

## Recommendation 24

### *HARMONIZATION OF TRANSPORT STATUS CODES*

In 1992 work was started on the harmonisation of transport status codes by the Joint Transport Group during the UN/EDIFACT Joint Rapporteurs Teams meetings. Representatives from the following countries contributed to this work: Austria, Australia, Belgium, Canada, Denmark, Finland, France, Germany, Japan, the Netherlands, New Zealand, Norway, Spain, Sweden, Switzerland, the United Kingdom and the United States of America. Contributions covered the interests of the various modes of transport.

This work was presented to the Working Party on Facilitation of International Trade Procedures at its thirty-ninth session in March 1994. The Working Party appointed an ad-hoc group to prepare a Recommendation on Transport Status codes, to include also the proposal submitted by the delegation of Bulgaria in 1991 on a classifier of transport status codes.

The results of this ad-hoc group have been submitted to the Working Party on Facilitation of International Trade Procedures, and approved in principle at its forty-first session in March 1995.

At its forty-second session in September 1995, the Working Party agreed to approve this Recommendation in the final form.

#### **RECOMMENDATION**

The Working Party on Facilitation of International Trade Procedures, at its forty-second session in September 1995, agreed to recommend:

1. To participants in international trade to accept and to implement the transport status codes;
2. To Governments, international organizations concerned and national trade facilitation organs to accept and encourage the implementation of these codes.

At the forty-second session of the Working Party representatives attended from: Austria; Belgium; Bulgaria; Canada; Czech Republic; Denmark; Estonia; Finland; France; Germany; Hungary; Iceland; Ireland; Italy; Luxemburg; Malta; the Netherlands; Norway; Romania;

Russian Federation, Slovak Republic; Spain; Sweden; Switzerland; United Kingdom of Great Britain and Northern Ireland and the United States of America. Representatives from Australia, Brazil, Gabon, Japan, Korea, Nigeria and Senegal participated under Article 11 of the Commission's terms of reference.

The session was attended by representatives of the secretariats of the United Nations Conference on Trade and Development (UNCTAD), the United Nations Commission on International Trade Law (UNCITRAL), as well as by representatives of the following intergovernmental and non-governmental organizations: Central Office for International Railway Transport (OCTI), the World Customs Organization (WCO), International Air Transport Association (IATA), International Article Numbering Association (EAN), European Electronic Messaging Association (EEMA), International Federation of Freight Forwarders Associations (FIATA), International Chamber of Commerce (ICC), International Express Carrier's Conference (IECC), International Organization for Standardization (ISO), Society for World Wide Interbank Financial Transfers (S.W.I.F.T), International Union of Railways (UIC), International Federation of Inspection Agencies (IFIA).

#### **I. BACKGROUND**

1. In international trade, there is a requirement to exchange information about the status of consignments, goods, equipment or means of transport at a certain time or place in the logistic chain.
2. More and more, Electronic Data Interchange is used as a means to convey information concerning the movement of goods throughout the transport chain.
3. For tracing and tracking purposes, the concept "transport status codes" has been introduced and EDIFACT messages have been developed to contain this information.
4. In order to ensure consistency in the exchange of information concerning the status of goods, consignments and/or equipment, a common understanding of the concepts "Transport status" and "Status reason" is necessary.
5. Research carried out by international organisations in the transport group covering various modes of trans-

Recommendation No. 24 adopted by the Working Party on Facilitation of International Trade Procedures, Geneva, September 1995 ECE/TRADE/WP.4/R.1067/Rev.2 [Edition 96.1].

port has resulted in the following definitions for the above-named concepts.

Transport status: a snapshot of the position and/or condition of consignments, goods and/or equipment at any point in time or place within the full transport or logistical chain.

Status reason: an explanation or justification of the status of consignments, goods and/or equipment.

6. Users of the transport status codelist may choose codes to fulfil the business requirements to suit Transport status or Status reason as they wish.

## II. SCOPE

7. This recommendation provides a coding system for transport status codes.

## III. FIELD OF APPLICATION

8. The codes provided for in this Recommendation are intended for use in manual and/or automated systems for the exchange of information between all participants in international trade.

## IV. REFERENCES

9. Reference is made to the UN/ECE Trade Data Elements Directory (UN/TDED) and to the UN/ECE EDIFACT Data Elements Directory (UN/EDED).

## V. CODING SYSTEM FOR TRANSPORT STATUS CODES

10. The codes and their definitions for transport status are annexed to the recommendation.

## VI. MAINTENANCE OF THE CODE

11. The Transport Status codes will be maintained by the UN/ECE Secretariat.

12. Requests for new code values, changes or cancellations have to be addressed to the secretariat in accordance with the procedures concerning code matters.

## VII. UTILIZATION

13. Representation of transport status codes can be given in plain language or in coded form. For electronic data interchange, the coded form is recommended.

14. The choice of descriptions to be applied depends on the requirements of the communicating partners.

15. Communication partners will determine which code values out of the total code set shall be used.
