REPORTING FORMAT ON
IMPLEMENTATION OF THE UNECE CONVENTION ON THE
TRANSBORDER EFFECTS OF INDUSTRIAL ACCIDENTS
9th Report (1 January 2016 – 31 December 2018)

Country:

**Person responsible for reporting** – please provide the contact details of the person who coordinated this report and who could be contacted by the WGI members in case of questions during the evaluation of the implementation report:

<table>
<thead>
<tr>
<th>Name:</th>
<th>Is the person a Focal Point for the Convention? ¹</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>□ YES □ NO [I-A]</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Authority</th>
<th>Is this authority designated as a Competent Authority in accordance with Art. 17 of the Convention?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>□ YES □ NO [I-B]</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>E-mail</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Phone number</th>
</tr>
</thead>
</table>

[I-C] **Cooperation** – please list the authorities at national, regional and local level involved in implementing the Convention, indicating their areas of responsibility and check if designated Competent Authority, in the table below ².

<table>
<thead>
<tr>
<th>Name of authority</th>
<th>Area of responsibility</th>
<th>Competent Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>□ YES □ NO □ n.a.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>□ YES □ NO □ n.a..</td>
</tr>
<tr>
<td></td>
<td></td>
<td>□ YES □ NO □ n.a.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>□ YES □ NO □ n.a.</td>
</tr>
</tbody>
</table>

Add rows if needed

[I-D] How were these authorities involved in the preparation of this report?

¹ Clarification on the questions is provided in the guidelines.
² The information provided in this table will be used by the secretariat to update the list of designated competent authorities on the webpage [https://www.unece.org/env/teia/contact.html](https://www.unece.org/env/teia/contact.html) accordingly.
a) Please provide here a full answer to the question

b) Has any progress been made since the last reporting round, including to address any challenges that were mentioned (if any)?

☐ YES ☐ NO

If you replied “No” under question [I-D] (b) please explain why:

Answers to all questions found below should not require more than 250-300 words except for Q.1 to which a comprehensive answer is estimated at 1,000-1,200 words.

POLICY FOR IMPLEMENTATION OF THE CONVENTION

1. Provide a general description\(^3\) of your country’s policy for the prevention of, preparedness for and response to industrial accidents, especially relating to the implementation of the Convention and explain how this policy is reflected in national legislation and followed up by authorities. Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 1,000-1,200 words. Should you indicate legislation, please use the table in the next page

   a) Please provide here a full answer to the question:

\(^3\) For more information concerning the level of details for the information, please refer to the guidelines for reporting
b) Table for reporting legislation and other acts to implement policies under the Convention (for definitions about the type of legislation, please see the guidelines)

<table>
<thead>
<tr>
<th>Legislation title/name</th>
<th>Type of legislation</th>
<th>Area covered by the legislation</th>
<th>Transboundary</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>International agreements</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Primary</td>
<td>Secondary</td>
<td>Guidance</td>
</tr>
</tbody>
</table>

If the legislation covers transboundary aspects, please briefly describe how it does so:

*Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words.*
2. Please explain:
Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words.

(a) To what extent does your policy deliver the intended results?

☐ It does not deliver any essential result
☐ It is partially implemented, there is still a lot to be done
☐ The main goal is achieved, but there are many shortcomings
☐ The results are satisfactory, there are few shortcomings in the system to be dealt with
☐ Completely delivers the intended results

Comments (please justify your answer here):

(b) Have there been any difficulties with implementing the Convention? Please provide here a full answer to the question:

(c) Are there changes being planned or considered to overcome the difficulties mentioned in 2 (b)?

Please provide here a full answer to the question:

3. How does your policy on the implementation of the Convention link to your national policies to implement the United Nations Sendai Framework for Disaster Risk Reduction 2015-2030, in particular in the area of technological hazards (i.e. industrial/chemical hazards)? Please describe below:

a) Are linkages between these policies established?

☐ YES ☐ NO

If yes, please describe how (e.g., cooperation among respective government departments, linkages between the Convention’s reporting (implementation reports, national self-assessments and action plans for Assistance and Cooperation Programme\(^4\) beneficiary countries) and national disaster risk reduction policies and

\(^4\) As per the Convention’s long-term strategy, adopted at the tenth meeting of the Conference of the
action plans established under the Sendai Framework, etc.). Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words.

