

## Economic Commission for Europe

### Inland Transport Committee

Working Party on the Transport of Dangerous Goods

21 March 2024

Joint Meeting of the RID Committee of Experts and the  
Working Party on the Transport of Dangerous Goods

Bern, 25-28 March 2024

Item 3 of the provisional agenda:

**Standards**

## Addition to the report of the Working Group on Standards

Transmitted by the European Committee for Standardisation (CEN)

### I. Introduction

1. This concerns a standard that should have been included in the Report of the Working Group on Standards, circulated as informal document INF.14.

2. At the March 2023 session of the Joint Meeting, it was accepted to include in RID/ADR standard EN ISO 9809-4: 2022 *Gas cylinders – Design, construction and testing of refillable seamless steel gas cylinders and tubes – Part 4: Stainless steel cylinders with an Rm value of less than 1 100 MPa*.

3. However, standard EN 1964-3:2000 *Transportable gas cylinders – Specifications for the design and construction of refillable transportable seamless steel gas cylinders of capacity from 0.5 litre up to 150 litres – Part 3: Cylinders made of seamless stainless steel with an Rm value of less than 1 100 MPa* is still referenced in RID/ADR.

4. At a meeting of CEN/TC23, *Transportable Gas Cylinders*, held on 16 May 2023 a decision was taken to request CEN to withdraw EN 1964-3 as it had been “de facto superseded by EN ISO 9809-4:2022 that has the same scope”.

5. The Working Group on Standards has considered this by correspondence and agrees with the decision to withdraw EN 1964-3 from RID/ADR.

### II. Proposal

6. Draft amendment relating to standard EN 1964-3:

6.2.4.1 Amend the table *for design and construction of pressure receptacles or pressure receptacle shells* as follows:

For EN 1964-3:2000, in column (4), replace “Until further notice” by “Until 31 December 2026”.
