Main outcomes of the UNECE WPLA workshop «Real estate rights’ and cadastre registration as an element for development of land management system» in Moscow

June, 25–26
2015

Olga Boronenko
Head of Division on Cooperation with Non-governmental and International Organizations
The workshop «Real estate rights’ and cadastre registration as an element for development of land management system» was arranged by the Federal Service for State Registration, Cadastre and Cartography of the Russian Federation in close cooperation with UNECE WPLA in June 2015 in Moscow.
Main outcomes of the workshop

• The purpose of the workshop was to share experience and best practices in registration and cadastral systems enhancement within the framework of land administration.

• The seminar covered issues of registration and cadastral systems development, use of information technologies aimed at improving the mentioned systems, as well as issues of information interaction between subjects of land administration.
Main outcomes of the workshop

In total 123 delegates from 25 countries participated in the workshop.
Main outcomes of the workshop

- The meeting of the WPLA Bureau was held on June 24, 2017.

The workshop consisted of:

- **Opening Session**: Introduction
- **Session I**: Administrative, organizational and legal regulation of the real property rights registration and cadastre system.
- **Session II**: Identification of real property units. Data structure and data quality of real property units.
- **Session III**: Information technologies for registration activities support. Open data and data security.
- **Session IV**: Informational cooperation of administrative governmental and municipal authorities for territory development.
- **Session V**: Activity of the UNECE Working Party on Land Administration
- **Final Session**
Main outcomes of the workshop

• Mr. Igor Vasiliev, Former Head of Rosreestr, and other Russian government representatives demonstrated the progress of the Russian land administration project and its strong commitment to implement modern property market services and create a favorable environment for investment on real property in the country.

• Besides, the progress of the Russian cadastre system and its long and close cooperation with the World Bank was presented.