IDENTIFICATION AND NOTIFICATION OF HAZARDOUS ACTIVITIES WITH THE POTENTIAL TO CAUSE TRANSBOUNDARY EFFECTS

4. Please describe briefly:

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Please explain how the mechanism is implemented in your country:</th>
</tr>
</thead>
<tbody>
<tr>
<td>(i) The mechanism / arrangements that you have been using for the identification of hazardous activities(^5)</td>
<td></td>
</tr>
<tr>
<td>(ii) The mechanism / arrangements that you have been using for the notification of hazardous activities</td>
<td></td>
</tr>
<tr>
<td>(iii) Information on the mechanism / arrangements in consultation with neighbouring countries</td>
<td></td>
</tr>
</tbody>
</table>

5. How many hazardous activities (i.e. those hazardous installations with the potential to cause transboundary effects) has your country identified\(^6\)? Please note that an overall comprehensive question (including past reporting rounds and the updates) is estimated at 250-300 words

Please provide here a full answer to the question:

6. Are there any changes in the number of hazardous activities identified compared to the previous report?

☐ YES ☐ NO

If yes, please indicate them and explain the difference:

---

Parties (4-6 December 2018), the “Assistance Programme” has been renamed the “Assistance and Cooperation Programme” (see ECE/CP.TEIA/38/Add.1)

\(^6\) “Hazardous activity” means any activity in which one or more hazardous substances are present or may be present in quantities at or in excess of the threshold quantities listed in Annex I to the Convention, and which is capable of causing transboundary effects;
7. In regard to the notification of neighbouring Parties/countries, please:

(a) Indicate below which Parties/countries have been notified about your country’s hazardous activities:

<table>
<thead>
<tr>
<th>Neighbouring Party/country</th>
<th>Number of hazardous activities notified</th>
<th>Inform whether your country held consultations</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>YES □ NO</td>
<td>□ YES □ NO</td>
</tr>
<tr>
<td></td>
<td></td>
<td>YES □ NO</td>
<td>□ YES □ NO</td>
</tr>
<tr>
<td></td>
<td></td>
<td>YES □ NO</td>
<td>□ YES □ NO</td>
</tr>
<tr>
<td></td>
<td></td>
<td>YES □ NO</td>
<td>□ YES □ NO</td>
</tr>
</tbody>
</table>

*Add rows if needed

(b) Consider making use of the template for the notification of hazardous activities in accordance with article 4 of and annex III to the UNECE Convention on the Transboundary Effects of Industrial Accidents, provided in the Annex to this report, to notify potentially affected countries of your hazardous activities and sharing this information on a voluntary basis along with this report.

8. Please indicate or describe:

(a) Please identify the progress stage of the indicator/mechanism for the identification of hazardous activities (refer to the Benchmarks for the implementation of the Convention on the Transboundary Effects of Industrial Accidents document (ECE/CP.TEIA/2010/6) and in particular the User-friendly version of the Benchmarks in the implementation of the Convention, Working Area7):

- [ ] Progress stage 1 – little awareness among competent authorities of the need to introduce the indicator or of the requirements for setting it up
- [ ] Progress stage 2 – initial discussions at the national level or among authorities, experts and operators are leading to the introduction of the indicator
- [ ] Progress stage 3 – a decision has been taken at the level of policymakers to introduce or update the indicator. Relevant stakeholders are identified
- [ ] Progress stage 4 – intensive and detailed discussions take place among stakeholders on the content of legislation and specific procedures
- [ ] Progress stage 5 – the indicator has been adopted and covers all the minimum elements, but it is only partly operational in practice (due to the lack of resources)
- [ ] Progress stage 6 – the indicator is fully operational and implemented by the competent authorities, the operators or both

---

7 The “Benchmarks” (both the official document and the user-friendly version) outline six “priority working areas” that relate to the Convention’s articles and annexes. For each working area, a set of indicators/mechanisms is provided. In order for countries to measure their progress in the implementation of the Convention against each indicator/mechanism, they assess their level of implementation against the six “progress stages” and select one of the criteria for each indicator/mechanism.
(b) Please identify the progress stage of the mechanism for notification with neighbouring countries (refer to the *User-friendly version of the Benchmarks in the implementation of the Convention, Working Area 2*):

- ☐ Progress stage 1 – little awareness among competent authorities of the need to introduce the indicator or of the requirements for setting it up
- ☐ Progress stage 2 – initial discussions at the national level or among authorities, experts and operators are leading to the introduction of the indicator
- ☐ Progress stage 3 – a decision has been taken at the level of policymakers to introduce or update the indicator. Relevant stakeholders are identified
- ☐ Progress stage 4 – intensive and detailed discussions take place among stakeholders on the content of legislation and specific procedures
- ☐ Progress stage 5 – the indicator has been adopted and covers all the minimum elements, but it is only partly operational in practice (due to the lack of resources)
- ☐ Progress stage 6 – the indicator is fully operational and implemented by the competent authorities, the operators or both

(c) Please identify the progress stage of the mechanism for consultation with neighbouring countries (refer to the *User-friendly version of the Benchmarks in the implementation of the Convention, Working Area 2*):

- ☐ Progress stage 1 – little awareness among competent authorities of the need to introduce the indicator or of the requirements for setting it up
- ☐ Progress stage 2 – initial discussions at the national level or among authorities, experts and operators are leading to the introduction of the indicator
- ☐ Progress stage 3 – a decision has been taken at the level of policymakers to introduce or update the indicator. Relevant stakeholders are identified
- ☐ Progress stage 4 – intensive and detailed discussions take place among stakeholders on the content of legislation and specific procedures
- ☐ Progress stage 5 – the indicator has been adopted and covers all the minimum elements, but it is only partly operational in practice (due to the lack of resources)
- ☐ Progress stage 6 – the indicator is fully operational and implemented by the competent authorities, the operators or both

(d) Please describe if there are any weaknesses recently identified in identification or notification of hazardous activities, e.g. through applying the indicators/mechanisms and criteria outlined in the Benchmarks for the implementation of the Convention (*ECE/CP.TEIA/2010/6, Annex II and III)*

and in the mechanism for consultation with neighbouring countries?
(e) Has your country taken any action since the last reporting round to improve the identification, notification of hazardous activities or consultation with neighbouring countries? Please justify your answers below.

☐ YES ☐ NO

or are such actions being planned or considered?

☐ YES ☐ NO

PREVENTION OF INDUSTRIAL ACCIDENTS

9. Further to the general description provided under Q.1 please explain briefly the main preventive measures taken by operators and authorities during all phases of enterprise (Convention on the Transboundary Effects of Industrial Accidents, Article 6 and Appendix IV).

<table>
<thead>
<tr>
<th>Stakeholders</th>
<th>Preventive Measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operator</td>
<td></td>
</tr>
<tr>
<td>Competent Authority</td>
<td></td>
</tr>
<tr>
<td>Joint Efforts</td>
<td></td>
</tr>
</tbody>
</table>

10. Please indicate or describe the following:

(a) To what extent do your country’s preventive measures deliver the intended results?

☐ They do not deliver any essential result
☐ The preventive measures are partially implemented, there is still a lot to be done
☐ The main goal is achieved, but there are many shortcomings
☐ The results are satisfactory, there are few shortcomings in the system to be dealt with
☐ Completely deliver the intended results

Comments (please justify your answer here):

(b) Identify your country’s progress stage in prevention (refer to the User-friendly version of the Benchmarks in the implementation of the Convention, Working Area
3):

☐ Progress stage 1 – little awareness among competent authorities of the need to introduce the indicator or of the requirements for setting it up
☐ Progress stage 2 – initial discussions at the national level or among authorities, experts and operators are leading to the introduction of the indicator
☐ Progress stage 3 – a decision has been taken at the level of policymakers to introduce or update the indicator. Relevant stakeholders are identified
☐ Progress stage 4 – intensive and detailed discussions take place among stakeholders on the content of legislation and specific procedures
☐ Progress stage 5 – the indicator has been adopted and covers all the minimum elements, but it is only partly operational in practice (due to the lack of resources)
☐ Progress stage 6 – the indicator is fully operational and implemented by the competent authorities, the operators or both

(c) Any weaknesses recently identified in prevention, e.g. through applying the mechanisms outlined in the Benchmarks for the implementation of the Convention (ECE/CP.TEIA/2010/6, Annex IV) and criteria?

Yes NO

Comments (please explain which steps have been taken or explain why no progress has been made)

Or does it plan to take any steps to improve prevention in the near future?

