Introduction

HUNGARY

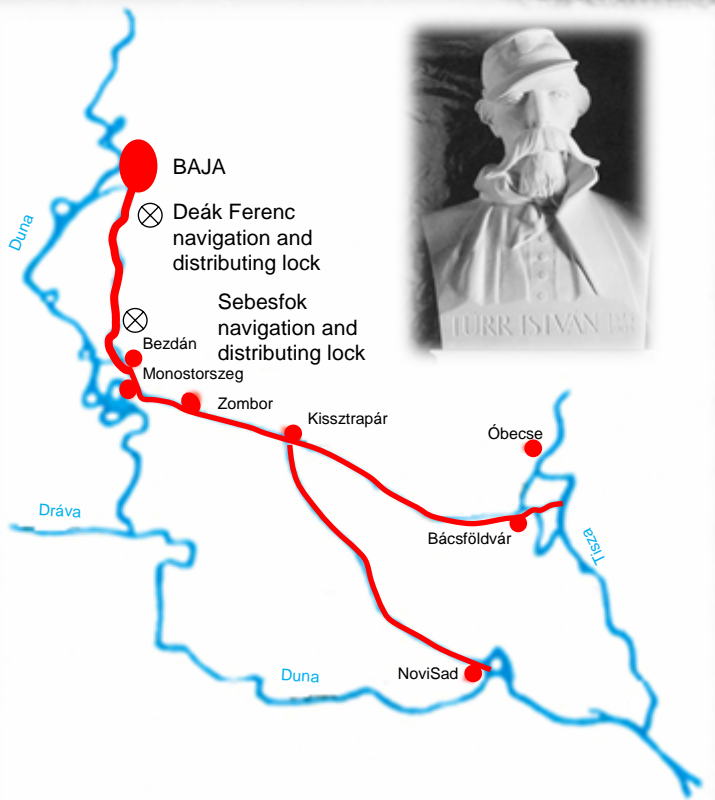

The project area in 1899

The project area in 2008

The history of the Ferenc distributing channel

- the old Ferenc channel was being built between 1794 and 1801,

- the old channel was enlarged by Ferenc József embranchment around 1870,

- the Ferenc distributing channel was being built between 1871 and 1875 .

Developmental ideas:

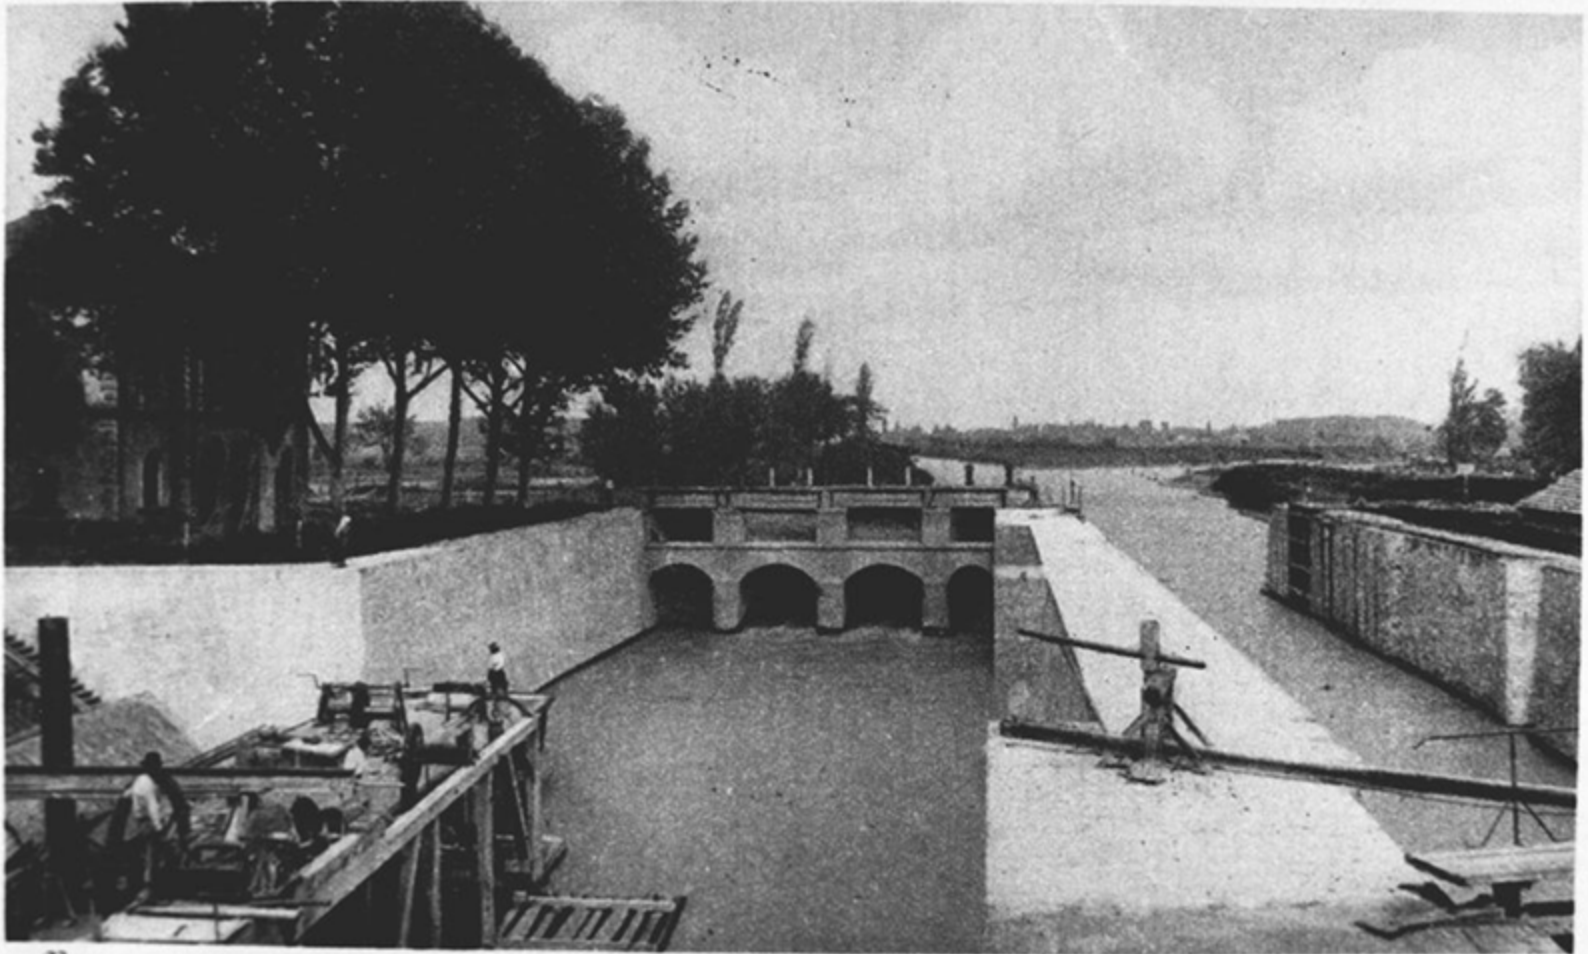

- challenge of our era ... promotion of the water type tourism and navigation...
- natural treasure...
- paradoxical situation...
- interests...

Developmental ideas :

Possible utilizations before the revitalization (initial developmental ideas...)

- 1. Visitor Centre**
- 2. Water base - harbour**
- 3. Infrastructure**

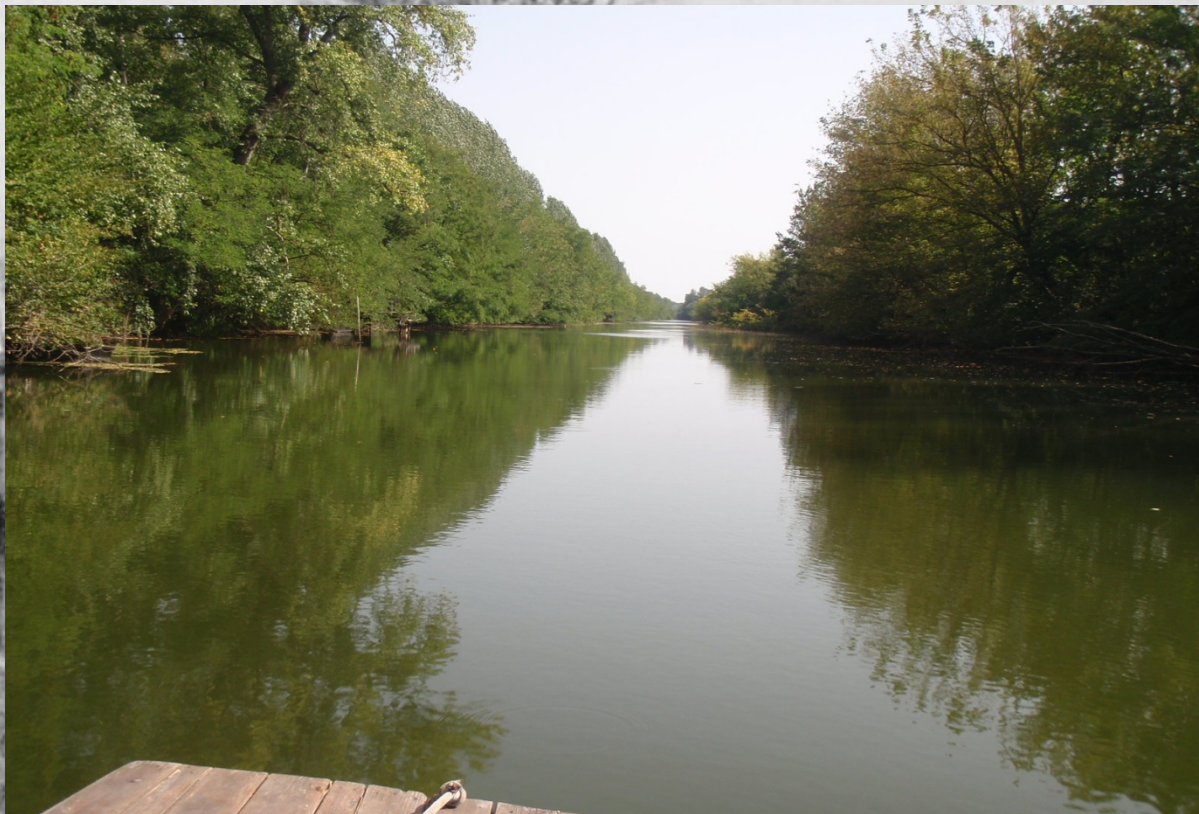

Pictures from the past...

Baja

Deák Ferenc-zsilip

...and the present

A black and white photograph of a canal with a dam and a building in the background. The dam has several arched openings. The water in the canal is calm, reflecting the dam and the building. The building is a long, two-story structure with a gabled roof and several windows. There are trees in the background, some of which are bare. The sky is overcast.

Thank you very much of your
kind & assistance!
