The Generic Activity Model for Statistical Organisations

GAMSO
What is the GAMSO?

The Generic Activity Model for Statistical Organisations (GAMSO) extends and complements the Generic Statistical Business Process Model (GSBPM) by adding the other activities needed to support statistical production.
## GAMSO

**Strategy & leadership**
- Define vision
- Govern & lead
- Manage strategic collaboration & cooperation

**Capability management**
- Plan capability improvements
- Develop capability improvements
- Monitor capabilities
- Support capability implementation

**Corporate support**
- Manage business & performance
- Manage finances
- Manage human resources
- Manage IT
- Manage statistical methodology
- Manage information & knowledge
- Manage consumers
- Manage data suppliers
- Manage buildings & physical space
- Manage quality

**Production**
- Generic Statistical Business Process Model

*Released in March 2015*

Capability Management =
- Research
- Development
- Innovation
- Modernisation
A few words about capabilities

- Combination of organisation, people, processes, methodology, standards and technology
Uses of the GAMSO

- Cost management
- Time management
- Documentation
- Communication
- Capability development
- …
GAMSO Maintenance

Modernisation Committee on Standards

Discussion Forum

REVIEW
The GAMSO will be reviewed in mid-2016
Revisions will be accepted if:
  • There is widespread agreement
  • There is a strong business case
Balance between stability and relevance