☐ YES ☐ NO

Comments (please explain which steps are envisaged or explain why not)

(e) Please list information on good practices in prevention here, if possible with references or/and web links preferably in English:

EMERGENCY PREPAREDNESS AND RESPONSE

11. Do Internal (On-site) and External (Off-site) contingency plans exist for all hazardous activities identified, in accordance with Art. 8 and Annex VII of the Convention? Give separately answers for Internal (On-site) and External (Off-
site) contingency plans.

a) Internal (On-site) contingency plans □ YES □ NO □ Partly

b) External (Off-site) contingency plans □ YES □ NO □ Partly

If no or partly, please describe why?
Please use as an answer the criteria contained in the Benchmarks for the implementation of the Convention (ECE/CP.TEIA/2010/6, Pages 5 and 12 and Annex V, progress stages 1-6)

12. How do these plans take account of the results of the hazard/risk assessment?
Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words.
Please provide here a full answer to the question:

13. Is the preparation of the plans coordinated between operators and authorities? If so, please explain how. If no, please explain why.
Please use as an answer the criteria contained in the Benchmarks for the implementation of the Convention (ECE/CP.TEIA/2010/6, Pages 5 and 12 and Annex V, progress stages 1-6)

14. Are the plans tested, reviewed and updated as necessary? Please explain and give separately answers for Internal (On-site) and External (Off-site) contingency plans.

a) Internal (On-site) contingency plans □ YES □ NO □ Partly

b) External (Off-site) contingency plans □ YES □ NO □ Partly

If, no or partly please describe why? Please use as an answer the criteria contained in the Benchmarks for the implementation of the Convention (ECE/CP.TEIA/2010/6, Pages 5 and 12 and Annex V, progress stages 1-6)

15. Is testing, reviewing and updating done in cooperation with neighbouring countries? Explain in what way the cooperation occurs, or comment on why there is no or only partly cooperation with neighboring countries. Please use as an answer the criteria contained in the Benchmarks for the implementation of the Convention (ECE/CP.TEIA/2010/6, Pages 5 and 12 and Annex V, progress stages 1-6)

□ YES □ NO □ Partly
Comments

16. Please indicate or describe:

(a) How successful are your country’s emergency preparedness measures in meeting the aims of the Convention? Please tick and describe the progress stage below for each indicator in the User-friendly version of the Benchmarks in the implementation of the Convention, Working area 4.

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Definition</th>
<th>Progress stage</th>
</tr>
</thead>
<tbody>
<tr>
<td>(i) Does your country have a mechanism for giving the responsibility for emergency preparedness to operators of hazardous activities?</td>
<td>Set of procedures, implementation rules and actions ensuring that hazardous activities operators prepare, coordinate, test, review and revise on-site emergency plans</td>
<td>Progress stage 1</td>
</tr>
<tr>
<td>(ii) Does your country have a mechanism for giving the responsibility for emergency preparedness to competent authorities?</td>
<td>Set of procedures, implementation rules and actions ensuring that the competent authorities prepare, coordinate, test, review and revise off-site emergency plans and sets of procedures giving the competent authorities the right to impose responsibility on operators of hazardous activities</td>
<td>Progress stage 1</td>
</tr>
<tr>
<td>(iii) Does your country have a mechanism for transboundary emergency plans?</td>
<td>Set of procedures, implementation rules and actions ensuring that the competent authorities of the concerned Parties cooperate with each other and coordinate emergency plans to make them compatible</td>
<td>Progress stage 1</td>
</tr>
</tbody>
</table>

Please comment on the progress stages per indicator/mechanism and indicate any challenges that you may experience per indicator/mechanism:

(b) How successful are your country’s contingency plans to respond to accidents within your own country, as well as contingency plans to respond to accidents in neighbouring countries? Please describe progress stage for indicator 1 in User-friendly version of the Benchmarks in the implementation of the Convention, Working area 5.
<table>
<thead>
<tr>
<th>Indicator</th>
<th>Definition</th>
<th>Progress stage</th>
</tr>
</thead>
<tbody>
<tr>
<td>(i) Does your country have a mechanism for the prompt recognition of industrial accidents?</td>
<td>Set of procedures, implementation rules and actions ensuring that the competent authorities activate the relevant measures promptly in the event of an accident or of an imminent threat of an accident.</td>
<td>☐ Progress stage 1 ☐ Progress stage 2 ☐ Progress stage 3 ☐ Progress stage 4 ☐ Progress stage 5 ☐ Progress stage 6</td>
</tr>
</tbody>
</table>

Please comment on the progress stage and indicate any challenges that you may experience.

