DRAFT SUPPLEMENT 10 TO REGULATION No. 23

(Reversing lamps)

Note: The text reproduced below was adopted by the Administrative Committee (AC.1) of the amended 1958 Agreement at its twenty-fourth session, following the recommendation by WP.29 at its one-hundred-and-thirtieth session. It is based on document TRANS/WP.29/2003/23, not amended (TRANS/WP.29/926, para. 101).

Paragraph 1.3., amend to read:

"1.3. "reversing lamps of different types" are reversing lamps which differ in such essential respects as:

- The trade name or mark,
- The characteristics of the optical system,
- The inclusion of components capable of altering the optical effect by reflection, refraction or absorption; and
- The category of the filament lamp.

The colour of the filament lamp or the colour of any filter does not constitute a change of type."

Insert a new paragraph 7.2., to read:

"7.2. The limits of the apparent surface in the direction of the reference axis of a light-signalling device shall be determined."
