

**Multilateral Agreement ADN/M 021
under section 1.5.1 of the Regulations annexed to the ADN
on the carriage of substances containing more than 10% benzene and
having an initial boiling point of not more than 60 °C**

1. By derogation from section 3.2.3 Table C of the Regulations annexed to the ADN, for substances containing more than 10% benzene and having an initial boiling point of not more than 60 °C, i.e. UN Nos. 1203, 1267, 1268, 1863, 1993 and 3295, the applicable requirements shall be determined in accordance with subsection 3.2.3.3. In this case the determination of the applicable carriage requirements by applying 3.2.3.3 should take precedence over using the entries for substances for which no sufficient data is available. These provisions may only be applied if the carried substance was mentioned on the carrying vessel's vessel substance list valid until 31 December 2016, in accordance with the requirements of ADN applicable up to 31 December 2016.
2. In addition to the documentation requirements prescribed in 5.4.1.1 of the Regulation annexed to the ADN, the consignor shall add to the transport document "Carriage agreed under the terms of section 1.5.1 of the Regulations annexed to the ADN (M 021)".
3. This Agreement shall be valid until 30 June 2019 for the carriage on the territories of those ADN Contracting Parties signatory to this Agreement.

If it is revoked in whole or in part before that date by one of the signatories, it shall remain valid until the above mentioned date only for carriage on the territories of those ADN Contracting Parties signatory to this Agreement which have not revoked it.
