## 1. Introduction.

We are pleased to announce that the D07B directory has been produced in compliance with existing procedures and we consider it satisfactory for implementation.

## 2. General remark

The DMRs that have been approved for implementation are not up to the same quality that has been previously obtained. In particular there were problems of spelling and a segment collision. The ICG feels that the percentage of errors is growing in this respect. For example the error rate for D.06B was 4% for some 71 DMRs, The rate for D.07A was 15% for some 91 DMRs whereas in D.07B there was an error rate of 34% for some 38 DMRs.

**RECOMMENDATION 1:** Take urgent steps to bring back the same level of quality that has previously been obtained.

## 3. DMRs installed in the D07B directory release.

See attached file: AUDIT-REPORT-D07B-Part-2-of-2.xls that contains the complete list of the DMRs installed and the error processing carried out against them.
