“SDG. Ukraine” National Report

Mid-term and long-term national and local development strategies/programs
1. High-Level Inter-agency Task Force was established for SDG implementation.

2. 17 subgroups were established as part of the High-Level Inter-agency Task Force.

3. National consultations have been conducted (about 300 participants: government agencies, UN agencies, other international organizations, scientific community, non-governmental organizations, experts).

4. Consultations have been conducted in 10 regions (about 700 participants: local government authorities, international and non-governmental organizations).

5. “Sustainable Development Goals. Ukraine” National Report has been prepared, which identifies the guides to be taken into account in the future for strategic planning of the sectoral policies and programs of the line ministries.
Development of SDG National Indicators

“Sustainable Development Goals of Ukraine” National Report provides the goals and tasks which shall integrate the efforts for economic growth, social fairness and environmental management.

SDG tasks have been developed on the basis of the key priorities for attaining the goal.

For studying the progress towards achievement of the national SDGs, a system of key indicators has been established that should form the basis for monitoring.

When selecting the national indicators for SDG achievement, an attempt has been made to find a balance between a benefit to obtain additional information important for national context, and an additional reporting burden that arises in connection with the preparation of these indicators. Furthermore, a preference was given to the multipurpose indicators to minimize a number of indicators.
Development of SDG National Indicators

Priority is given to the indicators, which statistics are permanently collected and developed as part of the official statistical system in accordance with the established standards and methodology.

For continuous regular monitoring and appropriate level of data disaggregation, the established indicator system should be filled with both statistics and administrative data of the central government agencies responsible for collection and development of the certain and assigned indicators.

An important component of SDG monitoring is a preparation of metadata for the relevant indicators. This approach is necessary for correct interpretation of the sources, methods of collection and compilation of SDG indicators.
SDG TASKS

Global tasks - 169
National tasks - 86

SDG INDICATORS

Global tasks - 241
National tasks - 172
Development of SDG National Indicators

17 goals
86 tasks
172 indicators
among them:
73 – State Statistics Committee (State Statistics Committee + others)
11 each – Ministry of Economic Development, Ministry of Regional Development
10 – Ministry of Environment and Mineral Resources
8 each – IdSS NASU, Ministry of Infrastructure
7 – Ministry of Health, 6 – GPO, 5 – MES,
56 – other central government agencies

124 indicators for which meta description has been determined
among them:
66 – State Statistics Committee (State Statistics Committee + others)
8 – IdSS NASU
7 each – Ministry of Infrastructure, Ministry of Environment and Mineral Resources
6 – GPO
5 each – MES, Ministry of Regional Development
4 – Ministry of Health
2 – Ministry of Economic Development
31 – other central government agencies

Reviewing the available information base for monitoring of progress of SDGs appointed for Ukraine shows:

➢ basic metadata can be presented for 124 indicators, are 72.1% of total, appointed for monitoring of task progress;

➢ metadata remain indefinite for 48 indicators, among which information for 20 indicators should be obtained by implementing / conducting new studies.

“Sustainable Development Goals: Ukraine” National Report

- represents a vision of the guides for achievement of the Sustainable Development Goals by Ukraine, which were approved by the UN Sustainable Development Summit 2015;
- is focused on a human being and improvement of quality of his/her life;
- sets the strategic framework of the national development based on “no one left behind” principle (taking into account the needs of the most vulnerable and poorest population);
- a tool towards the EU (SDG implementation will contribute to implementation of the international commitments by Ukraine and creation of the real prerequisites for Ukraine to become a full member of the European Union)
SDG Adaptation in Ukraine

- Publication and distribution of the “Sustainable Development Goals: Ukraine” National Report

- Annual Address of the President of Ukraine to the Supreme Council of Ukraine “On the Internal and External Situation of Ukraine in 2017” has a section “Sustainable Development Goals for Ukraine till 2030”

- Medium-Term Government Priority Action Plan up to 2020 reflects the SGDs

- The Government decisions approved a number of strategic documents which provisions are in agreement with the Sustainable Development Goals, particularly the Strategy for the Development of Small and Medium-sized Entrepreneurship in Ukraine until 2020, the Concept of State Climate Change Policy Implementation until 2030
SDG Progress Monitoring

For monitoring, it is necessary to determine first of all:

- Who is responsible for implementation of specific tasks and when should they be implemented?
- Who are the stakeholders?
- Opportunities for cooperation.
- What needs to be done?

It is advisable to create a **National Reporting Platform for Indicators (SDG NRP)**. SDG NRP can consist of three components: i) portals for data collection or provision, enabling the different providers (responsible central government agencies) to provide/place data; ii) data base for indicator compilation; iii) portals for data dissemination, for which the users can find the tables, documents (methodic, methodological, etc.) and publications. Establishment of a data dissemination portal can also become a part of the communications strategy.
Perspectives

- The Government Regulatory Document on coordination of SDG monitoring
- Revision of indicators for which metadata have not been defined
- Additional surveys conducted
- Quality assessment
- Communication
- Establishment of the National Reporting Platform for SDG Indicators
- Determination of indicators for subnational level
- Preparation of the National SDG Report on all components every 5 years and thematic reports every year
THANK YOU FOR YOUR ATTENTION!
