

WP = Working Pressure (ISO terminology)

NWP = Nominal Working Pressure (SAE/EC regulation terminology)

NFC = Number of nominal filling cycles

for ISO the Nominal Filling cycle are: for heavy duty 11250, may be reduced to 5500

for SAE the Durability test cycles are: 3XL/R, but not less than 5500 (heavy duty 11250)

L = vehicle lifetime mileage

R = vehicle range

EC regulation are at moment discussing NFC values.

JARI does not fix a nominal number of cycles.