(c) Any weaknesses recently identified in your country’s emergency preparedness, and response, e.g. through applying the indicators and criteria contained in the Benchmarks for the implementation of the Convention (*ECE/CP.TEIA/2010/6, Annex V* and *Annex VI*)? Please provide here a full answer to the question:

(d) Whether your country has started to take any steps in the current reporting period to improve emergency preparedness and response or whether it is planning to do so in the near future.

17. Do guidance documents concerning contingency planning to support national or regional authorities or operators exist\(^8\)? Please use as an answer the criteria contained in the Benchmarks for the implementation of the Convention (*ECE/CP.TEIA/2010/6, Page 5* and *Annex V*, progress stages 1-6)

If yes, please insert web-links if they are available online

Comments

18. Is your country making use of the Industrial Accident Notification (IAN) System\(^9\)?

---

\(^8\) Please note that this question also refers to hazardous installations not falling within the scope of the Convention.

19. Has your country appointed a point of contact responsible for utilizing the IAN system? Is the point of contact made known (including their contact details) to all relevant stakeholders (e.g. authorities, emergency services, operators)? Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words. Please provide here a full answer to the question.

20. Does your country use (an)other accident notification system(s)? If yes, please describe or provide a weblink to this system(s):

Comments (please specify which, if any)

**MUTUAL ASSISTANCE**

21. Has your country identified an authority that would act as point of contact for mutual assistance (as of Article 17(2) and Article 17(5) of the Convention)?

Comments (if no, please explain why)

(a) Please provide information on the point of contact responsible to requesting and/or providing assistance in the event of an accident. Please provide here a full answer to the question:

---

10 Accident notification system is to be understood as a system that authorities can use to inform other countries that an accident has occurred in their territory. The notification system referred to in this report is something to be used during an emergency. Please do not provide information about systems used to report on past accidents or lessons learned.
(b) Please provide general information on the procedures followed for requesting/and or providing assistance.

22. Has your country established bilateral or multilateral agreements for mutual assistance? *Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words*

☐ YES ☐ NO

Please provide here a full answer to the question:

---

**SCIENTIFIC AND TECHNOLOGICAL COOPERATION AND EXCHANGE OF INFORMATION**

23. Has your country set up any bilateral/multilateral activities/programmes to exchange information, experiences and/or technology in order to strengthen cooperation among Parties under the Convention and other (neighbouring) countries? If so, please explain. *Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words*

☐ YES ☐ NO

Please provide here a full answer to the question (if you selected ‘No’ above, please explain why):

---

11 Please note that this question refers to examples of good practices for industrial accident prevention within and between countries, independently from the current existence of installations capable of causing transboundary effects in the event of an accident.
24. Has your country's national industrial safety authority(ies) enhanced their institutional cooperation with other departments/organizations (at the national or local level) that are responsible for managing aspects related to disaster risk reduction?

☐ YES ☐ NO

Please describe the efforts taken to enhance these linkages. Please note that an overall comprehensive reply is estimated at 250-300 words

INFORMATION TO AND PARTICIPATION OF THE PUBLIC

25. What opportunities does the public in your country have to participate in establishing or implementing\(^{12}\) Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words

(a) preventive measures

Please provide here a full answer to the question:

(b) preparedness measures

Please provide here a full answer to the question:

26. How do you inform the public in your country of these opportunities? Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words

Please provide here a full answer to the question:

---

\(^{12}\) Please note that in replying to this question you should consider whether such possibilities exist in the country independently on whether the country currently has hazardous activities capable of causing transboundary effects in the event of an accident.
27. Does the public in your country participate? Please explain how. *Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words*

☐ YES ☐ NO

Please provide here a full answer to the question (if you answered ‘No’, please explain why):

28. Are the public in neighbouring countries/Parties (who may be affected by hazardous activities) able to participate in the same way as the public in your own country?

☐ YES ☐ NO

Please provide here a full answer to the question (if you answered ‘No’, please explain why):

29. Do natural or legal persons capable of being affected by an industrial accident in the territory of neighbouring countries/Parties have access to the relevant administrative and judicial procedures in your country?

Administrative: ☐ YES ☐ NO

Judicial: ☐ YES ☐ NO

Please provide here a full answer to the question:

30. Please indicate or describe:

*Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words*

(a) How successful has your country been in developing public participation?

