Feedback to the Compliance Committee’s advice

1. Draft advice meets expectations from the Consultation Process.

2. The role of the education sector is well emphasized.

3. Target-setting process in Lithuania would benefit from the: (1) guide on the joint implementation of the Protocol and the 2030 Agenda; (2) Interpretive Note analyzing the relevant provision of the Protocol; (3) guide on costing and financing of individual and SSWS and sanitation systems.

4. A development of a joint reporting template for the Protocol and 2030 Agenda for Sustainable Development could be considered.
