Setting targets, implementing measures and reporting under the Protocol

Third reporting exercise

Christoph Höser
Bonn University, Institute for Hygiene and Public Health
WHO Collaborating Centre for Health Promoting Water Management and Risk Communication
GeoHealth Centre, AG Health GIS | Geostatistik
Completeness of reports

Consistency with the revised template

- Majority of countries used the template
- Selected countries modified the template.
- Completeness is demanding and not every party is responding to every part
- A major problem is correct calculation of values (while definition is provided).
Report: major strategies

• comprehensive
• positive
• showing improvement over time

As expressed by reporting countries:
• take away messages
• need for action
• new targets
• including suggestion for future work and future themes
Predefined by structure of template:

1. General aspects

- National target-setting and strategies
- Public participation
- Extraordinary or country-specific issues
- Synthesis analysis on general aspects
2. Common indicators: overview and progress

- Bacteriological quality of water
- Chemical quality of water
- Health issues related to water
- Access to drinking water and sanitation
- Performance and efficiency in water management
- Synthesis analysis on common indicators
3. Targets and target dates and assessment of progress

- i – xx: summary on best practices, progress, challenges reported to each of the topics defined by the report in “Part Three”

- Synthesis analysis on target setting and implementation
4. **Overall evaluation, lessons learned and conclusions**

- Key conclusions, achievements of Protocol implementation
- Lessons learned
- Future perspectives
Current status

Work in progress

Chapter 1 + 2 completed
Chapter 3 + 4 completed till July 15th

Finalise by MOP
Review of preliminary findings

3 – b - 12
Progress and stories of success

• The current third reporting cycle is adding new data to previous reported statistics → chance to provide illustrations

Samples for maps, graphs, figures: (which are commented in the report in detail)
Review of preliminary findings

Watsan 2

E. Coli.

National trends!
Health outcome, sample: Viral Hepatitis A

Viral Hepatitis A
Maximum of yearly outbreaks reported 2011 - 2015

[Map showing the maximum of yearly outbreaks for Viral Hepatitis A in Russia and neighboring countries, with a color scale indicating the severity of outbreaks from 0 to 91.]
Review of preliminary findings

A sample story of success: Azerbaijan

Azerbaijan
Access to drinking water and sanitation

Azerbaijan
Watsan 2, E. coli.

Azerbaijan
Watsan 3

IHPH – Institute for Hygiene and Public Health
GeoHealth Centre
Review of preliminary findings

A sample story of success: Azerbaijan
Progress and stories of success

- **Progress** and development visualized using tables, maps, graphs extended temporal reporting, but problematic data.

- Stories of **success** mostly **not** reported in spite of positive development reported in numeric values.
Thank you!
