## **II. Justification**

1. Italy shares the concern expressed by some experts on the difficulties for Technical Services to apply at the moment of type approval of lighting and light-signalling devices as components the pertinent requirements contained in the installation Regulations (UN Regulations Nos. 48, 53, 74 and 86).
2. For this reason Italy proposes to introduce into each Regulation dealing with the type approval of lighting or light-signalling devices a direct reference to the requirements

contained in Regulations Nos. 48 (for M, N and O vehicles categories), 53 and 74 (for L vehicles category) and 86 (for T vehicles category), mandating the lamps manufacturers to apply them, as already happens for the definitions, to obtain the type approval of their products.

3. The final aim of the proposal is to avoid that a lamp having obtained its type approval as a separate device is then not able to satisfy the pertinent installation requirements, as it happened, in the past, some time for originally equipped lamps and in many occasions for after-market products.

4. UN Regulations Nos. 27, 65, 69, 70 and 88 are excluded from the proposal due to their peculiarity and to the absence of requirements for their installation in UN Regulations Nos. 48, 53, 74 and 86, as well as UN Regulations Nos. 1, 2, 5, 8, 20, 31, 56, 57, 72, 76, 82 since it is no more possible to obtain new type approvals based on such Regulations.
