The UNECE/ECID capacity building project for the sustainable development of biomass production and marketing in the UNECE region

By: Hans Jansen
UNECE
Economic Cooperation and Integration Division

Geneva, 5 December 2007
Biomass
Biomass in UNECE project includes:

- Woody biomass
- Crop residues
Integrated Approach

- Enterprise Development
- Sustainable development of the agro/forest sector
- Certification
- Training and education
- Biomass trade logistics
- Port logistics
- Trade facilitation procedures
Biomass Demand in Europe
Timber Resources of Russia

North-West Federal District
Resources – 8063.0 million m³

Ural Federal District
Resources – 6885.0 million m³

Far-East Federal District
Resources – 21023.0 million m³

Siberian Federal District
Resources – 30718.0 million m³

Privolzhsky Federal District
Resources – 4053.0 million m³

North-Caucasian Federal District
Resources – 539.2 million m³

Central Federal District
Resources – 2317.0 million m³
Bulk Terminal Rotterdam
Creating Sustainable Biomass Sector

- **Inter-sectoral cooperation**
  - Enterprise Development and “high-growth” SMEs
  - Environment, Sustainable Energy and Combating Climate Change
  - Trade, Transport

- **Cooperation with the private sector along entire logistics chain**
  - Forest- and agro residue producers
  - Transport operators (rail, road, port)
  - International bulk traders
  - Energy producers (electricity; district heating)

- **Concrete Results**
  - Integrated solutions for the entire logistics chain
  - Coordinated approach involving all stakeholders: private sector, governments, academia, local communities, NGOs
The logistics chain
