

Mr. Director,

As a public directly affected by the expansion of the 10 lignite quarries by SC CEO SA in Gorj County, we ask you for the following:

- 1. Urgently reopen public debate for the 10 lignite quarries.
- 2. Organize at least one public debate for the 10 careers in the villages of Rosia de Jiu, Rogojel and Timisoara

REASONS FOR REQUEST

The public debate was held illegally in breach of the LG.86/200 ratifying the Aarhus Convention. Public debates were not announced by a new accessible means. We have not learned in due time about the organization of these public debates. Our access to the Internet and to the press is equal to zero in the places where we live. I have never taken note of the documentation that we should have studied with a view to participating in the public debate and forming an opinion. We cannot get to know from websites because we do not have Internet and computers. We were unable to go to your premises because we did not know that such a procedure was in progress, nor did we have any technical and financial means to go to Targu-Jiu.

The debates have not been organized in an accessible space so that we can take part. For the nearest careers, Rosia career and Pinos career, the debates are open at the town hall of Farcaşti, which is a great distance from our villages, so that even if we had found out that such a debate was being held, we could still not have reached. Much of us are old and sick as a result of massive air and water pollution in the area, we do not have transport means, we do not have financial resources because we do not have services or we have pensions that are too low.

For the other careers, all the debates have been organized very far away,

so we are unable to go to them and give our opinion. Also for these careers, we have no way of taking the documentation to study it. In order to respect our right to participate in these decisions as the public directly affected by the expansion of these careers, Please reorganize public debates in the area where our villages are located, villages that are far away from the town hall of Farcasesti We specify that there are trained people with mining experience, who have been living in the area for decades and who can make an effective contribution to clarifying how the exploitation of lignite must be carried out and how it is efficient.

Affected public,

Signed by hand by the following persons:
