Developing Gender Statistics in Georgia

Neuchâtel, 15-17 May, 2019
Development of gender statistics comprises the following aspects:

- Improving quality of data
- Increasing the number of available sex-disaggregated indicators
- Strengthening dialogue with users
- Improving use of statistics
Developing Gender Statistics in Georgia

Improved Communication with Users

✓ 12 training events: for Media, NGOs, Academia, Government

- 3 days training
- Outside of Capital city Tbilisi
- 25 Participants in each
Developing Gender Statistics in Georgia

Improved Communication with Users

- 4 training events for representatives of municipalities of Georgia (appointed persons on gender issues in every local self-government, 65 municipalities + 10 persons in Tbilisi)
Topics discussed during the workshops:

- Development of Statistical System in Georgia
- Status of production and use of gender statistics in Georgia
- Overview of Minimum Set of Gender Indicators
- Use of Gender statistics data (publication “Women and Men in Georgia”)
- Use database (PC Axis).
Practical Exercise:

Working in groups – participants were divided into groups

Had a task to search for data in GeoStat database and analyse it (e.g. population, education, employment and etc.)
Developed a new edition of “Women and Men in Georgia 2018” (covering the years 2016-2017 and reflecting SDG gender indicators).

“Women and Men in Georgia 2018” is the 10th statistical publication dedicated to gender equality challenges.

Under tables and graphs are indicated relevant SDG indicators.

The new edition includes a number of new Indicators on Asset Ownership and Entrepreneurship and on Violence against Women.
Improved visualization & presentation of gender statistics on the GEOSTAT webpage. Gender web-portal has been uploaded to the Geostat webpage. All data related to gender statistics have been uploaded to the portal. Website is very useful for users.
Developing Gender Statistics in Georgia

Innovation of the Publication:

Results of the National Survey on Violence Against Women in Georgia

Results of the Survey on Measuring Asset Ownership and Entrepreneurship from a Gender Perspective

Identification of SDG Indicators in respect to tables of publication
Developing Gender Statistics in Georgia

- The data gaps were mostly related to absence of different surveys
- Production of gender statistics has been very positively influenced by the active nationalization process of SDG indicators in the country
- New Statistical Surveys (on Violence Against Women in Georgia, MICS, Survey on Measuring Asset Ownership and Entrepreneurship)
