Fifty-seventh session

Geneva, 26-30 March 2007

Item 4.12. of the provisional agenda

REGULATION No. 48  
(Installation of lighting and light-signalling devices)

Proposal for a draft corrigendum

Submitted by the expert from the Netherlands

The text reproduced below was jointly prepared by the experts from Germany, Italy and the Netherlands, proposing to switch off the daytime running lamps automatically when the front fog lamps or headlamps are switched on. The modifications to current text of the Regulation (up to Supplement 1 to the 03 series of amendments) are marked in **bold** characters.

---

Note: This document is distributed to the Experts of the Working Party on Lighting and Light-Signalling (GRE) only.

A. PROPOSAL

Paragraph 6.19.7., amend to read:

"6.19.7. Electrical connections

If installed, the daytime running lamps .... without the use of tools.

The daytime running lamp shall switch OFF automatically when the **front fog lamps or** headlamps are switched ON, except when the latter are used to give intermittent luminous warnings at short intervals."

B. JUSTIFICATION

This document aims to correct an existing omission concerning the switching OFF conditions of daytime running lamps with regards to front fog lamps. The daytime running lamps must not only switch OFF automatically when the headlamps are switched ON, as currently laid down in the last part of paragraph 6.19.7., but also when the front fog lamps are switched ON. It is, therefore, proposed to correct this omission by means of a corrigendum.
