ASKTIR users to a new powerful web-based application
- Attractive solution for new associations and for associations with obsolete proprietary software
- No infrastructure, no maintenance and no support costs for associations (all managed by the IRU)
- Continuous development & enhancement driven by the IRU
- Real-time TIR data synchronisation, immediate availability of information at associations and customs
- Important step towards the full computerization of the TIR process and the dematerialisation of the TIR Carnet!
