L.N. 114 of 2007

DEVELOPMENT PLANNING ACT
(CAP. 356)

ENVIRONMENT PROTECTION ACT
(CAP. 435)

Environmental Impact Assessment Regulations, 2007
Arrangement of Regulations

PART I
GENERAL PROVISIONS

1. Citation and entry into force ......................................................5
2. Interpretation .............................................................................5

PART II
TYPES OF ENVIRONMENTAL IMPACT ASSESSMENT

3. Environmental impact assessment ...........................................15
4. Refusal of development permission where no environmental impact assessment is prepared .................18
5. Project description statement ..................................................18
6. Scoping Statement & Baseline studies .......................................20
7. Screening ..............................................................................21
8. Informing departments and agencies of Government of the need for an environmental impact assessment ....................................................22
9. Managing the preparation of an environmental impact assessment .........................................................23
PART III
FULL ENVIRONMENTAL IMPACT ASSESSMENT
(requiring an Environmental Impact Statement)

10. Setting terms of reference for an environmental impact statement .................................................................23

11. Commissioning an environmental impact statement ........24

12. Functions of an environmental impact assessment co-ordinator ........................................................................24

13. Procedures to be followed in the preparation of a full environmental impact assessment .........................................25

14. Description of the proposed development project ..............25

15. Description of existing environment .................................26

16. Assessment of effects of the development ........................27

17. Mitigation measures ..........................................................28

18. Monitoring requirements ....................................................28

19. Modification of the specific terms of reference set for each environmental impact assessment by the Authority .................................................................28

20. Draft environmental impact statement - contents..............28

21. Consultation stage .............................................................30

22. Review of the draft Environmental Impact Statement ........31

23. Revision of the draft Environmental Impact Statement ......32

24. Certification of the Environmental Impact Statement ......32

25. Public hearing ...............................................................34

26. Submission of the final Environmental Impact Statement to the Authority .........................................................35

27. Sale of final Environmental Impact Statements .................36
28. List of consultants .............................................................36
29. Conflict of interest ............................................................37
30. Incorporation by reference ...............................................37
31. Identification of other permits the applicant might need if development permission is granted ...............38
32. Public reference room .......................................................38

PART IV
LIMITED ENVIRONMENTAL IMPACT ASSESSMENT
(requiring an Environmental Planning Statement)
33. Setting the terms of reference for an environmental planning statement ..................................................38

PART V
TRANSBOUNDARY EFFECTS
34. Procedure to be followed when a project is likely to have transboundary impacts ............................................39

PART VI
REGISTER OF CONSULTANTS and REVIEWS
35. Register of Environmental Impact Assessment Consultants .........................................................................41
36. Registration and Review Board ........................................42
37. Registration .......................................................................43
38. Certificate of registration ..................................................44
39. Contents of certificate .......................................................44
40. Cancellation of certificate ..................................................45
41. Offences ............................................................................45
42. Interpretation of Part VI of these regulations .......................46
PART VII
ENFORCEMENT

43. Implementing the decision to grant development permission ...........................................46

PART VIII
MISCELLANEOUS PROVISIONS

44. Miscellaneous provisions .................................................48
45. Review ..............................................................................49

PART IX
TRANSITORY PROVISIONS

46. Transitory provisions ........................................................50
47. Repeal and saving ...............................................................51
IN virtue of the powers conferred by article 60 of the Development Planning Act and articles 9 and 10 of the Environment Protection Act the Minister for Rural Affairs and the Environment, on the recommendation of the Malta Environment and Planning Authority, has made the following regulations:

PART I
GENERAL PROVISIONS

1. (1) The title of these regulations is the Environmental Impact Assessment Regulations, 2007.

   (2) These regulations shall come into force on the date of publication of these regulations, other than Part VI, which shall come into force on such date as the Minister responsible for the environment may by notice in the Gazette appoint, and different dates may be so appointed for different provisions and different purposes of these regulations.

2. (1) In these regulations, unless the context otherwise requires:

   “aquifer” means all underground freshwater-bearing strata capable of yielding water, and includes groundwater reservoirs, groundwater catchment areas, the waters in geological rock formations, including fissures and fractures, and the structures containing deep fossil waters;

   “the Act” means the Development Planning Act;

   “affecting” means will or may have an effect on;
“applicant” means any applicant seeking development permission and includes a department and a Government entity;

“archaeology” means the study of ancient cultures by the excavation and analysis of physical remains;

“the Authority” means the Malta Environment and Planning Authority established under article 3 of the Act and includes any body or other person acting on its behalf under powers delegated by the Authority under the Act;

“baseline studies” means technical studies, prepared by consultants, that describe in detail the existing environmental, social and economic characteristics of the area being assessed, and how these might develop without intervention;

“certificate” means a certificate of registration issued according to the provisions of sub-regulation (4) of regulation 35 of these regulations;

“Committee” means the Inter-departmental Planning Committee established under subarticle (1) of article 17D of the Act;

“consultant” has the same meaning as is assigned to an environmental impact assessment consultant in sub-regulation (3) of regulation 35 of these regulations;

“consultees” means departments and agencies of Government, local councils or any other body which the Director of Environment Protection might request the consultants to consult;

“contributors” means technical experts that give minimal input to the environmental impact assessment process but do not in any way assess the impacts of the project;

“co-ordinator” means an environmental impact assessment consultant who possesses the appropriate qualifications and has knowledge and training in environmental impact assessment techniques and methods and who is co-ordinating the preparation of an environmental impact assessment, preparing the coordinated assessment and writing the relative environmental impact statement or environmental planning statement, as the case may be;

“conservation” means the management or control of human use of a natural resource or the environment in such a manner that
it may yield the greatest sustainable benefit to present generations whilst maintaining its potential to meet the needs and aspirations of future generations; and includes preservation, maintenance, sustainable utilisation, restoration, rehabilitation, reinstatement and enhancement of a natural resource or the environment;

“council” has the same meaning as is assigned to it by article 2 of the Local Councils Act;

“cultural heritage” means:

(a) monuments - being architectural works, works of monumental sculpture and painting, elements or structures of an archaeological nature, inscriptions, cave dwellings and combinations of features;

(b) groups of buildings - being groups of separate or connected buildings or the spaces between them, singular buildings or their immediate surroundings which are to be conserved because of their architectural character, their homogeneity or their place in the landscape;

(c) sites - being works of man or the combined works of nature and of man, and areas including archaeological sites which are of value from the point of view of history, art, science, culture, aesthetics, ethnography, anthropology and includes also their surroundings;

“cumulative impact” means the combined effect on the environment of two or more projects, or parts of projects, including synergistic effects;

“department of Government” means any department or ministry and includes a Minister, Parliamentary Secretary, and any public officer or other person acting on his behalf;

“developer” means that person who applies for development permission for a public or private project;

“development” has the same meaning assigned to it by subarticle (2) of article 30 of the Act;

“development permission” means a permission to carry out development granted by the Authority either on an application in that behalf or in a development order;
“development order” means an order made under and for the purpose of article 31 of the Act;

“Director of Planning” means the Director of Planning appointed under article 6 of the Act and includes any person acting on his behalf or under his authority;

“Director of Environment Protection” means the Director of the Environment Protection Directorate of the Malta Environment and Planning Authority and includes any person or body of persons acting on his behalf or under his authority;

“ecology” means the study of the interactions of living organisms with other individuals of their own or of different species, and with their environment;

“ecosystem” means a dynamic complex of plant, animal and micro-organism communities and their non-living environment interacting as a functional unit;

“effects” include:

(a) direct effects, which are caused by an action;

(b) indirect effects, which are caused by an action or actions and are later in time or further removed in distance, but are still reasonably foreseeable; and includes growth-regulating effects and other effects related to induced changes in the pattern of land use, population density or growth rate, and related effects on air and water and other natural systems including ecosystems;

(c) ecological effects (including the effects on natural resources and on the components, structures, and functioning of affected ecosystems);

(d) aesthetic, historic and cultural effects, whether direct, indirect, or cumulative;

(e) socio-economic effects (including impacts on incomes, employment, foreign exchange, recreational and educational opportunities, social structure, culture, health, safety, transport and general amenity), whether positive or negative, direct or indirect through the generation of environmental impacts;
(f) those effects resulting from actions which may have both beneficial and detrimental effects, even if on balance the consultants believe that the effect will be beneficial;

(g) secondary, cumulative, short, medium and long term, permanent, temporary, positive and negative effects;

“environment” includes any one of, more of, or a combination of the following:

(a) air, land and water;

(b) plant and animal life;

(c) social, economic and cultural conditions;

(d) any man-made development;

(e) any solid, liquid, gases, odour, heat, light, sound, vibration and radiation;

(f) any natural resource; and

(g) any part or combination of the foregoing and the interrelationship between any two or more of them;

“environmental impact assessment” means the process of identifying, predicting, evaluating and mitigating the biophysical, social, economic and other relevant effects of proposed projects and physical activities prior to major decisions and commitments being made;

“environmental impact statement” means the result of a full environmental impact assessment study presented as a report which describes a development listed in Category I of Schedule IA to these regulations and its effects on the environment indicating how these effects have been taken into account;

“environmental interference” means any impairment of living resources, ecosystems, human well-being (including health, safety, cultural, commercial, transportation, recreational and educational activity), material property, amenities or other legitimate uses of a natural resource or the environment, caused, directly or indirectly, by man through polluting substances, ionising radiation, noise, explosions, vibration or other forms of energy, or movement of matter, flora, fauna, diseases, flooding, smothering or other similar
means and includes the suppression of all those factors sustaining the environment;

“environmental planning statement” means the result of a limited environmental impact assessment study presented as a report which describes a development listed in Category II of Schedule IA to these regulations and its effects on the environment indicating how these effects have been taken into account;

“environmental survey reports” means the original technical studies prepared by the consultants for particular aspects of the environmental impact assessment (for example, ecology, emissions to air, archaeology, etc.);

“extension” means any addition to a development and may include increase in area, height, volume or capacity;

“fauna” means all types of animals;

“flora” means all types of vegetation;

“geology” means the science of the earth’s crust, strata and origin of its rocks;

“Government entity” means a body corporate established by law, a Government entity, and a company or other body in which the Government or a body corporate or entity as aforesaid, or a combination thereof, has a controlling interest or which is a subsidiary of such a company; but it does not include the Authority;

“habitat” means that set of locations that satisfy the resource requirements of a species and where it can fulfil its ecological role;

“hazardous waste” has the same meaning as is assigned to it in the Environment Protection Act or under regulations made under the said Act or under any other law or regulations which may from time to time replace the said Act;

“human environment” includes the natural and physical environment and the relationship of people (including employees, neighbours, consumers, and tourists) with that environment;

“identified stakeholders” means departments and agencies of Government, local councils, non-government organisations or any
other body identified by the Authority, as having an interest in the project;

“impacts” has the same meaning as is assigned to the word “effects” in these regulations;

“Junior Impact Assessor” means an environmental impact assessment consultant who possesses the required qualifications and experience in a particular environmental discipline but lacks experience and knowledge in environmental impact assessment techniques and methods;

“landscape” means the characteristics, patterns, forms and structures of the environment, including the traits, patterns, forms and structures of a specific geographic area, its biological composition, its physical environment, its geology, its geomorphology, its palaeontology, its lithostratigraphy and its anthropogenic and social patterns;

“locality” has the same meaning as is assigned to it by article 2 of the Local Councils Act;

“the Minister” refers to the Minister responsible for the environment;

“mitigation” includes:

(a) avoiding the impact altogether by not taking a certain action or part of an action;

(b) minimizing negative impacts by limiting the degree or magnitude of the action and its implementation;

(c) maximizing the positive impacts of developments;

(d) rectifying the impact by repairing, rehabilitating, or restoring the affected environment;

(e) reducing or eliminating the impact over time by conservation operations during the life of the action;

(f) compensating for the impact by replacing or providing substitute resources or environments;

“natural environment” means:
(a) natural features consisting of physical and biological formations or groups of such formations;

(b) geological and physiographical, geomorphological, lithostratigraphical, palaeontological and hydrological formations and precisely delineated areas which constitute the habitat of threatened species of flora and fauna;

(c) natural sites or precisely delineated areas of value from the point of view of science, scenic value, conservation or natural beauty;

“pollution” means the introduction by man, directly or indirectly, of any substance or energy into the environment resulting in deleterious effects of such a nature as to endanger human health, harm living resources, ecosystems and material property, and impair amenities or interfere with other legitimate uses of the environment;

