Informal document No. **GRE-57-22**
(57th GRE, 26-30 March 2007
agenda item 4.13.)

Proposed amendments to paragraph 6.2.7. of ECE/TRANS/WP.29/2007/20

The modifications to ECE/TRANS/WP.29/2007/20 are marked in **bold** or ~~strike through~~ characters.

"6.2.7. Electrical connections

....

When the headlamp switch(es) is(are) not in any manual ON position, the dipped-beam headlamps shall be switched ON or OFF automatically. They shall be switched ON when it is required to drive with the dipped-beam headlamps switched on due to low ambient lighting conditions (e.g. during night time driving conditions, reduced visibility, tunnels, etc.).

These provisions may not apply when dedicated daytime running lamps are installed and they are operating in conjunction with at least rear position lamps.

However, it shall be always possible to manually ~~override the automatic switching of~~ **activate** the dipped-beam headlamps."
