The activities of the Republic of Belarus on the first cycle for reporting under the Convention and on SDG indicator 6.5.2

Dubianok Sniazhana
Deputy Director for Science
Central Research Institute for Complex Use of Water Resources (CRICUWR)
Ministry of Natural Resources and Environmental Protection of the Republic of Belarus
The main areas of activities of the Ministry of Natural Resources and Environmental Protection in the field of protection and use of water resources

1. Implementing a unified state policy in the field of environmental protection and rational use of water resources. Coordination of activities of other governmental agencies, local executive and regulatory bodies in the field of environmental protection and rational use of natural resources.

2. Development of the country’s mineral resource base, including groundwater resources (fresh and mineral water).

3. Hydrometeorological activity.

4. Surface and groundwater monitoring, including transboundary monitoring.

5. Analytical control of the quality of wastewater discharges by enterprises.

6. Development of strategies, river basin management plans, formation of the state water cadastre.

7. Realization of tasks and monitoring of progress in achieving goals 6.3-6.6 SDG 6.

8. International cooperation in the field of environmental protection and rational use of natural resources, including the implementation of international agreements.