“precautionary principle” means the adoption of, or taking of preventative measures when there are reasonable grounds for concern that threats of serious or irreversible damage to the environment might occur even if there is a lack of scientific certainty; provided that such uncertainty shall not be used as a reason for postponing measures to avoid, reduce, prevent, anticipate or control such threats or damage to the environment;

“project” means the proposed development for which a development permission is being sought;

“project description statement” means a description of the site and the proposed development in sufficient detail to identify the likely effects on the environment and their acceptability under specific policies contained in the Structure Plan and other development plans and in planning policies;

“protected sites and areas” means:

(a) any property scheduled under the provisions of article 46 of the Act;

(b) any property which, though not being scheduled property under the provisions of articles 46 and 48 of the Act, is protected under the provisions of article 47 of the Act by an emergency conservation order;
(c) any tree scheduled under the provisions of article 48 of the Act;

(d) any area, building, site or archaeological remains protected under the provisions of the Environment Protection Act, or any other law which may from time to time replace it;

(e) cultural heritage as defined by article 2 of the Cultural Heritage Act, which is protected according to the provisions of that Act or of any other law which may from time to time replace it;

(f) any urban conservation area designated under the Structure Plan and any other development plan;

(g) any rural conservation area designated under the Structure Plan and any other development plan;

(h) any village core area designated under the Temporary Provisions Schemes; and

(i) any other objects, areas or sites which are protected under the provisions of any other law;

“public” means one or more natural or legal persons and, in accordance with national legislation or practice, their associations, organisations or groups;

“the public concerned” means the public affected or likely to be affected by, or having an interest in, the environmental decision-making procedures referred to in these regulations; for the purposes of this definition, non-governmental organisations promoting environmental protection and meeting any requirements under national law shall be deemed to have an interest:

Provided that where the term “public” appears in these regulations it shall include “the public concerned”;

“public hearing” means a public consultation exercise, which may include, but is not limited to: audio-visual presentations, public exhibitions, meetings with identified stakeholders, question and answer sessions, or combinations thereof, all of which shall be open to the public and chaired / supervised by the Director of Environment Protection.
“Register” means the Register of Environmental Impact Assessment Consultants established under sub-regulation (1) of regulation 35 of these regulations;

“Registration and Review Board” means the Registration Board established under sub-regulation (1) of regulation 36 of these regulations;

“scoping” means the process of identifying key issues, significant actions, alternatives and impacts to be considered in an environmental impact assessment;

“screening” means the decision of whether or not a proposal should be subject to an environmental impact assessment;

“Senior Impact Assessor” means an environmental impact assessment consultant who possesses the required qualifications in a particular environmental discipline and knowledge of and experience in environmental impact assessment techniques and methods;

“significantly” requires considerations of both context and intensity:

(a) context - this means that the significance of an action shall be analysed in several contexts such as society as a whole, the surroundings of the project, the affected interests, the site of the project and the distribution of relevant features of archaeological, ecological, scientific, hydrological, geological and scenic value;

(b) intensity - this means the severity of impact and the following elements shall be considered in evaluating intensity:

(i) impacts that may be beneficial, adverse or neutral;

(ii) the degree to which the project affects public health or safety;

(iii) unique or otherwise rare or valuable characteristics of the geographic area which affect its relationship with the natural environment and the cultural heritage;
(iv) the degree to which the project affects the quality of the human environment;

(v) the degree to which the possible effects on the human environment are uncertain or involve unique or unknown risks;

(vi) the degree to which the action may establish a precedent for future actions with potentially significant effects or represents a decision in principle about a future consideration;

(vii) whether the action is related to other actions with individually insignificant but cumulatively significant impacts;

(viii) whether the action threatens a violation of any law or policy-making provision for the protection of the environment;

(ix) whether the action is permanent or reversible;

“treaty” has the same meaning as is assigned to it in article 2 of the Ratification of Treaties Act;

“use of a natural resource” means any human conduct which, directly or indirectly, takes advantage of the benefits of a natural resource in the form of preservation, exploitation and possible depletion, consumption or otherwise.

(2) The definition of any word or expression in sub-regulation (1) of this regulation shall extend to all grammatical variations and related expressions of the word or expression so defined.

(3) Any word or expression used in these regulations which is defined by article 2 of the Act shall have the same meaning as is assigned to such word or expression by that article of the Act.

PART II

TYPES OF ENVIRONMENTAL IMPACT ASSESSMENT

3. (1) The Malta Environment and Planning Authority shall be the responsible competent authority for performing the duties as set out in these regulations.
(2) An environmental impact assessment is intended to identify, describe and assess in an appropriate manner, in the light of each individual proposal for development and in accordance with the provisions of these regulations, the direct and indirect effects of that development on the following factors:

(a) fauna and flora, and the living components of the environment;

(b) soil, water, air, climate, the landscape, and the non-living components of the environment;

(c) the interaction between the factors mentioned in paragraphs (a) and (b) of this sub-regulation;

(d) material assets and the cultural heritage; and

(e) human beings and their interactions with the factors mentioned in paragraphs (a) to (d) of this sub-regulation.

(3) An environmental impact assessment, depending on the type of the development, shall take one of the following forms:

(a) either a full environmental impact assessment; or

(b) a limited environmental impact assessment.

(4) Any development listed under Category I of Schedule IA to these regulations shall require a full environmental impact assessment by the preparation of an environmental impact statement, unless the Authority refuses permission as stated in sub-regulation (2) of regulation 4 of these regulations.

(5) Subject to sub-regulation (6) of this regulation any development proposal which is submitted and falling within the scope of the threshold indicated in the schedule listed under Category II of Schedule IA to these regulations, shall require a limited environmental impact assessment by the preparation of an environmental planning statement, unless the Authority refuses permission as stated in sub-regulation (2) of regulation 4 of these regulations;

Provided that where a planning application for a development listed under Category II of Schedule IA of these regulations is submitted for which no threshold is indicated in this schedule, the Director of Environment Protection shall decide whether the development would or would not be likely to have significant effects on the environment.
having regard to the criteria set out in Schedule IB, on the basis of which an environmental planning statement may be required.

(6) The Director of Environment Protection, acting of his own accord or on the advice of the Director of Planning, may require the applicant, in the case of any application for development permission concerning a development which is not included in Category I of Schedule IA to these regulations (even though such development may be included under Category II of Schedule IA to these regulations) to prepare a full environmental impact statement if he is of the opinion that significant impacts are likely to occur having regard to the criteria set out in Schedule IB and a normal planning application or an environmental planning statement do not provide an adequate basis for evaluating such development.

(7) Notwithstanding the provisions of sub-regulations (4), (5) and (6) of this regulation and subject to sub-regulation (8) of this regulation, the Director of Environment Protection acting on his own accord or on the advice of the Director of Planning, may require the applicant, in the case of any application for a development permission concerning a development which is not included in Categories I or II of Schedule IA to these regulations, to prepare an environmental impact statement or an environmental planning statement if the Director of Environment Protection is of the opinion that significant impacts are likely to occur due to the characteristics and location of the proposal having regard to the criteria set out in Schedule IB and a normal development permission application would not provide an adequate basis for evaluating such development.

(8) Notwithstanding the provisions of sub-regulation (5) of this regulation, following a request made by the applicant in writing with a detailed justification as to why the project is unlikely to have significant environmental impacts the Director of Environment Protection may exempt an applicant from preparing a limited environmental impact assessment notwithstanding that the development is one which is listed in Category II of Schedule IA to these regulations if he is of the opinion that the project description statement presented under the provisions of sub-regulation (1) of regulation 5 of these regulations, has considered environmental issues in a sufficient manner such that the preparation of a limited environmental impact assessment would not add any new information and the Authority has all the necessary information to determine the application provided that it is unlikely that the project will have significant environmental effects taking into account the information provided in the project description statement in terms of the criteria listed in Schedule IB. In such a case, a detailed justification as to why a limited environmental impact
assessment was not requested shall be provided and shall be published in the Government Gazette.

(9) Notwithstanding the provisions of sub-regulations (6), (7) and (8) of this regulation, the Environmental Impact Assessment procedure may also be undertaken for proposed development projects even prior to the submission of a formal development permission application, so long as the development proposal is, prima facie, acceptable in principle by the Director of Planning. In this case, all the provisions in these regulations for the preparation of an environmental impact statement or environmental planning statement, shall mutatis mutandis apply.

4. (1) Subject to sub-regulation (8) of regulation 3 of these regulations, no development permission shall be granted by the Authority authorising any development listed in Schedule IA to these regulations if no environmental impact assessment has been submitted to the Authority according to the provisions of these regulations.

(2) Subject to sub-regulation (8) of regulation 3 of these regulations, the Authority shall refuse development permission in the case of a development that would otherwise require an environmental impact assessment, even though no environmental impact assessment has been submitted to the Authority according to the provisions of these regulations:

(a) where the development is clearly against any approved development plan or planning policy; or

(b) where the development is likely to compromise the preparation of a development plan in the foreseeable future; or

(c) where the effects of a development project are clearly unacceptable; or

(d) if the project description statement indicates that the proposed development will have unacceptable environmental impacts.

5. (1) Without prejudice to the provisions of regulation 3 of the Development Permission (Method of Application) Regulations, 1992 and in addition to the requirements mentioned in sub-regulation (2) of that regulation, an application for development permission concerning any development that may require to be subjected to an environmental impact assessment under regulation 3 to these regulations shall be accompanied by a project description statement.
(2) If an application for development permission is not accompanied by a project description statement as provided in sub-regulation (1) of this regulation and, in the opinion of the Director of Environment Protection in terms of regulations 3(4), (5), (6) and (7), such application is one which may require an environmental impact assessment, the Director of Environment Protection shall inform the applicant that his application may require an environmental impact assessment and that in terms of subarticle (2) of article 36 of the Act, the period of time mentioned in subarticle (1) of article 36 of the Act for the determination of the application shall be suspended until the applicant furnishes the Authority with a project description statement in terms of sub-regulation (1) of this regulation.

(3) A project description statement shall contain the following information as applicable,

(a) details of the person wishing to carry out the development;

(b) a brief description of the project and its general objectives;

(c) an indication of the proposed timing of the project and why this timing was preferred;

(d) the location of the proposed development with site boundaries clearly shown on a map;

(e) a concise but reasonably comprehensive indication of the alternative uses, alternative technologies and suitable alternative locations and sites for the proposed development and alternative arrangement of land uses, on the proposed site;

(f) a description of the physical characteristics including size, scale, design and phasing of the development using models, photographs, diagrams, plans and maps where appropriate;

(g) a description of present land uses and environmental characteristics of the site;

(h) a brief description of surrounding land uses, their nature, their extent and their environmental characteristics;

(i) a description of the services, water, foul water sewers, surface water drainage, including storm water drainage, and energy sources available on site;
(j) estimates of the number of persons to be employed with estimates for each phase of the development;

(k) the nature and quantities of raw materials and energy to be used, and wastes generated during construction and operation; the proposed method of storage or handling of materials and wastes, and machinery needed during both the construction and the operational phases;

(l) access arrangements and general parking requirements on and off the site, during both construction and operation;

(m) list of the major environmental impacts likely to be generated by the project, including reference to cumulative impacts, proposals for mitigating the negative effects of the development; and

Provided that the information contained in the project description statement is relevant to the given stage of the consent procedure and to the specific characteristics of the particular project or type of project and of the environmental features likely to be affected.

(4) Notwithstanding the provisions of sub-regulations (1) and (2) of this regulation, the Authority may request the preparation of a Project Description Statement for proposed developments even prior to the submission of a formal development permission application. In this case, the provisions of sub-regulation (3) of this regulation still apply.

6. (1) The applicant may of his own accord submit an Environmental Scoping Statement to the Director of Environment Protection, prior or in conjunction with the submission of the Project Description Statement.

(2) The Environmental Scoping Statement shall:

(a) describe the environmental characteristics of the project and the project environment;

(b) outline the potential impacts on the project environment that could arise from the construction (including demolition/clearance and decommissioning where relevant) and the operation of the project;
(c) identify those potential impacts that may significantly affect the project environment, and

(d) identify the potential secondary and cumulative environmental impacts of the project, and the interactions between potential environmental impacts.

(3) Any baseline surveys and/or investigations undertaken in support of paragraphs (a) to (d) of sub-regulation (2) of this regulation shall be included in the Environmental Scoping Statement.

