The logo for eTIR, featuring a red lowercase 'e' followed by the letters 'TIR' in a large, bold, blue sans-serif font.The logo for ITDB, featuring a grid of colored squares (grey, blue, yellow, red, green, dark blue, light blue, pink) to the left of the letters 'ITDB' in a bold, grey sans-serif font.

International TIR Data Bank (ITDB) &
eTIR related projects status report
Working Party on Customs Questions affecting
Transport (WP.30)
165th session – 6-9 February 2024

UNECE

ITDB usage and data status

- 1,184 web application users *(since 2018)* +28
- 30,089 authorized holders +53
- 282 stamps and seals records +2
- 2,691 TIR customs offices -300

(Details of charts below available upon request at itdb@un.org)

Contracting Parties with ITDB users since 2018

Active Contracting Parties with holder data

Active Contracting Parties with Customs or Nat. Associations users

Active Contracting Parties with stamps or seals data

Active Contracting Parties with customs offices data

● Has auth. holders ● No auth. holder

● Has users

● Has Stamps/Seals ● No Stamps/Seals

● Has cust. offices ● No cust. office

ITDB web service status

- Approximately 138,000 web service calls per year in 2018 and 2019
- 77,700 WS calls in 2020
- 176,710 WS calls in 2021
- 233,740 WS calls in 2022
- 232,560 WS calls in 2023
- 11,990 WS calls so far in 2024

→ *Web service usage trend lower than 2022/2023*

Number of web service requests over time

Recent achievements:

- eTIR National Application:
 - Main web application - completed
 - implementation of JSON Based API extension: in progress (90% completed)
 - Recording of tutorial/training videos for eTIR NA (completed)
- ITDB: Adaptation of EU customs office data import - specific notes + handling of data format variation (completed)

Activities planned for coming month:

- eTIR National Application:
 - Completion of JSON Based API extension
 - Finalization of term of reference document required for application hand-over
- ITDB:
 - Study of Uzbekistan request for extended web services to improve holder data quality
 - Study of ITDB data management process streamlining

Clarification on eTIR National Application API extension

Existing eTIR National Application:

- Web application allowing customs officer to perform electronic TIR procedures
- Interconnected with eTIR international system, ITDB and TIR-EPD
- Development and testing completed
- Deployable for free in national customs information system
- No mandatory integration with national customs system

→ Allows any contracting party customs to be eTIR operational (at the cost of having customs officer using a second window)

eTIR National Application - API extension:

- JSON Based API to sending All “I” messages (except notifications) to eTIR international system
- Easy mean to integrate with national customs systems with eTIR NA (still not mandatory).
- Development and testing completed at 90%

→ Allows National Customs Systems to be integrated with eTIR National Application (removing the need for second window for users), to indirectly to interconnect with eTIR international system

Any question ?

Thank you!
