Our practice

Safety information:

- Effects generated using PHAST programme

the planned place of investment in protective zone
Summary

1. The City of Płock, together with PKN ORLEN S.A. established an investment area around production facility called PPPT

2. PKN ORLEN S.A. gives information and health and safety recommendations for existing plants where are required and also for new investments: *to use or to implement requirements of PKN ORLEN S.A.*, *to use personal gas mask during evacuation from the hazardous site only*

3. Competent authority may issue an administrative decision following hazard analysis and safety assessment (domino effect), if it is needed

4. There was any administrative refusal for the new investments but legal requirements have to be fulfilled (Construction or Environment Law)