(4) The environmental scoping statement shall be prepared by consultants registered as EIA Coordinators under Part VI of these regulations.

(5) The baseline surveys prepared in accordance with the provisions of sub-regulation (3) of this regulation, shall be taken account of in the formulation of the project proposal with a view to mitigate the impacts of the proposed development at the design stage and shall, for the purposes of these regulations be deemed to constitute part of the environmental impact statement or environmental planning statement, as the case may be, once the latter is commissioned.

7. (1) After the project description statement, which shall be in conformity to regulation 5 of these regulations, is submitted by the applicant to the Authority, the Director of Environment Protection shall decide whether the development is one which is included under sub-regulations (3) to (9) of regulation 3 or regulation 4 of these regulations.

(2) The Director of Environment Protection shall inform the applicant of his decision not later than four weeks after the project description statement prepared in conformity with regulation 5 of these regulations has been received by the Authority and shall give reasons for his decision.

(3) Once the Director of Environment Protection notifies the applicant that his application requires an environmental impact assessment according to Schedule IA of these regulations, the applicant shall, within 30 days of notification, write to the Director of Environment Protection to inform him that he accepts his views and shall provide an environmental impact assessment within a time period to be specified by the applicant.

(4) Until the applicant furnishes an environmental impact assessment which complies with the provisions of these regulations, the period of time mentioned in subarticles (1) and (2) of article 36 of
the Act for the determination of the application shall be suspended. The said periods shall again commence to run from the date on which the Authority has received the environmental impact statement or environmental planning statement, as the case may be, and the Authority has accepted this statement as being a valid submission in accordance with sub-regulation (4) of regulation 26 of these regulations.

(5) If the applicant does not write to the Director of Environment Protection in accordance with sub-regulation (3) of this regulation, the application shall be processed according to the provisions of sub-regulation (1) of regulation 4 of these regulations.

8. (1) After the expiration of the period mentioned in sub-regulation (3) of regulation 7 of these regulations, the Director of Environment Protection shall inform such departments and agencies of Government which he deems proper, of the receipt of a project description statement in relation to a development that requires the preparation of an environmental impact statement or an environmental planning statement, as the case may be.

(2) The Director of Environment Protection shall also inform the applicant in writing of the names and addresses of the departments and agencies so notified.

(3) The departments and agencies so notified shall, if requested by the applicant, enter into consultation with him to determine whether they have in their possession any information which the applicant or they consider relevant to the preparation of an environmental impact statement or an environmental planning statement and, if they have such information, such departments and agencies of Government shall make it available to the applicant, provided that such departments and agencies of Government shall not be required to disclose any information which, in terms of any law, is considered to be confidential or secret.

(4) A reasonable charge reflecting the cost of making the relevant information available may be made by a body supplying information sought by the applicant, in accordance with sub-regulation (3) of this regulation.

(5) After the expiration of the period mentioned in sub-regulation (3) of regulation 7 of these regulations, the Director of Environment Protection shall publish, in the Gazette and in a local newspaper, a list of applications that require an environmental impact assessment according to sub-regulations (4), (5), (6) or (7) of regulation 3 of these regulations.
9. (1) The applicant shall be responsible for commissioning an environmental impact statement or an environmental planning statement in accordance with the provisions of regulation 11 or regulation 33 of these regulations, as the case may be. In the event of any reasonable doubt about the quality or impartiality of the environmental impact statement or the environmental planning statement or any part thereof, or any similarly significant concern, the Authority may commission an independent assessment at the expense of the applicant.

(2) During the preparation of the environmental impact statement or the environmental planning statement, the Director of Environment Protection and the Director of Planning shall provide an advisory and quality control function.

(3) Without prejudice to the provisions of sub-regulation (1) of this regulation, in cases where more than one development permission application requiring an environmental impact assessment are being considered in the same locality or are otherwise interrelated, the Director of Environment Protection may request that one comprehensive environmental impact statement or environmental planning statement, as the case may be, be carried out for the projects in question.

PART III

FULL ENVIRONMENTAL IMPACT ASSESSMENT (requiring an Environmental Impact Statement)

10. (1) Prior to formulating the terms of reference for the environmental impact statement, an appraisal of all foreseeable (or expected) environmental impacts of the development shall be carried out by the Director of Environment Protection on the basis of, but not limited to, information contained in the project description statement.

(2) The Director of Environment Protection shall invite relevant government departments and the local council which is responsible for the locality where the development is proposed to be executed and other local councils, that in the opinion of the Director of Environment Protection are likely to be affected by the project, to provide information, within twenty-one days of notification, on what they wish to see included in the terms of reference giving reasoned justification for doing so.

(3) (i) The Director of Environment Protection shall place an advert in a local newspaper, at the expense of the applicant, inviting
the general public to inform him, within twenty-one days of publication of the advert, of issues that they would wish to see included in the terms of reference. The Director of Environment Protection may also convene a public hearing, prior to the setting of the terms of reference, when it is considered that the proposed project is of major significance because of its scale, location, hazardous properties or other reasons. The cost of such a meeting shall be borne by the applicant.

(ii) The Director of Environment Protection shall organise a meeting with the applicant and his representatives on the request of the applicant to discuss what is to be included in the terms of reference. Minutes are to be kept of the meeting. At his discretion, the Director of Environment Protection may seek the endorsement of the applicant of the said minutes.

(4) Following these consultations the Director of Environment Protection shall draw up the final terms of reference. The terms of reference shall include a request for information. This information shall be relevant to the given stage of the consent procedure and to the specific characteristics of the particular project or type or project and of the environmental features likely to be effected.

(5) The Director of Environment Protection shall communicate a copy of the approved terms of reference to the applicant, to the applicant’s architect or consultants and to such other persons he deems proper.

(6) The Director of Environment Protection shall grant access to the public to the final terms of reference of an environmental impact statement.

11. (1) An environmental impact statement shall be prepared by consultants registered under Part VI of these regulations.

(2) The applicant shall select the consultants to prepare an environmental impact statement from the Register and shall communicate the names of the consultants so chosen to the Director of Environment Protection.

12. (1) The environmental impact assessment coordinator nominated by the applicant shall be chosen from among the environmental impact assessment coordinators listed in the Register of Consultants in terms of Part VI of these regulations.

(2) The coordinator shall be responsible for briefing the other consultants, liaising with the applicant and his project design team,
the Director of Planning, the Director of Environment Protection, other
departments and agencies of Government, and the local council with
responsibility for the locality in which the development is being proposed
to be executed, and affected local councils if the nature or impacts of
the project are such that they may affect them.

(3) The coordinator shall prepare a coordinated environmental statement based on the findings and interpretations derived from specialized analyses carried out by the other consultants, other studies and documents compiled by the consultants and the comments made by the persons mentioned in sub-regulation (3) of regulation 21 of these regulations.

13. A full environmental impact assessment for development shall involve the following procedures:

(a) describing the development including all ancillary facilities;

(b) describing the extent of the existing environment likely to be affected by the proposed development;

(c) identifying and assessing the effects of the proposed development on the existing environment;

(d) designing mitigation measures;

(e) formulating monitoring and auditing requirements; and

(f) preparing a non-technical summary of the environmental impact statement.

14. (1) The consultants shall describe the proposed development including :

(a) a justification for the proposal;

(b) a description of the physical characteristics and features of the project including production processes (if relevant) and amounts of emissions, wastes and residues expected during both construction and operation;

(c) a description of the financial feasibility of the project. A description of alternative sites considered, and alternative technologies that could be employed during construction and when in operation, shall also be included. In doing so, they may also
refer to the project description statement mentioned in regulation 5 of these regulations.

(2) Without prejudice to article 39 of the Act, where the proposed development has a limited life, the after use of the development shall also be described.

15. The consultants shall describe the existing environmental conditions in and around the site in terms of:

(a) physical features:

(i) population;

(ii) flora, fauna and ecosystems (terrestrial and marine), including both habitats and species and, in particular, protected and endangered species and their habitats;

(iii) soil, agricultural quality and produce;

(iv) geology and geomorphology, including palaeontology and noting geological sites;

(v) water and hydrological features;

(vi) air, including prevailing meteorological factors and air quality;

(vii) cultural heritage and protected sites and areas;

(viii) landscape and topography, including the coast and submarine features;

(ix) land use, including recreational uses; and

(x) any other relevant environmental features;

(b) policy framework:

(i) the planning policy framework which affects the development shall also be analysed. Such analysis shall include the relevant planning policies set out in the Act, in development plans and in other planning policies approved under the provisions of the Act, the Environment Protection Act, or under any other law;
(ii) in particular, but without prejudice to the generality of paragraph (a) of this regulation, the policy review shall relate to:

(1) the site of the proposed development;

(2) the surrounding areas in which impacts may be experienced by the proposed development;

(3) any treaty adhered to by Malta;

(4) policies adopted by any department and Government entity which might have a bearing on the development;

(5) protective scheduling or other designations pertaining to the site and its surroundings; and

(6) any other law having a bearing on the development.

16. (1) The probable effects, both of the finished development and during construction, shall be predicted.

(2) All significant impacts of the proposed development shall be considered and assessed including the main effects on:

(a) buildings and other man-made features (including infrastructure);

(b) flora, fauna, ecology and geology including geomorphology and palaeontology;

(c) land;

(d) water;

(e) air and climate;

(f) other indirect and secondary effects associated with the development;

(g) human beings (including health and safety measures).

(3) Hazard and risk assessment of the development shall also be undertaken.
(4) If any of the effects assessed in regulations (1) to (3) of this regulation are envisaged to have transboundary impacts, these should be assessed and clearly stated in the environmental impact statement. Provisions dealing with such impacts shall follow the procedures set in Part V of these regulations.

17. Where adverse effects are identified, the consultants shall state clearly what significance they attribute to these effects and the mitigation measures they propose to be incorporated in the development and evaluate their effectiveness.

18. (1) The consultants shall devise a scheme to monitor the impacts of the development which may arise during the construction and operational phases.

(2) The consultants shall also identify which records the applicant shall keep for the purpose of monitoring the environmental impacts of the development.

(3) The Authority shall have access to any such records both during the construction and operational phases of the development.

19. (1) Notwithstanding the provisions of regulations 13 to 18 of these regulations, the Director of Environment Protection may modify the specific terms of reference set out for an environmental impact assessment in these regulations according to the planning and environmental considerations of each and every development.

(2) The Director of Environment Protection shall grant access to government departments, local councils and the public, to any amended terms of reference according to the provisions of sub-regulations (5) and (6) of regulation 10 of these regulations.

20. (1) The consultants shall first prepare:

(a) a draft environmental impact statement which shall:

   (i) cover all the topics specified in the terms of reference issued by the Director of Environment Protection;

   (ii) be presented in an intelligible form;

   (iii) be in the either Maltese or English language or both; and
(b) contain a non-technical summary which shall be a separate document presented in both the Maltese and English languages.

(2) The analysis of the impacts on the environment shall be presented in summary, chart, tabular or pictorial format and in a descriptive manner.

(3) The various techniques and methods used in the analysis and predictions shall be included in the environmental impact statement. All assumptions and the reasoning behind such assumptions shall also be included.

(4) The original environmental survey reports shall be attached to the environmental impact statement.

(5) An indication of any difficulties, including technical and other difficulties, encountered by the consultants in compiling the required information shall also be included.

(6) It shall be the consultants’ responsibility to ensure that all references to published works and sources of information shall be duly acknowledged.

(7) The various reports constituting the environmental impact statement shall be written in co-ordination with one another and shall be presented in a coherent manner.

(8) The consultants shall ensure the professional integrity, including scientific integrity, of the discussions and analyses in environmental impact statements.

(9) Where the consultants are evaluating reasonably foreseeable significant effects on the environment and there is incomplete or unavailable information, the consultants shall always make clear that such information is lacking or incomplete.

(10) If the incomplete information referred to in sub-regulation (9) of this regulation is essential to a reasoned choice among alternatives and the overall costs of obtaining it are not exorbitant, the consultants shall include the information in the environmental impact statement.

(11) If the information relevant to reasonably foreseeable significant adverse impacts cannot be obtained because the overall costs
of obtaining it are exorbitant or the means to obtain it are not known, the consultants shall include within the environmental impact statement:

(a) a statement that such information is incomplete or unavailable;

(b) a statement of the relevance of the incomplete or unavailable information to evaluating reasonably foreseeable significant adverse impacts on the environment;

(c) a summary of existing credible scientific evidence which is relevant to evaluating the reasonably foreseeable significant adverse impacts on the environment; and

(d) the consultants’ evaluation of such impacts based upon theoretical approaches or research methods generally accepted in the scientific community.

