

Input from you for scoping study

Fourth session of the Meeting of the Parties
Geneva, 14-16 November 2016

Protocol on Water and Health

Scoping sanitation issues

Should the sanitation scoping study be about

1. Human excreta management?

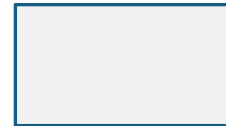

YES

or

NO

or

do not know

2. Waste water management?
3. Water Sanitation and Hygiene?
4. Legislation on sanitation in your country?

Which aspects of sanitation in scoping?

Should the sanitation scoping study be about

1. Improved sanitation coverage % ?

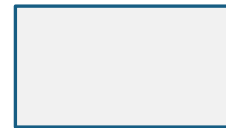

YES

or

NO

or

do not know

2. Type of sanitation per country in ratio (septic tank/ sewerage) ?
3. Options for the sanitation value chain (collection, transportation, treatment, reuse) ?
4. Hygiene behaviour ?
5. Industrial wastewater management ?
6. Decentralised sanitation systems (non water)?

Safe use of wastewater and reuse

Should the sanitation scoping study be about

1. Are you interested in tools for the safe (re)use of wastewater?

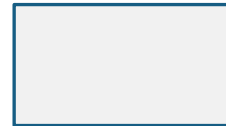

YES

or

NO

or

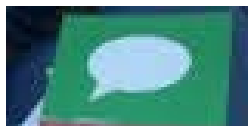

do not know

2. Could reuse of wastewater lead to regulatory issues?
3. Were you familiar with Sanitation Safety Planning before this event?
4. Should sanitation be climate resilient in your country?

Financial aspects of sanitation

Are you interested in

1. tools for financing sanitation infrastructure investments?

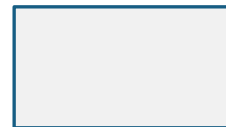

YES

or

NO

or

do not know

2. tools for financing sanitation infrastructure maintenance?
3. to your opinion are financial resources currently adequate for sanitation?

Wastewater monitoring

1. Wastewater quantity is monitored in my country

YES

or

NO

or

do not know

2. Wastewater quality is monitored in my country
3. Reused water quality is monitored
4. Needs for wastewater monitoring should be included in the scoping study?

Climate resilient sanitation

1. In my country there is a dedicated response plan in case of disaster, floods, and other extreme events

YES

or

NO

or

do not know

2. If yes: does this response plan contain a specific part addressing sanitation?
3. In the light of water scarcity and extreme weather events, which of the following sanitation themes are considered “hot topics” in your country?
 1. No- and low- water sanitation solutions
 2. Separated sewers (rainwater drainage vs sewer)
 3. City planning and resilience
 4. Reuse regulation
 5. Reuse in practice
