Subject: Application for access to information

According to odelstingsproposisjon no. 52 (2008-2009) concerning the Nature Diversity Act, section 7.2.4.3, the following assessment was made during the preparation of the proposition: "An assessment of the relationship of the provisions to international law has been carried out, which has shown the necessity for amendments and adjustments of the provisions if they are to be applied outside of 12 nautical miles."

I hereby request access to this assessment. I ask that this request concerning access to information be considered according to section 11(2) of the Environmental Information Act. The information shall be used in an academic article in law and must be considered to be of significant general interest. The information sought was decisive for the relevant provisions of the Nature Diversity Act, but was not referred in detail in the preparatory works.

Yours sincerely

Ole Kristian Fauchald