(e) the provisions of sub-regulation 11 shall not preclude the Authority from verifying the justification for any alleged limitation, nor from requiring rectification of unjustified limitations.

(12) For the purposes of this regulation, “reasonably foreseeable” includes impacts which have major or catastrophic consequences, even if their probability of occurrence is low, provided that:

(a) the analysis of the impacts is supported by credible scientific evidence;

(b) it is not based on pure conjecture; and

(c) is within the rule of reason.

(13) Wherever the available information is deemed by the Director of Planning and the Director of Environment Protection to be insufficient for acceptable determination of the application and wherever the risk factor or hazard factor or both are deemed to be too high, they shall, notwithstanding sub-regulations (1) to (4) of this regulation, adopt the precautionary principle.

21. (1) After preparing a draft environmental impact statement and before preparing a final environmental impact statement, a consultation stage shall take place.
(2) The consultants shall submit copies of the draft environmental impact statement to the Director of Environment Protection and a copy or part thereof to any other department or Government entity as the Director of Environment Protection may request. The consultants shall inform the Director of Environment Protection of the name of every body whom they have so served, of the date of service and, where they have not served a copy of the whole of the draft environmental impact statement, of which part of the copy that was served.

(3) The Director of Environment Protection shall also request the comments of the Director of Planning and of any other department and Government entity which he may deem relevant for the purpose on the whole document forming the environmental impact statement or on part thereof.

(4) The Director of Environment Protection shall establish a time limit within which the comments mentioned in sub-regulation (3) of this regulation shall be received by him. Such time limit shall not be less than thirty days from the date of receipt of the draft environmental impact statement by the respective department or Government entity. Should no comments be received within the stipulated period the Director of Environment Protection shall assume that the consultees have no comments to submit.

(5) Comments on the draft environmental impact statement shall be as specific as possible and may address the adequacy of the draft environmental impact statement, the merits of the alternatives discussed, or any combination thereof.

22. (1) The draft environmental impact statement shall be reviewed by the Director of Environment Protection and shall be assessed against the terms of reference, the quality of the data used and the objectivity of analysis for the prediction of impacts. Comment may also be made on the suitability of the mitigation measures proposed and on any other matter that is deemed by the Director of Environment Protection to be relevant.

(2) The Director of Environment Protection shall specify in his comments whether he needs additional information, what information he needs and, where relevant, the level of detail required. The Director of Environment Protection may require an applicant to produce such evidence as he may reasonably call for to verify any information in his environmental impact statement.
(3) On completion of the consultation stage and of this review, the Director of Environment Protection shall send a report incorporating these and other comments, including any mitigation measures he may deem fit, to the consultants for their consideration and revision of the draft environmental impact statement.

23. (1) The consultants shall respond to the comments made during the consultation stage by one or more of the following means:

(a) develop and evaluate alternatives not previously given serious consideration by them;

(b) supplement, improve, or modify their assessment;

(c) modify alternatives, including the proposed action;

(d) make factual corrections; or

(e) explain why the comments do not warrant further response by them citing the sources, authorities, or reasons which support the consultants’ position.

(2) All substantive comments received on the draft environmental impact statement (or summaries thereof where the response has been exceptionally voluminous) shall be attached to the draft environmental impact statement whether or not the comment is thought to merit individual discussion by the consultants in the text of the environmental impact statement.

24. (1) On receipt of the consultant’s comments or revisions, in accordance with regulation 23 of these regulations, the Director of Environment Protection shall review the draft environmental impact statement as amended.

(2) The Director of Environment Protection shall consider whether the statement has been satisfactorily compiled, prepared in a professional manner, is without bias and adequately meets the terms of reference. If he is satisfied with the statement he shall certify it accordingly and inform the consultants and all the consultees.

(3) If the Director of Environment Protection does not issue a certificate as mentioned in sub-regulation (2) of this regulation, the statement shall not be certified until the consultants abide by the directions given to them by the Director of Environment Protection.
(4) On certification of the environmental impact statement by the Director of Environment Protection according to sub-regulation (2) of this regulation, the applicant shall comply with sub-regulations (5), (6), (7) and (8) of this regulation.

(5) The applicant shall publish, at the applicant’s expense, in at least one daily newspaper in the Maltese language and in at least one daily newspaper published in the English language, a notice (as specified in Schedule II) stating:

(a) the applicant’s name with respect to the application for development permission;

(b) the date on which the application was validated;

(c) the address or location and the nature of the proposed development;

(d) that a copy of the application and of the plans and other documents submitted with it together with a copy of the draft environmental statement may be inspected by members of the public at reasonable hours;

(e) an address at which those documents may be inspected and the latest date on which they shall be available for inspection (being a date not less than fourteen days later than the date on which the notice is published);

(f) an address (whether or not the same as that given under paragraph (e)) at which copies of the environmental statement may be obtained;

(g) if a charge is to be made for a copy, the amount of the charge; and

(h) that any person wishing to make representations about the application, shall make them in writing, before the date named in accordance with paragraph (e), to the Malta Environment and Planning Authority.

(6) The applicant shall affix on the land a notice (as specified in Schedule II to these regulations) containing the information specified in sub-regulation (5) of this regulation, except that the date named as the latest date on which the documents shall be available for inspection shall not be less than twenty-one days later than the date on which the notice is first affixed.
(7) The notice mentioned in sub-regulation (6) of this regulation shall:

(a) be left in position for the whole duration of the consultation period specified in sub-regulation (6) of this regulation and in any case, for not less than seven consecutive days; and

(b) be affixed firmly to some object on the land and sited and displayed in such a way as to be easily visible to, and readable by, members of the public without going on to the land.

(8) Following the elapse of the period specified in sub-regulation (7) of this regulation, the applicant shall submit to the Authority a certificate by or on behalf of the applicant which states that he has affixed a notice on the land in compliance with this regulation and when he did so, and that the notice was left in position for not less than seven days, or that, without any fault on his part, it was removed, obscured or defaced before seven days had elapsed and he took reasonable steps for its protection or replacement specifying the steps taken.

(9) If any person issues a certificate which purports to comply with the requirements of paragraph (b) of sub-regulation (8) of this regulation, and which contains a statement which he knows to be false or misleading in a material particular, or recklessly issues a certificate which purports to comply with those requirements and which contains a statement which is false or misleading in a material particular, he shall be guilty of an offence and the provisions of sub-article (1) of article 56 of the Act shall apply.

(10) A date for the public hearing required in terms of regulation 25 shall only be set once the applicant submits the documentation required in sub-regulation (8) of this regulation.

25. (1) After having certified the draft environmental impact statement the Director of Environment Protection shall arrange for a public hearing to take place, at which the public may comment on the environmental impact statement and express their views on the impact of the proposed development.

(2) The Director of Environment Protection shall inform the public as aforesaid and shall also inform the public of the day, time and place where the public hearing shall take place by publishing a notice in the Gazette and in the local newspapers. All reasonable expenses incurred by the Authority for organising the public hearing and publishing the said notices shall be borne by the applicant.
(3) The Director of Environment Protection shall give at least fifteen days notice but not more than thirty days notice of the public hearing.

(4) The Director of Environment Protection shall inform the Director of Planning, the consultants and the persons mentioned in sub-regulations (2) and (3) of regulation 21 of these regulations of the date, time and place of the public hearing giving at least fifteen days advance notice.

(5) A copy of the draft environmental impact statement shall be made available for public inspection at the Authority, and may be inspected throughout the period stipulated in sub-regulation (3) of this regulation on such days and during such times as the Director of Environment Protection deems proper, whilst at the same time making the non-technical summary freely accessible on the Authority’s official web site.

(6) A copy of the draft environmental impact statement shall be submitted to the local council which is responsible for the locality where the development is proposed to be executed and other local councils, that in the opinion of the Director of Environment Protection are likely to be affected by the project, so that it may be made available for public inspection throughout the period stipulated in sub-regulation (3) of this regulation.

(7) The Director of Environment Protection shall chair and regulate the proceedings of the public hearing. He shall, as much as is reasonable give every person present in the hearing who wishes to make any submissions the opportunity to air his views on the environmental implications of the proposed development. The language of the public hearing shall be in Maltese.

(8) The views of the public as expressed during the public hearing and in any written comments made by the public before, during or up to seven days after the public hearing, shall be recorded by the Director of Environment Protection. All the comments received or recorded shall be collated into a report by the Director of Environment Protection. This report shall be forwarded to the Director of Planning, to the applicant and to his consultants not later than two weeks after the date of the public hearing. A summary of all the comments shall be presented in an appendix to the final environmental impact statement.

26. (1) Prior to the submission of the final environmental impact statement to the Authority, the consultants shall further revise the environmental impact statement and the proposed development in the
light of the written comments made by the public and the comments made during the public hearing.

(2) The final environmental impact statement, including environmental survey reports, as revised if so required, shall be submitted by the co-ordinator to the Authority.

(3) The consultants may place discussion of methodology in an appendix.

(4) The applicant shall ensure that his application conforms to the recommendations made in the environmental impact statement. The application shall not be determined until the Director of Planning in consultation with the Director of Environment Protection is satisfied that the development application conforms to the said recommendations and the provisions of subarticle (2) of article 36 of the Act shall apply. If not, the Director of Planning shall request the applicant to comply with the said recommendations.

(5) The co-ordinator shall submit such number of copies of the environmental impact statement to the Authority as the Director of Environment Protection may reasonably establish.

(6) The Authority shall be empowered to reproduce the contents of the environmental impact statement, once this is submitted, at its own discretion.

27. (1) An applicant for development permission who submits an environmental statement in connection with his application shall ensure that a reasonable number of copies of the statement are available at the address named in the notices published or affixed pursuant to paragraph (f) of sub-regulation (5) of regulation 24 of these regulations, as the address at which such copies may be obtained.

(2) Copies of the final environmental impact statement shall be made available for sale to interested persons by the Director of Environment Protection, whilst at the same time making the non-technical summary accessible on the Authority’s official web site.

(3) The price of the said statement shall not exceed the cost of their printing and distribution. Such charges shall be levied from any member of the public for a copy of an environmental statement made available in accordance with sub-regulation (1) of this regulation.

28. (1) The environmental impact statement shall list the registration number and the names of the consultants and contributors
responsible for the preparation of the environmental impact statement, environmental survey reports, appendices, non-technical summary and any other component of the statement.

(2) The consultants who are responsible for a particular analysis, including analysis in the environmental survey reports, shall be identified.

(3) All consultants and contributors employed in the environmental impact assessment shall sign a declaration stating that the particular study (or part thereof) was solely carried out by them and that they take responsibility for any statement and conclusion contained therein. This signed declaration shall be included with each environmental survey report included with the environmental impact statement.

29. (1) In the interests of fairness, objectivity and the avoidance of bias, all consultants shall be required to sign, and abide by, a declaration that they have no personal or financial interest in the proposed development.

(2) The Director of Environment Protection shall not approve consultants, groups of consultants or consultancy firms that are in any way associated with any company, association or grouping that has any direct or indirect personal, professional or financial interest in the proposed development.

(3) The Director of Environment Protection shall not approve any environmental impact statement or environmental planning statement produced by a consultant or group of consultants, one or more of whom does not comply with the provisions of sub-regulations (1) or (2) of this regulation.

30. (1) Consultants shall incorporate material into an environmental impact statement by reference when the effect will be to cut down on bulk without impeding the review by the public during the public participation process or by the Authority, any department and Government entity, by the council which is responsible for the locality where the development is to be executed, or by adjacent councils.

(2) The incorporated material shall be cited in the statement and its content briefly described.

(3) No material may be incorporated by reference unless it is reasonably available for inspection by potentially interested persons
within the time allowed for comment prescribed under sub-regulation (4) of regulation 21 of these regulations.

(4) Material which is based on proprietary data which is itself not available for review and comment shall not be incorporated by reference.

31. (1) The environmental impact statement shall list all permits, licences and other forms of authorisation which must be obtained by the applicant in terms of any other law from any department or Government entity in implementing the development if development permission is granted.

(2) If the consultants are uncertain whether such authorisation as mentioned in sub-regulation (1) of this regulation is necessary, they shall so indicate in the environmental impact statement.