Please provide here a full answer to the question:
(b) Any weaknesses recently identified in your country’s system for public participation, e.g. through applying indicators and criteria contained in the Benchmarks for the implementation of the Convention (ECE/CP.TEIA/2010/6, Annex VII)?

Please provide here a full answer to the question:

(c) Whether your country has started to take any steps in the current reporting period to improve public participation or whether is planning to do so in the near future.

Please provide here a full answer to the question:

**DECISION-MAKING ON SITING AND LAND-USE PLANNING**

31. Has your country established policies on the siting of hazardous activities and on significant modifications to existing hazardous activities, in accordance with Art. 7 of the Convention? If so, please explain. Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words

Please provide here a full answer to the question:

32. How do these policies take transboundary issues into account? Please report on any bilateral activities on siting issues with potentially affected neighbouring countries. Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words

Please provide here a full answer to the question:

33. Please explain or describe: Please note that an overall comprehensive reply (including past reporting rounds and the updates) is estimated at 250-300 words.

(a) To what extent does your siting policy achieve the intended results?
(b) Any weaknesses recently identified in your country’s siting policy?

(c) Whether your country has started to take any steps in the current reporting period to improve siting policy or whether is planning to do so in the near future?

34. How are your country's industrial safety procedures coordinated with your country's land-use planning procedures (e.g. a requirement within your national and/or local planning procedures to conduct a risk assessment)? Please note that an overall comprehensive reply is estimated at 250-300 words.

35. Under national and local legislation, are your country’s industrial safety experts and land use planners formally required to consult and cooperate with each other (for example on decisions on land use plans, policies, or siting decisions)?

☐ YES ☐ NO

Please briefly describe how industrial safety experts and planners cooperate at the national and local levels, and which governance arrangements have been implemented to foster such cooperation (e.g. integration or formalized cooperation among different departments). Please note that an overall comprehensive reply is estimated at 250-300 words.

36. (a) In implementing your obligations under the Convention on the Transboundary Effects of Industrial Accidents, do you also consider implementing related legal obligations that your country may have? For example, related legal obligations under the:

- UNECE Convention on Environmental Impact Assessment in a Transboundary Context (Espoo Convention)
- UNECE Protocol on Strategic Environmental Assessment (Protocol on SEA)
- None of the above

You may select more than one box

(b) Please state here if you are or are not a Party to the Espoo Convention and the Protocol on SEA, and provide comments on whether or not you consider their legal obligations when implementing the Convention.

Please note that an overall comprehensive reply is estimated at 250-300 words.
REPORTING ON PAST INDUSTRIAL ACCIDENTS

37. (a) Have there been any accidents with transboundary effects or capable of causing transboundary effects during this reporting period?

☐ YES ☐ NO

<table>

---

1  Article 1 of the Convention defines “hazardous activity” as “any activity in which one or more hazardous substances are present or may be present in quantities at or in excess of the threshold quantities listed in Annex I hereto, and which is capable of causing transboundary effects” and “operator” as “any natural or legal person, including public authorities, in charge of an activity, e.g. supervising, planning to carry out or carrying out an activity”.

2  Location criteria for the identification of possible transboundary effects of industrial accidents are provided in the Guidelines to facilitate the identification of hazardous activities for the purposes of the Convention, adopted through decision 2000/3 (ECE/CP.TEIA/2, annex IV) and amended by decision 2018/1 (ECE/CP.TEIA/38/Add.1, available at: https://www.unece.org/fileadmin/DAM/env/documents/2018/TEIA/CoP_10/AC_ECE_CP.TEIA.38.Add.1.pdf). The criteria should be applied without prejudice to article 5 of the Convention on voluntary extension, which stipulates that “[…] Where the Parties concerned so agree, this Convention, or any part thereof, shall apply to the activity in question as if it were a hazardous activity”.

3  Article 1 of the Convention defines “effects” as “any direct or indirect, immediate or delayed adverse consequences caused by an industrial accident on, inter alia:

(i) Human beings, flora and fauna;
(ii) Soil, water, air and landscape;
(iii) The interaction between the factors in (i) and (ii);
(iv) Material assets and cultural heritage, including historical monuments” and “transboundary effects” as “serious effects within the jurisdiction of a Party as a result of an industrial accident occurring within the jurisdiction of another Party”.
2. Please reply to the sender within [1/2/3] months of receipt of this notification, acknowledging its receipt and indicating whether you intend to enter into consultation pursuant to paragraph 4 of annex III to the Convention.
