

Proposal for draft amendments to Regulation No. 16
(Draft amendment to TRANS/WP.29/GRSP/2005/7/Corr.1)

A. Proposal

Paragraph 4., amend to read:

"4. The fixtures below shall be constructed with a weight between [5] and 15 kg and shall be of durability and stiffness in respect to their specific use."

B. Justification

Weight quantification was felt to be necessary and also a rough prescription of durability and stiffness.