32. (1) The Authority shall keep a copy of each draft environmental impact statement, the final environmental impact statement and any documents connected therewith in a public reference room.

(2) A copy of any environmental planning statement submitted to the Authority under the provisions of Part IV of these regulations shall also be kept in the public reference room.

(3) Access to the documents mentioned in sub-regulations (1) and (2) of this regulation shall be given to any person during such reasonable times as the Authority may determine.

PART IV

LIMITED ENVIRONMENTAL IMPACT ASSESSMENT

(requiring an Environmental Planning Statement)

33. (1) Prior to formulating the terms of reference for the environmental planning statement, an appraisal of all foreseeable (or expected) environmental impacts of the development shall be carried out by the Director of Environment Protection on the basis of, but not limited to, information contained in the project description statement.

(2) The Director of Environment Protection shall invite relevant government departments and the local council which is responsible for the locality where the development is proposed to be
executed and other local councils, that in the opinion of the Director of Environment Protection are likely to be affected by the project, to provide information, within twenty-one days of notification, on what they wish to see included in the terms of reference and the justification for doing so.

(3) Following these consultations the Director of Environment Protection shall draw up the final draft of the terms of reference.

(4) The Director of Environment Protection shall communicate a copy of the approved terms of reference to the applicant, architect and to such other persons he deems proper.

(5) The provisions of regulations 11 to 32 other than, sub-regulation (3) of regulation 19, sub-regulation (10) of regulation 24, and regulation 25 of these regulations shall mutatis mutandis apply to an environmental planning statement, provided that an environmental planning statement shall be more limited in nature than an environmental impact statement.

PART V

Transboundary Effects

34. (1) Where the Minister is aware that a project in Malta is likely to have significant effects on the environment in another State, or where a State likely to be significantly affected so requests, the Minister shall send to the affected State as soon as possible and not later than when the public is informed in terms of sub-regulation (5) of regulation 7 of these regulations, the following:

(a) a description of the project, together with any available information on its possible transboundary impacts;

(b) relevant information regarding the environmental impact assessment procedure;

(c) information on the nature of the decisions which may be taken;

and shall give the affected State a reasonable time in which to indicate whether it wishes to participate in the environmental impact assessment procedure.
(2) If the affected State which receives information indicates to the Minister that it intends to participate in the environmental impact assessment procedure, the Minister shall, if he has not already done so, send to the affected State the information gathered regarding the proposed development.

(3) The affected State shall enter into consultations with the Minister concerning, inter alia, the potential transboundary effects of the project and the measures envisaged to reduce or eliminate such effects and shall agree on a reasonable timeframe for the duration of the consultation period.

(4) The affected State may arrange for the information to be made available, within a reasonable time, to the relevant authorities and the public in the territory of such affected State which is likely to be significantly affected; and, within the timeframe established through the provisions of sub-regulation (3) of this regulation, the affected State, shall forward its opinion to the Minister who shall in turn forward such opinion to the Authority.

(5) The transmission of information to the affected State, concerning potential transboundary impacts, and the receipt of information by such affected State, shall be subject to the limitations contained in any law in force in Malta.

(6) The Minister shall provide to the affected State the final decision on the proposed project along with the reasons and considerations including information about the public participation process on which it was based and any conditions attached thereto. There shall also be a description, where necessary, of the main measures to avoid, reduce and, if possible, offset the major adverse effects.

(7) When, following monitoring of a development with potential transboundary impacts, significant adverse transboundary impacts or factors that may result in such an impact are discovered, the Minister shall immediately inform the affected State and enter into consultations on the necessary measures that may be undertaken to reduce or eliminate such impact.

(8) In the exercise of his duties under this regulation, the Authority shall furnish the Minister with all such documentation and information as he may request.

(9) Where the Minister is informed that a project proposed in another State is likely to have a significant effect on the environment of the Maltese Islands, he shall inform the State, in which the project is
to be undertaken, of Malta’s request to participate in the environmental impact assessment procedure in that State and request the following:

(a) a description of the project, together with any available information on its possible transboundary impacts;

(b) relevant information regarding the environmental impact assessment procedure; and

(c) information on the nature of the decisions.

(10) The Minister shall forward to the Authority the information listed in sub-regulation (9) of this regulation. The Authority shall make this information available to the consultees and the public in Malta in accordance with the provisions of regulations 21 and 25 of these regulations. The Minister shall also enter into discussion with the State in which the project is to be undertaken to agree on a reasonable timeframe for the duration of the consultation period.

(11) The Minister, acting on the advice of the Authority and taking into consideration the comments of the public, shall enter into consultations with the State in which the project is to be undertaken concerning, inter alia, the potential transboundary effects of the project and the measures envisaged to reduce or eliminate such effects.

(12) When the Minister receives details from the State in which the project is to be undertaken regarding the final decision on the proposed project, together with the reasons and considerations on which it was based, he shall provide a copy of this information to the Authority who shall publish the information in the Gazette, in a local newspaper and on the Authority’s official web site.

PART VI

REGISTER OF CONSULTANTS AND REVIEWS

35. (1) The Authority shall keep and make available for public inspection at such reasonable times as it may determine, a Register of Environmental Impact Assessment Consultants.

(2) The Register shall be divided into Parts. Each Part shall list those consultants who are competent in a particular discipline, provided that where a person is competent in more than one particular discipline he shall be registered under both or more such disciplines.
(3) The Register shall also be divided into categories of environmental impact assessment consultants, namely a Junior Impact Assessor, a Senior Impact Assessor and an Environmental Impact Assessment Co-ordinator.

(4) The Authority shall note the issue of a certificate of registration in the Register together with the relevant discipline or disciplines in which he is competent and shall also note therein all suspensions, cancellations and reinstatements of those certificates.

(5) No person may act as an impact assessor or environmental impact assessment co-ordinator unless he is registered in the Register of Environmental Impact Assessment Consultants or unless he proves that he is registered with a recognised national registration body for the carrying out of professional work related to the duties of an impact assessor or environmental impact assessment co-ordinator.

(6) The Authority shall refuse to accept an environmental impact statement or an environmental planning statement where a person who is not registered in the Register has participated in the preparation of the relevant environmental impact assessment.

(7) Notwithstanding the provisions of sub-regulation (6) of this regulation, the Director of Environment Protection may, where he deems it necessary, accept the contribution by a non-registered person:

(a) in relation to a specific discipline not covered in the Register, provided that that person is, in the view of the Director of Environment Protection, suitably qualified to make such a contribution and his participation has been agreed in writing prior to the commissioning of the environmental impact assessment;

(b) where that person has been responsible for undertaking research including the gathering and collation of data, under the supervision of a registered consultant participating in the relevant environmental impact assessment, but has not been involved in the assessment of impacts.

36. (1) The Minister shall appoint a Registration and Review Board that shall be responsible for:

(i) evaluating applications for registration in the Register;
(ii) receive and consider requests for considerations submitted by applicants as per regulation 45.

(2) Decisions on applications for registration shall be taken by the Registration and Review Board composed of a minimum of three persons and a maximum of five persons. Members of the Registration and Review Board shall be independent members who are not involved in any way in the preparation of environmental impact assessments, one of whom shall act as the chairperson of the Registration and Review Board.

(3) The Registration and Review Board shall assess applications for registration and shall prepare a list of persons who, in the opinion of the Board, meet the requirements for registration and are therefore to be issued with a certificate of registration. The Registration and Review Board shall give reasons for their decisions.

(4) The decision of the Registration and Review Board to grant or to refuse an application for registration in the Register shall be notified in writing to the applicant without delay.

(5) The Registration and Review Board may direct the Authority to update the Register at such regular intervals as it may deem fit by the inclusion of other disciplines in the Register, which disciplines might have in the meantime evolved.

37. (1) Any person may apply in writing on the appropriate form to the Registration and Review Board to be registered in the Register.

(2) The application for registration shall include the following information:

(a) personal details including name, surname, date of birth, private and office addresses and qualifications of the applicant for registration;

(b) a list of any relevant work by the applicant;

(c) a detailed *curriculum vitae* (which is to include details of the person’s training, experience and knowledge in environmental assessment techniques and methods);

(d) the category to which the applicant is applying, as set out in Schedule III of these regulations;
(e) an indication of the particular environmental discipline or disciplines for which the person is applying for registration in.

(3) The application for registration shall be accompanied by the appropriate fee as set out in Schedule III of these regulations.

38. (1) The Registration and Review Board shall register a person in the Register if it is satisfied that the said person:

(a) has appropriate qualifications in an environmental discipline or in environmental impact assessment;

(b) has experience and knowledge of environmental assessment techniques and methods; and

(c) has experience in one or more relevant disciplines.

(2) Certificates issued to eligible persons shall be valid for one year but may be renewed by the Registration and Review Board upon payment of the relevant renewal fee according to Schedule III to these regulations, except where, in the opinion of the Registration and Review Board, the provisions of regulation 40 have been contravened.

(3) Notwithstanding the provisions of sub-regulation (1) of this regulation, the Registration and Review Board may grant a temporary certificate valid for one year to any person who, in the opinion of the Registration and Review Board, has the appropriate qualifications but does not have sufficient experience in the relevant discipline or in environmental impact assessment techniques and methods. Temporary certificates shall only be issued for a maximum of two years.

(4) The Authority shall endeavour to organise training courses in environmental impact assessment techniques and methods. All junior impact assessors and persons issued with a temporary certificate shall be obliged to undertake this training course as a prerequisite to obtaining or confirming their registration.

39. The certificate of registration shall contain the following information:

(a) the name, surname and identity document number or other means of identification of the consultant;

(b) the date when the certificate is issued;
(c) the discipline or disciplines in which the consultant is considered by the Registration and Review Board as having an acceptable level of expertise.

40. (1) The Registration and Review Board may cancel any certificate granted under the provisions of this Part of these regulations when the holder of that certificate:

(a) is found guilty by a court of criminal jurisdiction of a crime being a crime committed through imprudence, carelessness, unskillfulness in an art or profession, or non-observance of regulations; or

(b) is found guilty by a court of criminal jurisdiction of any offence under the provisions of the Act or of any regulations made thereunder; or

(c) has, in the opinion of the Authority and the Registration and Review Board, submitted substandard or deliberately misleading work in an environmental impact assessment; or

(d) has participated in the preparation of an environmental impact assessment when he was not registered in the Register; or

(e) was the recipient of a certificate issued under the provisions of this Part of these regulations based on information given by the applicant which is false or misleading; or

(f) fails to pay the yearly renewal fee.

(2) Notwithstanding the provisions of sub-regulation (1) of this regulation, the registration Board may opt for suspension, rather than cancellation of the certificate, in the circumstances specified in paragraphs (d) and (f) of sub-regulation (1) of this regulation.

(3) If a person participates in the preparation of an environmental impact assessment without being registered in the Register, he shall subsequently be barred from registering or participating in any environmental impact assessments in Malta for a period to be decided by the Registration and Review Board which period shall in no case be less than three years.

41. (1) Any person who for the purposes of obtaining the certificate for registration in the Register gives any wrong information or otherwise acts in a deceitful or fraudulent manner shall be guilty of
an offence and shall, on conviction, be liable to a fine (multa) not exceeding one thousand liri.

(2) Any person who, not being the holder of a certificate, assumes or uses the designation “Environmental Impact Assessment Consultant”, “Environmental Impact Assessment Co-ordinator”, “Senior Impact Assessor” or “Junior Impact Assessor” or in any manner indicates that he is entitled to prepare an environmental impact assessment shall be guilty of an offence and shall, on conviction, be liable to a fine (multa) not exceeding five hundred liri and in respect of a second or subsequent offence to a fine (multa) not exceeding one thousand liri.

(3) For the purposes of sub-regulation (2) of these regulations, the use on any card, letterhead, sign, board, plate, advertisement or other written, printed or engraved device, instrument or document, of the words “Environmental Impact Assessment Consultant”, “Environmental Impact Assessment Co-ordinator”, “Senior Impact Assessor” or “Junior Impact Assessor”, in relation to a name, shall be sufficient evidence of the knowledge of such use by the person in relation to whose name the said words are used, unless such person proves that the use of such words was made without his knowledge and that upon becoming aware of the use he took adequate steps to stop it.

(4) The offences and penalties mentioned in this regulation shall be without prejudice to any other offences and penalties in terms of the Act or any other law.

42. For the purposes of this Part of these regulations “person” includes a person who is not a citizen of Malta but does not include a body of persons.

