SMDG Code Lists in 2020

- ## TERMINAL code list
  - ~ monthly update on http://smdg.org/smdg-code-lists , maintenance requests by mail to coderequest@smdg.org
  - Terminal location shown on Google Maps (link on SMDG website)
  - Facility code list API (beta version)

- ## Revision of handling code lists
  - Intentions:
    - replace outdated ITIGG code list JM4-120v17 (FTX codes)
    - Distinguish *instructions* and *reporting of status* – distinguish *stowage instructions* from *other handling instructions*

  - Result: 3 code lists (to be published soon)
    - **HANDLING** – *instructions* for handling and preparation of transport equipment [~ 90 codes]
      e.g. CCT = prepare for cotton, VFO = vents fully open, LWE = to be weighted, …
    - **STOWINS** – *instructions* for stowage in means of transport [~ 60 codes]
      e.g. ALQ = away from living quarters, FBU = flat-tack bottom-up, DFF = door facing forward, …
    - **ATTRIBUTES** – *reporting* of special status of transport equipment and stowage locations [~ 120 codes]
      e.g. prepared for cotton, VFO = vents fully open, SMC = smart container with IOT-device, …

  - --> new revision of MIGs required

- ## Delay reason code list (published on http://smdg.org/smdg-code-lists) [~ 70 codes]

SMDG ... about us

**User Group for Electronic Data Interchange (EDI)
in the Container Shipping community**
- recognized as UN/EDIFACT User Group since the 1990-ies

Founded in the late 1980-ies

The name SMDG arose from "Ship Message Design Group" and was still retained when widening the group's work area.
