Components of wood products groups

(Based on Joint Forest Sector Questionnaire nomenclature, 2001)

The important breakdowns of the major groups of primary forest products are diagrammed below. In addition, many sub-items are further divided into softwood or hardwood. These are all the roundwood products, sawnwood, veneer sheets and plywood. Items that do not fit into listed aggregates are not shown. These are wood charcoal, chips and particles, wood residues, sawnwood, other pulp and recovered paper.

Special chapters in former Forest Products Annual Market Reviews

Note to readers: We have found that some chapters of the Review have a longer life than the Annual Market Review. The following is a listing of all the special chapters, including their most important sections, in order to give an idea of their contents. Back issues are available on the Timber Committee website or through the secretariat. In 2003 we stopped including special chapters.

Chapter 3  "Market effects of wood promotion", 11 pages
- Market and market effects
- How to reach market effects by wood promotion
- Wood promotion of recent years is a success story!
- Successful organizations
- Is wood promotion in danger?
- References

Chapter 4  "Trade links strengthening as Turkey's forest sector is modernized. Turkey's forest products markets", 12 pages
- General economic development
- Forest resources
- Institutional framework
- Roundwood market
- Forest products industries
- Foreign trade of wood products
- Wood furniture
- Paper industry
- Prospects for Turkey's wood markets

Chapter 5  "Chile's forest products markets - a plantation success story", 8 pages
- General economic developments
- Forest resources
- Institutional framework for forest and wood industries
- Wood industry – production and consumption
- Trade of wood and wood products
- Prospects for the future of the Chilean wood industry
- Conclusion
- References

Chapter 3  "Romania's Forest Products Markets", 12 pages
- General economic developments
- Forest resources
- Institutional framework – forest policy
- The effects of the transition process
- Forest products industry – production and consumption
- Trade of wood and wood products
- Integration into the EU
- Prospects for wood industry
Chapter 4  "Influence on Japanese demand for wood products", 10 pages

- Background
- Wood use trends
- General trends impacting wood use
- Summary
- References

Chapter 3  "Effects of the December 1999 storms on European timber markets", 15 pages

- Damage magnitude: the equivalent of 2 years' harvest in 3 days!
- Market effects: potential enormous imbalances mitigated through sector solidarity
- Comparisons with 1990 market effects: similar problems and solutions
- Assistance by governments: quick and multi-dimensional responsiveness
- Positive outcomes?
- Conclusion

Chapter 4  "Poland's forest products markets", 12 pages

- General economic developments
- Forest resources
- Institutional framework for forest and forest industries
- Effects of the transition process
- Integration into the EU
- Forest industry – production and consumption
- Trade of wood and wood products
- Certified forest products
- Prospects for wood industry

Chapter 5  "China's forest products markets", 19 pages

- General socio-economic development
- Forest resources
- Institutional framework
- Analysis and development of production of China's major forest products, 1981 to 1999

The Forest Products Annual Market Review, 2003-2004 provides a comprehensive analysis of the UNECE region, including the Commonwealth of Independent States, Europe and North America. The Review covers forest products from the forest to the final consumer, i.e., from roundwood and primary-processed products to value-added products. Each issue includes extensive statistical information combined with an analysis of trends and developments. Standard statistics-based chapters are presented on sawn softwood, sawn hardwood, wood-based panels, wood raw materials and pulp and paper. Other annual chapters analyze markets for certified forest products, value-added wood products and tropical timber.

This year's Review includes a special chapter covering policy implications of market developments. This chapter reviews current policy issues including forest law enforcement and governance, forest certification, climate change, industry competitiveness, wood energy promotion, tariff and non-tariff barriers, phytosanitary regulations, research and development-related policies and the sound use of wood.

The Forest Products Annual Market Review and its predecessor publications have been published annually since 1948 by the UNECE/FAO Timber Branch. Its goal is to provide comprehensive statistics and analysis on forest products markets with an emphasis on policy implications. This information is intended for policy makers, researchers, investors and forest products marketing specialists in governments, research institutions, universities and the private business sector. This Review is intended for use as a background document for the annual UNECE Timber Committee Market Discussions.

Further information about forest products markets, as well as information about the UNECE Timber Committee and the FAO European Forestry Commission is available on the website www.unece.org/trade/timber. Information about the UNECE may be found at www.unece.org and information about FAO may be found at www.fao.org.
