

## Evelyn Eggers

**Director Business Development  
DAKOSY Datenkommunikationssystem AG**

After having completed her degrees of national economy at the University of Hamburg Evelyn Eggers started to work as an EDP-consultant. She is with DAKOSY now for more than 30 years, starting her career at DAKOSY designing a software application for Liner Agents to organise the Container Hinterland Transport. After this first project Ms Eggers was responsible for various software projects all dealing with Container Transport, Customs and/or data exchange. While the majority of the projects were conducted on the request of customers, Ms Eggers had the opportunity to gain and carry out various EU-funded Research-projects on behalf of DAKOSY, mostly regarding Container Hinterland Transport, Customs, National Single Windows and cross-border data exchange.

Ms Eggers has a long history with DAKOSY in analysing business processes and setting up harmonized and standardized messages. She worked on standardizing messages for rail and road transport and interactions of the partners of the supply chain. Between 2001 and 2015 Ms Eggers was responsible for the Sales Department of DAKOSY. Since 2015 she is Director of the Business Development Department of DAKOSY. Ms Eggers is also representing DAKOSY at IPCSA and other international bodies and associations.