PART VII

ENFORCEMENT

43. (1) When development permission has been granted by the Authority for a development which had been subjected to an environmental impact assessment under these regulations, the Authority shall monitor the implementation of the said development both during the construction and the operational phases.

(2) The Authority may:

(a) include appropriate, and clearly specified conditions in the development permission;
(b) establish the period within which the construction phase of the development shall be completed together with any planning obligations, conditions or penalties which it may deem fit to impose for non-completion or unsatisfactory completion of the development and associated facilities within the established period;

(c) request the applicant to provide a guarantee by a bank or credit institution licensed in Malta according to the provisions of the Banking Act, or any other law which may from time to time replace it, by which the said bank or institution shall bind itself on behalf of the applicant, without prejudice to any future action or remedy which such bank or institution may exercise against him, to effect payment to the Authority of any sum to be established by way of penalty in the development permission if the development is not completed in accordance with the specified conditions within the period established in the development permission and for any breach of any condition imposed in the development permission or of any planning obligation entered into by the applicant. The said guarantee shall not be less than the greater of the cost of reinstating the area to an acceptable condition, or the cost of re-instatement and repair of damages arising from non-compliance with conditions imposed in the development permission;

(d) in the event that after a development permission is issued the development is not carried out in accordance with the permission, or is otherwise causing damage to the environment or to the infrastructure, demand, as a condition of the continuance of the permission, that the person in whose favour the permission is issued should provide a bond in favour of the Authority in order to guarantee payment in respect of damages which may be caused to the environment or to the infrastructure, in terms of subarticle (5) of article 34 of the Act;

(e) request that the person or company responsible for the development is covered with an insurance policy against damage to environmental resources; and

(f) make available to the public at such intervals as the Authority deems proper the results of monitoring carried out throughout the construction or operation phase of the project, whether such monitoring has been carried out by the Authority itself or by the developer as a direct result of a condition in the development permission.
PART VIII

MISCELLANEOUS PROVISIONS

44. (1) For the avoidance of doubt, it is hereby declared that:

(a) when the Director of Planning or the Director of Environment Protection requests the applicant, his architect, agent or the consultants to make certain changes in the project design,

(b) when the Director of Planning or the Director of Environment Protection gives any guidance which he may deem fit in the circumstances,

this does not imply in any way that the Director of Planning or the Director of Environment Protection is approving the development or will recommend to the Authority that it should approve the development.

(2) Agreement on the terms of reference for the preparation of baseline studies, the formulation of a project description statement, an environmental impact statement or an environmental planning statement is not to be construed in any way as evidence in favour of the proposed development.

(3) In arriving at a decision, the Authority shall not be bound by the conclusions reached in an environmental impact statement or an environmental planning statement, as the case may be. However, the Authority shall give due regard to the conclusions reached in the environmental impact statement or in the environmental planning statement, as the case may be, when arriving at a decision. Whether it accepts or does not accept the conclusions reached by the said impact statement or planning statement, as the case may be, the Authority shall give detailed reasons thereof.

(4) Where, after environmental information has been taken into consideration, an application for development which has been subjected to an environmental impact assessment under these regulations is determined by the Authority, the Authority shall:

(a) inform the public of the decision, by publishing a notice in a newspaper, or by such other means as are reasonable in the circumstances; and

(b) make available for public inspection, at all reasonable hours and free of charge, a statement containing:
(i) the content of the decision and any conditions attached thereto;

(ii) a statement containing the main reasons and considerations on which the decision is based, including information about the public participation process; and

(iii) a description, where necessary, of the main measures to avoid, reduce, and if possible, offset the major adverse effects of the development.

(5) The provisions of these regulations shall not affect the obligation of the Government of Malta to respect the limitations imposed by any law in force in Malta with regard to commercial and industrial confidentiality, including intellectual property, and the safeguarding of the public interest.

45. (1) If an applicant considers that the terms of reference, approved by the Director of Environment Protection under the provisions of regulations 10 and 33, is unreasonable, he may request the Director of Environment Protection to review such terms of reference. A request for a review shall be made in writing within fifteen (15) days from the date of communication of the said terms of reference to the applicant.

(2) The Director of Environment Protection shall, without delay, consider the request made by the applicant and communicate the final terms of reference as the case may be, within thirty (30) days from receipt of the request for reconsideration. The Director of Environment Protection shall give a reasoned justification for his decision/s relating to the request for review.

(3) If the applicant considers the final terms of reference, communicated to him in accordance with sub-regulation (2) of this regulation, as unreasonable, he may request the Registration and Review Board to review the said terms of reference. A request for a review shall be made in writing within fifteen (15) days from the date of communication of the said terms of reference review decision by the Director of Environment Protection to the applicant.

(4) The Registration and Review Board shall, without delay, consider the request made by the applicant and invite submissions from the Director of Environment Protection. The Board may at its discretion inform any such persons he deems proper. The decision of the Registration and Review Board shall be final, and shall be communicated to the applicant within thirty (30) days from receipt of the request for review.
(5) Any time period set out under any provision of these regulations or the Act shall be suspended until a decision under this regulation is communicated to the applicant.

(6) The provisions relating to the publication and communication of the terms of reference under regulations 10 and 33 shall apply mutatis mutandis to the decision of the Director of Environment Protection or Registration and Review Board taken in accordance with sub-regulations (2) and (4) of this regulation.

PART IX

TRANSITORY PROVISION

46. Any application for development permission which concerns any development listed in Schedule IA to these regulations pending on the date of coming into force of these regulations shall be regulated according to the provisions of these regulations provided that:

(a) any environmental impact assessment carried out or in the process of being carried out by consultants who are not registered in the Register shall be deemed to have been made in accordance with the provisions of those regulations regulating the registration of consultants in the Register;

(b) participation by any person in an environmental impact assessment prior to the coming into force of these regulations shall not be deemed to constitute an automatic acceptance of an application made by such person for registration in the Register; and

(c) environmental impact statements or environmental planning statements the terms of reference whereof have already been communicated to the applicant prior to the entry into force of these regulations shall, as far as possible, comply with the provisions of these regulations unless the Director of Environment Protection specifically exempts in writing the applicant from any provisions of these regulations with regards to a particular development and this may be done after the Director of Environment Protection would have taken into consideration the advanced stage arrived at in the environmental impact statement or environmental planning statement, as the case may be.

(d) until such time as the regulations under Part VI of these regulations are brought into force, the Director of Environment
Protection shall approve the participation of consultants and contributors in the environmental impact assessment process.

47. (1) The Environment Impact Assessment Regulations, 2001 are hereby repealed.

(2) The repeal of the Environment Impact Assessment Regulations, 2001, shall be without prejudice to anything done or omitted to be done under the said regulations and in particular shall not affect the validity of any environmental impact statement or environment planning statement made under the said regulations.

| 2.1.3 | Realignment and/or widening of an existing road of two lanes or less so as to provide four or more lanes where such new road, or realigned and/or widened section of road would be: (i) 2 km or more in length; or (ii) more than 300 dwellings or an area designated for more than 300 dwellings are within 100m of the centre line of the proposed road; or (iii) where the road passes through or within 100m of a protected site. |
2.1.4 Construction of a tunnel if the tunnel is over 1 km in length; and (i) passing beneath or within 100m of a protected area, or (ii) passing through or within 100m of an aquifer protection zone.

2.2 Airports
2.2.1 Category I Projects
2.2.1.1 Construction of a new airport/airstrip, or heliport.

2.2.2 Category II Projects
2.2.2.1 Expansion of an airport/airstrip or heliport which includes an extension to a run-way or taxi-way by 250m or more not being a development falling within 2.2.1.1 and 2.2.1.2

2.2.1.2 Significant expansion or development of an existing airport which includes an extension to a run-way or taxi-way by 500m or more, new terminal buildings, or other major developments with a building footprint exceeding 35,000 m².

2.3 Ports
2.3.1 Category I Projects
2.3.1.1 Construction of a trading port, piers for loading and unloading connected to land and outside ports (excluding ferry piers) for handling vessels over 1000 tonnes.

2.3.2 Category II Projects
2.3.2.1 Construction or extension of a port installation, dry dock, bilge water recycling station (ship tank cleaning), permanent moorings for ships over 25,000 tonnes, harbours including fishing harbour or yacht marina (with a capacity of less than 200 boats) not being development falling within 2.3.1.1 and 2.3.1.2

2.3.1.2 Construction of a yacht marina where the number of berths exceeds 200.

2.3.1.3 Construction of a breakwater, wavebreaker or coastal defences.

2.3.1.4 Inland waterways and ports for inland-waterway traffic which permit the passage of vessels of over 1350 tonnes.

2.3.2.2 Inland – waterway construction not included in 2.3.1.4, canalization and flood – relief works for a catchment of more than 5 ha.

2.4 Other Transport
2.4.1 Category I Projects
2.4.1.1 Construction of a tramway, elevated or underground railway, suspended line or similar line being either: (i) within 100m of a protected site; or (ii) having a length of more than 1km.

2.4.1.2 Construction of railways and intermodal transhipment facilities, and of intermodal terminals

2.4.2 Category II Projects
2.4.2.1 Other tramways, elevated or underground railways, suspended line or similar structures not covered by 2.4.1.1.
2.5.1 Category I Projects
2.5.1.1 Construction of a dam which is either:
(i) more than 100m long; or
(ii) more than 15m high.

2.5.1.2 Construction of a reservoir or other installation for holding or storing water on a long term basis with a capacity of more than 50,000m³.

2.5.2 Category II Projects
2.5.2.1 Construction of a dam or reservoir, not being a development within 2.5.1.1 and 2.5.1.2 and being:
(i) a dam of between 25–100m long; or
(ii) a water storage capacity of between 20,000m³ and 50,000m³.

2.6 Pipelines and Underground Electricity Transmission
2.6.1 Category I Projects
2.6.1.1 Construction of a main transmission pipeline for the transport of gas, oil or chemicals (other than water):
(i) over a distance of 5 km; or
(ii) where more than 300 dwellings or a site designated for more than 300 dwellings are within 100m of the route; or
(iii) the route passes through the aquifer protection zone or is within 500m of a bore hole; or
(iv) the route passes through a protected site.

2.6.1.2 Construction of an aqueduct or a main sewer with a diameter exceeding 600mm and not utilising an existing right of way:
(i) over a distance of 5 km or more; or
(ii) the route passes through a protected site.

2.6.2 Category II Projects
2.6.2.1 Construction of an oil or gas pipeline not being a development falling within 2.6.1.1.

2.6.2.2 Construction of an aqueduct or a main sewer not being a development falling within 2.6.1.2 and not utilising an existing right of way:
(i) over a distance of 5 km or more; or
(ii) the route passes through a protected site.

2.6.2.3 Laying an underground route for electricity cable/s of 100KV or more not utilizing an existing right of way:
(i) over a distance of 5km or more; or
(ii) the route passes through a protected site.

2.7 Management and Disposal of Wastes
2.7.1 Category I Projects
2.7.1.1 Erection of an installation for incinerating, treating (including chemical treatment), processing, recycling and destruction of hazardous waste and spent oil.

2.7.2 Category II Projects
2.7.2.1 Installation for incinerating, treating (including chemical treatment), processing, recycling and destruction of wastes not being a development falling within 2.7.1.2.
2.7.1.2 Erection of an installation for incinerating, treating (inc. chemical treatment), processing, recycling and destruction of non-hazardous wastes with a capacity of 25,000 tonnes per year or more.

2.7.1.3 Site for depositing or recycling sludge.

2.7.1.4 Installation for the disposal of chemical or hazardous wastes on or in the ground.

2.7.1.5 The development of new landfill sites for non inert waste.

2.7.1.6 Installation for the disposal of household and other non-hazardous (non inert) wastes with a capacity of 100,000m³ or more.

2.7.1.7 Installation for the disposal of household and non-hazardous (non inert) wastes with a capacity of over 25,000m³ and where:
   (i) more than 300 dwellings or an area designated for more than 300 dwellings are within 200m of the boundaries of the site; or
   (ii) a protected site is within 200m of the boundaries of the site; or
   (iii) in the aquifer protection zone or within 500m of a bore hole or any other water abstraction point.

2.8 Sewage Treatment Plants
2.8.1 Category I Projects
2.8.1.1 A waste water treatment plant with a capacity catering for 150,000 population equivalent or more.

2.8.2 Category II Projects
2.8.2.1 A waste water treatment plant with a capacity catering for less than 150,000 population equivalent.

