COMMITTEE OF EXPERTS ON THE TRANSPORT OF DANGEROUS GOODS AND ON THE GLOBALLY HARMONIZED SYSTEM OF CLASSIFICATION AND LABELLING OF CHEMICALS

Sub-Committee of Experts on the Transport of Dangerous Goods (Twenty-first session, 1-10 July 2002 agenda item 6 (b))

PACKAGINGS

Miscellaneous proposals

Substances in the Dangerous Goods List that are allocated P003 Proposed changes to LP02

Transmitted by the expert from the United Kingdom

Background

- 1. Packing Instruction P003 was developed for a range of substances and articles where it is recognised that UN packaging is not required. Although there are no package limitations by mass or volume because this is a 'P' number, the upper capacity limit of 400Kg/450 litres is considered to apply. (This is the lower capacity limit for the definition of large packagings in 1.2.1.)
- 2. There are occasions when a number of the substances allocated to this instruction need to be carried in quantities greater than 400Kg/450 litres particularly when they are waste e.g. aerosols, fire extinguishers etc.
- 3. The expert from the United Kingdom believes that to solve this, LP02 should be added to all the UN numbers that attract P003 as shown in the Annex to this paper. On the attached Annex is a list of all those UN numbers that in the opinion of the expert from the United Kingdom should be subject to this provision. Those UN numbers on the Annex which are shown with an * refer to those entries in the Model Regulations that already attract LP02.

Proposal

4. Add "LP02" to all the UN numbers that attract P003 shown in the Annex to this paper. GE.02-
