Sample survey of enterprises and public entities

"Report on cost of production and sales" for 2016 within the UNIDO project
"Improvement of industrial statistics and development of statistical indicators for the analysis of industrial development in the CIS countries"

Speaker:
Chief specialist N. Zakharova, NSC of the Kyrgyz Republic
Department of economic statistics and national accounts
2 - 4 October 2018.
• The purpose of the one-off survey - updating of the cost structure (intermediate consumption)

• Last sample survey “Report on cost of production and sales" in Kyrgyzstan was conducted in 2003.
Two forms were used in the survey:

1. "1-Budget" "Information about the different types of expenditures of budget organizations and institutions";
2. "1-Expenditure" “Information on the costs of production and sale of products (goods, work-in-progress, services)"

The "List of economic activities in the input-output framework of the SNA and list of goods and services under each activity“ was provided as an attachment.
Share of enterprises in the one-off survey by economic activity type, as a percentage of the total (2418)

- Industry (690): 28.56%
- Agriculture (94): 8.62%
- Constructions (135): 5.41%
- Trade (163): 13.33%
- Transport (90): 13.43%
- Postal services (3): 3.11%
- Hotels and restaurants (76): 3.11%
- Information and communication (89): 3.91%
- Real estate (325): 6.71%
- Public administration (321): 5.61%
- Education (130): 0.10%
- Health (209): 0.70%
- Culture and art (76): 0.10%
- Other support services (17): 0.10%
Share of surveyed enterprises

- Surveyed budget organizations (638)
- Not surveyed budget organizations (3362)
- Surveyed non-budget enterprises (1780)
- Not surveyed enterprises (1033)
Cost structure of goods and services and economic activity types

The report of the Ministry of Finance of the Kyrgyz Republic, re-coded according to the fields of the survey form and economic activity types was used to calculate the cost structure of budget organizations.

Annual data from the current statistical reports were used for the cost structure of the financial sector.

Annual data from the form No. 4-FIN "On the receipt and use of financial resources" were used for the cost structure of public organizations.
Current situation:

The work on SUT experimental calculations are undergoing (Supply-Use tables):
1. The estimates for the components of the supply table (ST) by sectors of the economy, taxes on products, subsidies, trade and transport margins by economic activity type are completed.
2. The estimates of household consumption, individual and collective consumption of government, NPISHs, gross fixed capital formation, inventories, exports and imports of goods and services are completed.
3. The estimates of the structure of intermediate consumption in the use tables (UT) by economic sectors is under way.
Plans and objectives:

1) It is planned to finish the experimental calculations for the SUT for 2016 until the end of 2018 (advice and practical assistance from international experts is needed);

2) Compile of Supply-Use tables on annual basis.
Thank you for your attention!