2.9 Reverse Osmosis Plants
2.9.1 Category I Projects
2.9.1.1 A Reverse Osmosis or desalination plant with a capacity exceeding 50,000m³ per day.

2.9.2 Category II Projects
2.9.2.1 A Reverse Osmosis or desalination plant with a capacity of between 10,000m³ and 50,000m³ per day.

NOTE: A Reverse Osmosis or Desalination Plant on the coast is also covered by criterion 4.2 Development on the Coast whichever is the more demanding.
### Land Use and Built Development Projects

#### 3.1 Urban Development Projects including Tourist and Recreation Developments but excluding developments on operational land within the perimeter of an established airport

\(^2\) The most stringent criteria will apply
3.8 
3.8.1 Defence 
3.8.1.1 Category I Projects 
3.8.2 Category II Projects 

Development for the purpose of defence may require an Environmental Impact Statement depending on the type of the development proposed, site area and location.

3.9 
3.9.1 Homes for the Elderly 

3.9.1.1 Category I Projects 
3.9.2 Category II Projects 

Construction of an extension to home for the elderly being outside development zone and not being in an approved development plan and with:
(i) a capacity of more than 250 beds; or
(ii) to provide gross floor area of more than 10,000m²; or
(iii) a total site area of 2.5 8 ha or more.

Construction of and extension to a home for the elderly being outside development zone and not being in an approved development plan and with:
(i) a capacity of more than 60 beds; or
(ii) to provide gross floor area of more than 2,000m²;

3.10 Car-Parks 

3.10.1 Category I Projects 
3.10.2 Category II Projects 

Construction of car-parks providing more than 600 spaces.

4 DEVELOPMENT ON THE COAST AND OFFSHORE

This section refers to developments that are located within the coastal zone. The area of land and sea within the coastal zone will incorporate all coastal natural processes as well as those activities which rely on the land-sea interactions and as may be defined by any development plan.

4.1 Reclamation 
4.1.1 Category I Projects 

4.1.1.1 Reclamation of land from the sea and fastening installations to the bed of the sea or raising the level of the bed of the sea and having an area of 1 ha or more.

4.1.2 Category II Projects 

4.1.2.1 Reclamation of land from the sea or other development in the sea having an area of 1000m² and more.

4.2 Development on the coast (not being covered by other classes of project) 

4.2.1 Category I Projects 

4.2.2 Category II Projects 

4.2.2.1 The change of use of land of 1 ha or more.

4.2.2.2 Any engineering works (including coastal defences) with site area of more than 500m².
4.3  New Beach or Beach Enhancement
   4.3.1  Category I Projects
   4.3.1.1  Creation of a new sandy beach.

4.4  Dredging
   4.4.1  Category I Projects
   4.4.1.1  Dredging within a Marine Conservation Area (including candidate Marine Conservation Areas) or in an area of seabed scheduled or in any way protected under the Development Planning Act or the Environment Protection Act.

4.5  Dumping at Sea
   4.5.1  Category I Projects
   4.5.1.1  Site for the deposition of waste at sea.

5  EXTRACTIVE INDUSTRY

5.1  Hard Rock Quarries
   5.1.1  Category I Projects
   5.1.1.1  Any quarry or open-cast mining not in an area of potential mineral working in an approved plan.

5.1.1.2  Development of a quarry or open-cast mining and an extension to an existing quarry where the proposed area of new operations is more than 3 ha.

5.1.1.3  Any quarry or open-cast mining where more than 300 dwellings or a site designated for more than 300 dwellings are within 500m of the boundaries of the proposed site.

5.2  Soft Rock Quarries
   5.2.1  Category I Projects
   5.2.1.1  Any quarry or open-cast mining not in an area of potential mineral working in an approved plan.

5.2.2  Category II Projects
   5.2.2.1  Development of a quarry or open-cast mining and an extension to an existing quarry where the proposed area of new operations is 1 – 4 ha.

NOTE: A quarry on the coast is also covered by criterion 4.2 Development on the Coast whichever is the more demanding.
5.2.1.2 Development of a quarry or open-cast mining and an extension to an existing quarry where the proposed area of new operations is more than 4 ha.

5.2.2.2 A quarry or open-cast mining where more than 300 dwellings or a site designated for more than 300 dwellings is within 200m of the boundaries of the proposed site.

5.2.2.3 Any quarry or open-cast mining where the boundary of the site is within 200m of a protected site.

5.2.2.4 Any quarry or open-cast mining where the site is within the aquifer protection zone or within 500m of a bore hole.

5.3 Restoration and after use

5.3.1 Category I Projects

5.3.2 Category II Projects

5.3.2.1 Restoration and after use of existing and disused quarries not already covered by an approved landscaping / restoration scheme, where the boundary of the site is within 200m of a protected site or a site of known environmental importance.

5.4 Other Extraction Operations

5.4.1 Category I Projects

5.4.1.1 Deep drilling on land (in excess of 1 km), including geothermal drilling and deep drilling for the storage of nuclear waste material, but excluding drillings for investigating the stability of soils.

5.4.1.2 Extracting coal, petroleum, natural gas, ores or bituminous shale on land.

5.4.1.3 Extracting petroleum or natural gas offshore (an EIS is required for each production contract area).

5.4.1.4 Surface industrial installation for extraction of petroleum or natural gas.

5.4.1.5 Underground mining or peat extraction

5.4.1.6 Groundwater extraction or artificial recharge schemes where the annual volume of water abstracted or recharged is equivalent to or exceeds 10 million cubic metres.

5.4.2 Category II Projects

5.4.2.1 Drilling for water supplies where the expected supply would exceed 2 million cubic metres per annum.

5.4.2.2 Extraction of minerals by marine or fluvial (including valleys) dredging.

5.4.2.3 Artificial groundwater recharge schemes not being a development within 5.4.1.6.

NOTE: Extraction of minerals by marine dredging is also covered by criterion 4.4 whichever is the more demanding.
5.5 Mineral Processing Industries
5.5.1 Category I Projects
5.5.1.1 Erection of a cement manufacturing plant.

5.5.2 Category II Projects
5.5.2.1 Erection of a rock processing plant not within the operational site of a quarry.
5.5.2.2 Erection of a plant for concrete block (brick) production or tarmac production.
5.5.2.3 Erection of other mineral processing plants e.g. lime kilns, ready-mix.
5.5.2.4 Construction of salt pans over 1000m².

6 AGRICULTURE
6.1 Land Reclamation and Water Management
6.1.1 Category I Projects
6.1.1.1 Works for the transfer of water resources between river basins where this transfer aims at preventing possible shortage of water and where the amount of water transferred exceeds 10 million m³/year. Transfers of piped drinking water area excluded.

6.1.2 Category II Projects
6.1.2.1 Land reclamation for agriculture where the area to be modified is more than 5ha.
6.1.2.2 Construction of irrigation works for the use of treated water where:
   (i) the area to be irrigated is more than 10 ha; or
   (ii) the amount of water intended to be supplied is more than 1,000m³ in any day; or
   (iii) the site is located within the aquifer protection zone.

6.2 Livestock
6.2.1 Category I Projects
6.2.1.1 A new establishment or extension for poultry production with more than 50,000 broilers or 25,000 layers at any one time.

6.2.2 Category II Projects
6.2.2.1 Developments with a site area of more than 7500m².
6.2.2.2 A new establishment or extension for poultry production for more than 30,000 broilers or 7,000 layers at any one time.
6.2.2.3 A new establishment or extension for turkey production for more than 6,250 heads at any one time.
6.2.2.4 A new establishment or extension for rabbit production for more than 12,500 heads at any one time.
6.2.2.5 A new pig rearing establishment or extension with:
   (i) more than 500 sows or 3,000 fattening pigs (over 30kgs) at

3 Milk cows refers to milking cows (excluding replacements, calves, etc.)
any one time.

6.2.1.5 A new cow rearing establishment or extension with more than 200 milk cows' or 300 beef cows at any one time.

6.2.1.6 A new goat rearing establishment with more than 900 heads at any one time.

6.2.1.7 A new sheep rearing establishment with more than 1,200 heads at any one time.

6.2.2.6 A new cow rearing establishment or extension with more than 150 milk cows or 200 beef cows at any one time.

6.2.2.7 A new goat rearing establishment with more than 600 heads at any one time.

6.2.2.8 A new sheep rearing establishment with more than 800 heads at any one time.

6.2.2.9 Any livestock unit rearing animals such as emus, ostriches, kangaroos, wallabies or crocodiles, whether these are for consumption or otherwise and other animals, such as snails and frogs, that can create an ecological imbalance if they escape into the wild.

6.3 Aquaculture

6.3.1 Category I Projects

6.3.1.1 Any aquaculture hatchery or unit and extension to existing one rearing any form of marine organism (animal or plant), and including penning, and having:

(i) facilities covering an area of 2 ha or more at sea (be it at the surface or on the sea-bed); or

(ii) intended for the production of more than 100 tonnes of fish per year and within 2 km of the coast.

6.3.2 Category II Projects

6.3.2.1 All aquaculture hatcheries or units and extensions to existing one rearing any form of marine organism (animal or plant), and including penning, having facilities at sea (whether on the surface or on the sea-bottom), more than 2 km from the coast and covering an area of more than 2 ha.

6.3.2.2 Aquaculture hatcheries or units and extension to existing ones rearing any form of marine organism (animal or plant), and including penning, having facilities at sea (whether on the surface or on the sea-bottom), more than 2 km from the coast and covering an area of more than 2 ha.

6.3.2.3 All aquaculture hatcheries and rearing farms and extension to existing ones with all facilities on land covering an area of land of 1 ha or more, or intended for the production of more than 50 tonnes of fish or equivalent other produce per year not being a development on the coast within 4.2.
6.4 Afforestation and Deforestation

6.4.1 Category I Projects
6.4.1.1 An afforestation scheme of more than 25 ha.

6.4.1.2 Deforestation (including felling and uprooting of trees) in an area of more than 10 ha for the purposes of conversion to another type of land use.

6.4.2 Category II Projects
6.4.2.1 An afforestation scheme of 5 ha or more.

6.4.2.2 Deforestation (including felling and uprooting of trees) in an area of more than 3 ha for the purposes of conversion to another type of land use.

NOTE: Afforestation/deforestation projects affecting protected trees, copses and woodlands are also covered by criterion 9 – Development affecting natural and cultural heritage – whichever is the more demanding.

6.5 Greenhouses and Protected Crops

6.5.1 Category I Projects
6.5.1.1 Greenhouses or structures to protect crops with an area of more than 1 ha.

6.5.2 Category II Projects
6.5.2.1 Greenhouses or structures to protect crops with an area of more than 5,000 m² and where the total area of greenhouses within 500 m of the site is more than 5 ha.

6.6 Rural Land Holdings

6.6.2 Category II Projects
6.6.2.1 Projects for the restructuring for rural land holdings where the restructuring will involve the change of use of 1 ha or more of land.

6.7 Horse Stables

6.7.1 Category I Projects
6.7.1.1 Horse stables with more than 150 horses.

6.7.2 Category II Projects
6.7.2.1 Horse stables with more than 50 horses.

7 ENERGY INDUSTRY

7.1 Refineries

7.1.1 Category I Projects
7.1.1.1 Construction of a gas or crude-oil refinery.

7.1.2 Category II Projects

7.2 Coal and Allied Works

7.2.1 Category I Projects
7.2.1.1 Installation for the gasification and liquefaction of coal or bituminous shale.

7.2.1.2 Industrial briquetting of coal and lignite.

7.2.2 Category II Projects
7.2.2.1 Coke Ovens (dry coal distillation)

7.3 Electric Power Station

7.3.1 Category I Projects
7.3.1.1 Construction of thermal power station and other combustion installation

7.3.2 Category II Projects
7.3.2.1 Construction or extension of a thermal power station and other combustion
with an output of more than 50 MW.

installation for the generation of power for sale to consumers and not being development falling within 7.3.1.1.

7.4 Nuclear Energy
7.4.1 Category I Projects
7.4.1.1 Construction and/or dismantling and decommissioning of nuclear power stations or other nuclear reactors.

7.4.1.2 Installation for the processing or reprocessing of irradiated nuclear fuel.

7.4.1.3 Installation for the accumulation and/or processing of radioactive wastes, including fission waste and irradiated fissile materials.

7.4.1.4 Installation for the permanent storage or final disposal of radioactive wastes or irradiated nuclear fuel.

7.4.1.5 Installation designed for the production or enrichment of nuclear fuel

7.5 Renewable Energy Production
7.5.1 Category I Projects

7.5.1.2 Installations for hydroelectric energy production.

7.6 Storage of Gases, Fossil Fuels and Petroleum
7.6.1 Category I Projects
7.6.1.1 Surface and underground storage of combustible gases including natural gas with a capacity of more than 100,000m³.

7.6.1.2 Surface storage of fossil fuels on a site of 2ha or more.

7.6.1.3 Storage of petroleum products with a capacity of more than 100,000m³.

7.6.2 Category II Projects
7.6.2.1 Surface and underground storage of combustible gases including natural gas with a capacity of more than 50,000m³.

7.6.2.2 Surface storage of fossil fuels on a site of more than 5,000m².

7.6.2.3 Storage of petroleum products where the storage capacity is between 50,000m³ and 100,000m³ and where:
   (i) the site area is over 20,000m²; or

---

4 Nuclear power stations and other nuclear reactors cease to be such an installation where all nuclear fuel and other radioactively contaminated elements have been removed permanently from the installation site.
### Electric Transmission

| 7.7.1 | Electric Transmission  
Category I Projects  
7.7.1.1 The transmission of electrical energy by overhead cables at high voltage over 220kV and over more than 1km. | 7.7.2 | Electric Transmission  
Category II Projects  
7.7.2.1 The transmission of electrical energy by overhead cables with a voltage of over 100kV and over more than 1km. |

#### Asbestos

| 8.2.1 | Asbestos  
Category I Projects  
8.2.1.1 Construction of an installation for the extraction, treatment and processing of asbestos and products containing asbestos.  
8.2.1.2 Construction of an installation for the manufacture of asbestos cement.  
8.2.1.3 Construction of an installation for the manufacture of brake linings with a capacity of 50 tonnes or more per year.  
8.2.1.4 Construction of an installation for the manufacture or production of other products containing asbestos with a consumption of over 200 tonnes or more of asbestos per year. | 8.2.2 | Asbestos  
Category II Projects  
8.2.2.1 The use of asbestos in manufacture or production of products not being a development within 8.2.1.1 to 8.2.1.4. |

#### Chemical Installations

| 8.3.1 | Chemical Installations  
Category I Projects  
8.3.1.1 Construction of an integrated chemical installation, i.e. an installation for the manufacture on an industrial scale of substances using chemical conversion or physical processes, in which several | 8.3.2 | Chemical Installations  
Category II Projects |

#### Industrial Installations

- Installation for storage and transport of gas, steam or hot water over a network having more than 1km of pipe work.
- Industrial installations for the production of steam and hot water.
- Construction of a new fuel servicing station.
units are juxtaposed and are functionally linked to one another and which are:
(i) for the production of basic organic chemicals;
(ii) for the production of basic inorganic chemicals;
(iii) for the production of phosphorus-, nitrogen-, or potassium-based fertilisers (simple compound fertilisers);
(iv) for the production of basic plant health products or biocides;
(v) for the production of basic pharmaceutical products using a chemical or biological process;
(vi) for the production of explosives.
(vii) for the production of any other product not listed above but which requires similar treatment.

8.3.1.2 Installations for the storage of chemical products with a capacity of 100,000 m³

8.2.2.1 Installations for the storage of chemical products with a capacity of over 20,000 m³

8.4 - 8.10 OTHER INDUSTRIES

General Criteria

The industrial developments listed below are in Category I where the following circumstances apply:

(a) the industrial operations will require the disposal of significant quantities of liquid, gaseous or solid wastes; or

(b) significant quantities of chemical or combustible material are to be stored on site; or

(c) development covering a site of 2ha or more is:
   (i) to be located in an area not designated for the type of industry in an approved development plan; or
   (ii) more than 300 dwellings or a site for more than 300 dwellings are within 200 m of the site boundaries; or
   (iii) the boundary of the site is within 200 m of a protected site; or
   (iv) within the aquifer protection zone or within 500 m of a bore hole.

All industrial developments listed below not covered by the above conditions and with a site area of more than 2,000 m² are in Category II.

8.4 Processing of metals
8.4.1 Category I Projects
8.4.1.1 Roasting, pelletizing or sintering of ores.
8.4.1.2 Installations for the production or processing of ironworks or steel works

8.4.2 Category II Projects
B 1745

(continued or secondary fusion) including continuous casting, a foundry, forge, smitheries with hammers, and drawing plant or hot rolling mills not being works falling within 8.4.1.1.

8.4.1.3 The pressing, drawing, or stamping of large castings.

8.4.1.4 Installations for the production or processing (including melting, refining, drawing and rolling) of non-ferrous metals, other than precious metals.

8.4.1.5 Installations for the surface treatment and coating of metals and plastic materials using an electrolytic or chemical process.

8.4.1.6 Boiler-making or manufacturing of reservoirs, tanks and other sheet-metal containers.

8.4.1.7 Shipyards.

8.4.1.8 Manufacture or assembly of motor vehicles or manufacturing motor-vehicle engines.

8.4.1.9 Installations for the construction or repair of aircraft.

8.4.1.10 Swaging by explosives.

8.4.1.11 Installations for the application of protective fused metal coats.

8.4.1.12 Manufacture of railway equipment.

8.5 Glass and Ceramics

8.5.1 Category I Projects

8.5.1.1 Installations for the manufacture of glass including glass fibre.

8.5.1.2 Installations for the manufacture of ceramic products by burning, in particular roofing tiles, bricks, refractory bricks, tiles, stoneware or porcelain.

8.6 Chemical Industry

8.6.1 Category I Projects

8.6.1.1 Treatment of intermediate products and production of chemicals not being a development within 8.6.

8.6.1.2 Production of pesticides or pharmaceutical products, paints, varnishes, elastomers or peroxides.
8.6.1.3 Storage of chemical or petrochemical products.

8.7 Food Industry
8.7.1 Category I Projects
8.7.1.1 Manufacturing of vegetable or animal oils and fats.

8.7.1.2 Packing or canning of animal or vegetable products.
8.7.1.3 Manufacture of dairy products.
8.7.1.4 Brewing or malting.
8.7.1.5 Confectionery or syrup manufacture.
8.7.1.6 Installations for the slaughter of animals.
8.7.1.7 Installations for the manufacture of industrial starch.
8.7.1.8 Fish meal or fish-oil industry.
8.7.1.9 Sugar factory.

8.8 Textile, Leather, Wood and Paper Industries
8.8.1 Category I Projects
8.8.1.1 Wool scouring, degreasing and bleaching factory.

8.8.1.2 Manufacture of fibre board, particle board or plywood.
8.8.1.3 The manufacture of pulp, paper or board.
8.8.1.4 Fibre dyeing factory.
8.8.1.5 Cellulose-processing and production installation.
8.8.1.6 Tannery or leather dressing industry.

8.9 Rubber Industry
8.9.1 Category I Projects
8.9.1.1 Manufacture and treatment of elastomer-based products.

8.10 Other Projects
8.10.1 Category I Projects
8.10.1.1 Manufacture, packing, loading or placing in cartridges of gunpowder or other explosives other than for local use i.e. the making of fireworks for local festivities.
8.10.2 The storage of scrap iron including scrap vehicles.

8.10.3 A car breakers yard, a test bench for engines, turbines or reactors.

8.10.4 A knackers yard.

8.10.5 Installations for smelting mineral substances including the production of mineral fibres.

8.10.6 Installations for the manufacture of artificial mineral fibres.

8.10.7 Installations for the recovery or destruction of explosive substances

9. DEVELOPMENTS AFFECTING NATURAL AND CULTURAL HERITAGE

Any development or activity on behalf of which a scheduled property, conservation area, or other property having heritage value, whether natural or cultural, could be destroyed or its protected status rescinded, may require an environmental impact assessment, the scale of which shall be determined by the Director of Environment Protection, taking into consideration the criteria in Schedule IB.

10. CHANGES OR EXTENSIONS TO APPROVED PROJECTS

Any change or extension of development which would result in the development listed in Category I or II, already authorised, executed or in the process of being executed which may have significant adverse effects on the environment including:
(a) an increase in size greater than 25% or
(b) an amount equivalent to 50% of the appropriate threshold
shall be required to undertake an environmental impact assessment, the scale of which shall be determined by the Director of Environment Protection, taking into consideration the criteria in Schedule IB.

11. RE-ACTIVATION OF CATEGORY I PROJECTS

Projects in Category I, undertaken exclusively or mainly for the development and testing of new methods or products and not used for more than two years, shall be subject to an environmental planning statement prior to re-use.

12. CUMULATIVE EFFECTS OF PROJECTS

Projects not included in Category I and II and which normally do not require an assessment of environmental impacts but, due to cumulation with other projects can produce significant environmental or social effects, may be required to undertake an environmental impact statement or an environmental planning statement if the Director of Environment Protection is of the opinion that significant impacts are likely to occur, taking into consideration the criteria in Schedule IB.
SCHEDULE IB

Criteria for determining whether a development is likely to have significant effects on the environment

1. Characteristics of the proposed development
   The characteristics of proposed development, in particular, to:
   - the size of the proposed development;
   - the cumulation with other developments;
   - the use of natural resources;
   - the production of waste;
   - pollution and nuisances;
   - the risk of accidents, having regard to substances or technologies used.

2. Location of proposed development
   The environmental sensitivity of geographical areas likely to be affected by proposed development, having regard, in particular, to:
   - the existing land use;
   - the relative abundance, quality and regenerative capacity of natural resources in the area;
   - the absorption capacity of the natural environment, paying particular attention to the following areas:
     (a) wetlands;
     (b) coastal zones;
     (c) mountain and forest areas;
     (d) nature reserves and parks;
     (e) areas classified or protected under other legislation, designated special protected pursuant to LN 79/2006 and LN 311/2006;
     (f) areas in which the environmental quality standards laid down in legislation of the EU have already been exceeded;
     (g) densely populated areas;
     (h) landscapes of historical, cultural or archaeological significance.

3. Characteristics of potential impacts
   The potential significant effects of proposed development in relation to criteria set out under paragraphs 1 and 2 above, and having regard in particular to:
   - the extent of the impact (geographical area and size of the affected population);
   - the transfrontier nature of the impact;
   - the magnitude and complexity of the impact;
   - the probability of the impacts;
   - the duration, frequency and reversibility of the impact.
SCHEDULE II

Form of notice of an Environmental Impact Assessment to be used for newspaper advertisement and site notice by an applicant who submits an environmental impact statement or environmental planning statement.

[MEPA LOGO]

DEVELOPMENT PLANNING ACT (Cap. 356)
Environmental Impact Assessment Regulations, 2003

NOTICE OF APPLICATION FOR DEVELOPMENT PERMISSION ACCOMPANIED BY AN ENVIRONMENTAL IMPACT STATEMENT [or Environmental Planning Statement, as the case may be]
(to be published in a newspaper and displayed on or near the site)
Proposed development at [address or location of the development]
[Name of applicant] gives notice that an application [PA No.] dated [date] has been made to the Malta Environment and Planning Authority for development permission to [description of development] and that the application is accompanied by an environmental impact statement [or environmental planning statement, as the case may be].
Members of the public may inspect copies of:
1. the application
2. the plans
3. the environmental impact statement [or environmental planning statement, as the case may be]
4. and other documents submitted with the application
at the offices of the Malta Environment and Planning Authority [other addresses such as the local council offices may also be included] during office hours until [date giving a period of 21 days, beginning with the date when the notice is first displayed on or near the site, or a period of 14 days, beginning with the date when the notice is published in a newspaper (as the case may be)]
Members of the public may obtain copies of the environmental impact statement [or environmental planning statement, as the case may be] from [address from where copies of the environmental statement may be obtained] so long as stocks last, at a charge of [amount of charge].

Anyone who wishes to make representations about this application should write to the Director of Environment Protection, Malta Environment and Planning Authority at St Francis Ravelin, Floriana CMR 01 by [date giving a period of 21 days, beginning with the date when the notice is first displayed on or near the site, or a period of 14 days, beginning with the date when the notice is published in a newspaper (as the case may be)]
Date ..............................
## SCHEDULE III
SCHEDULE OF FEES FOR REGISTRATION AS AN ENVIRONMENTAL IMPACT ASSESSMENT CONSULTANT

The following fees shall apply for registration under one of the hereunder listed categories of environmental impact assessment consultants:
