

ISO PC/305 & ISO PC/318

Supporting SDG 6

The Sanitation Crisis*

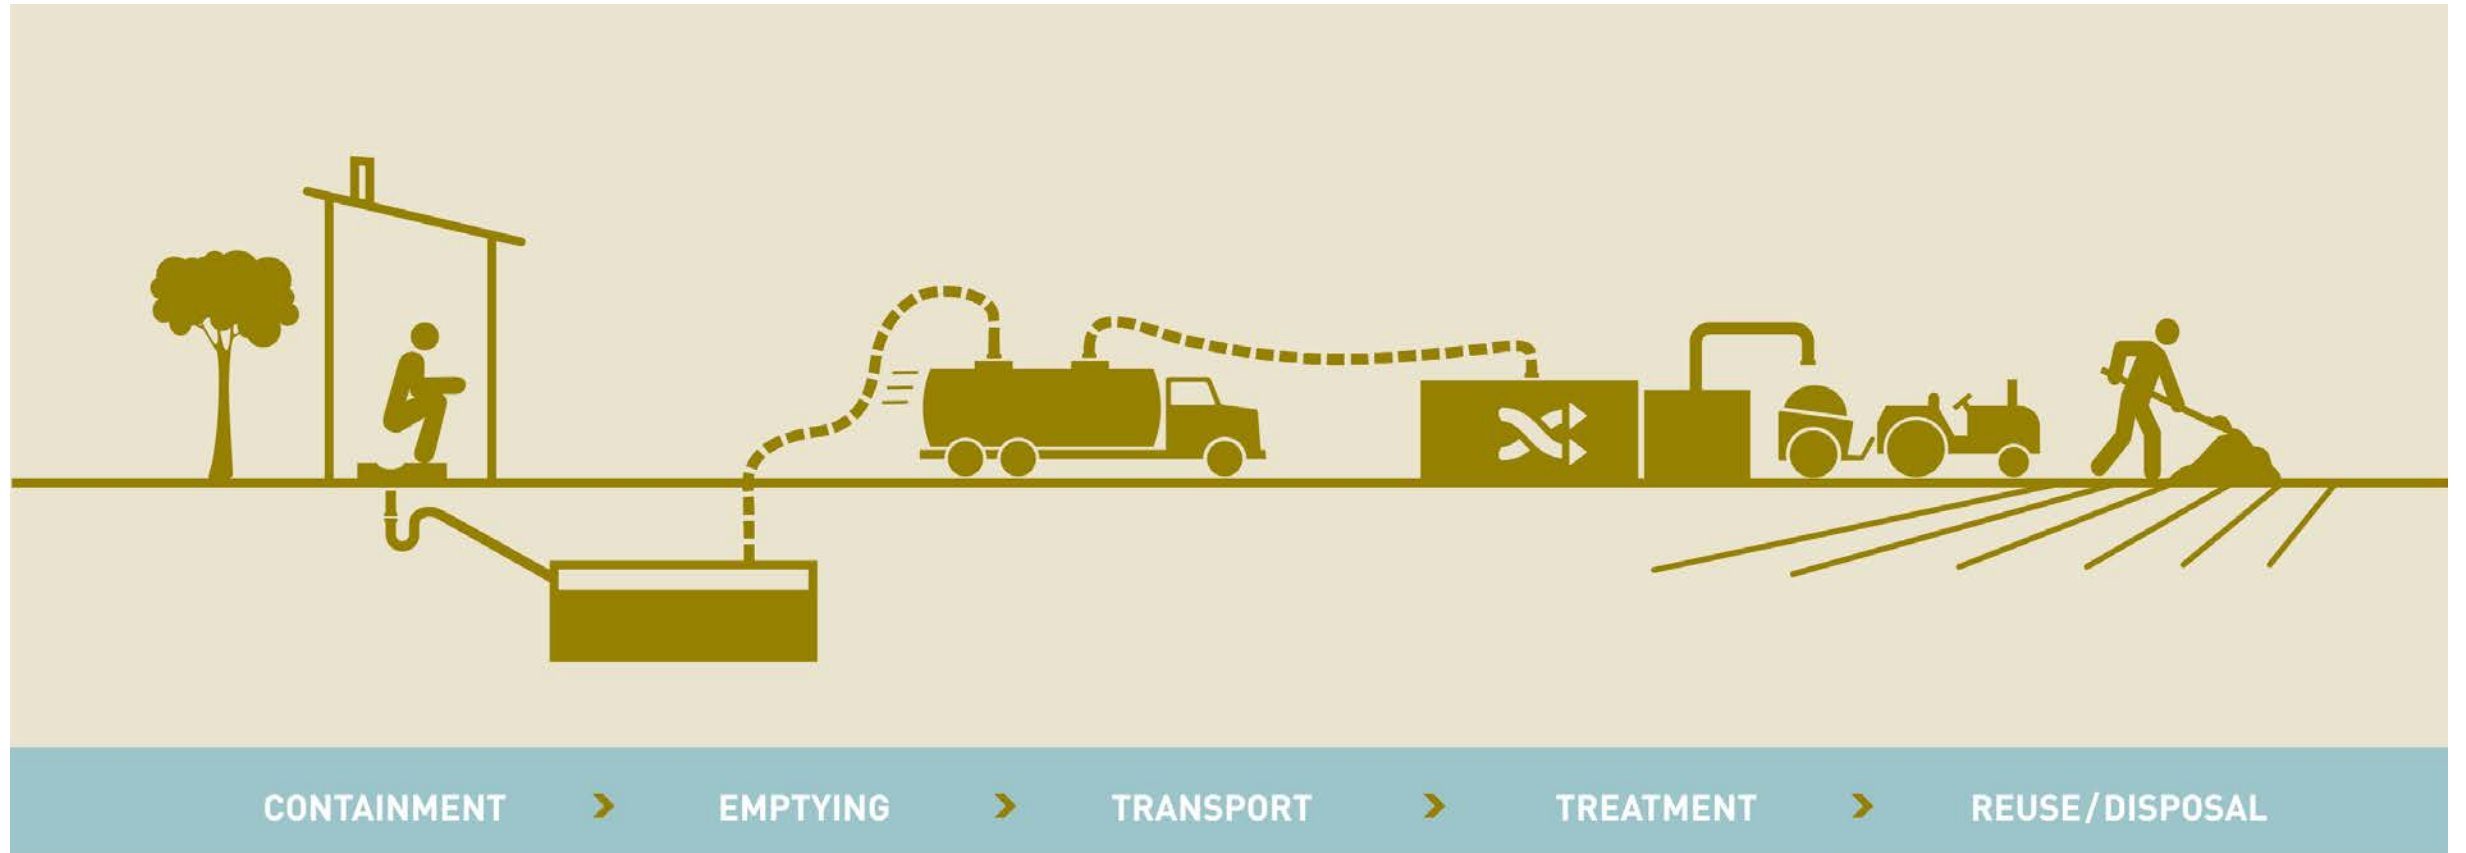

Women and Young Girls

- ~**2.1 billion** people lack access to safe, readily available water at home
- ~**4.5 billion** people lack safely managed sanitation
- ~**1 billion** people still defecate in the open
- Diarrhoeal disease kills **>350,000** children under the age of 5, every year

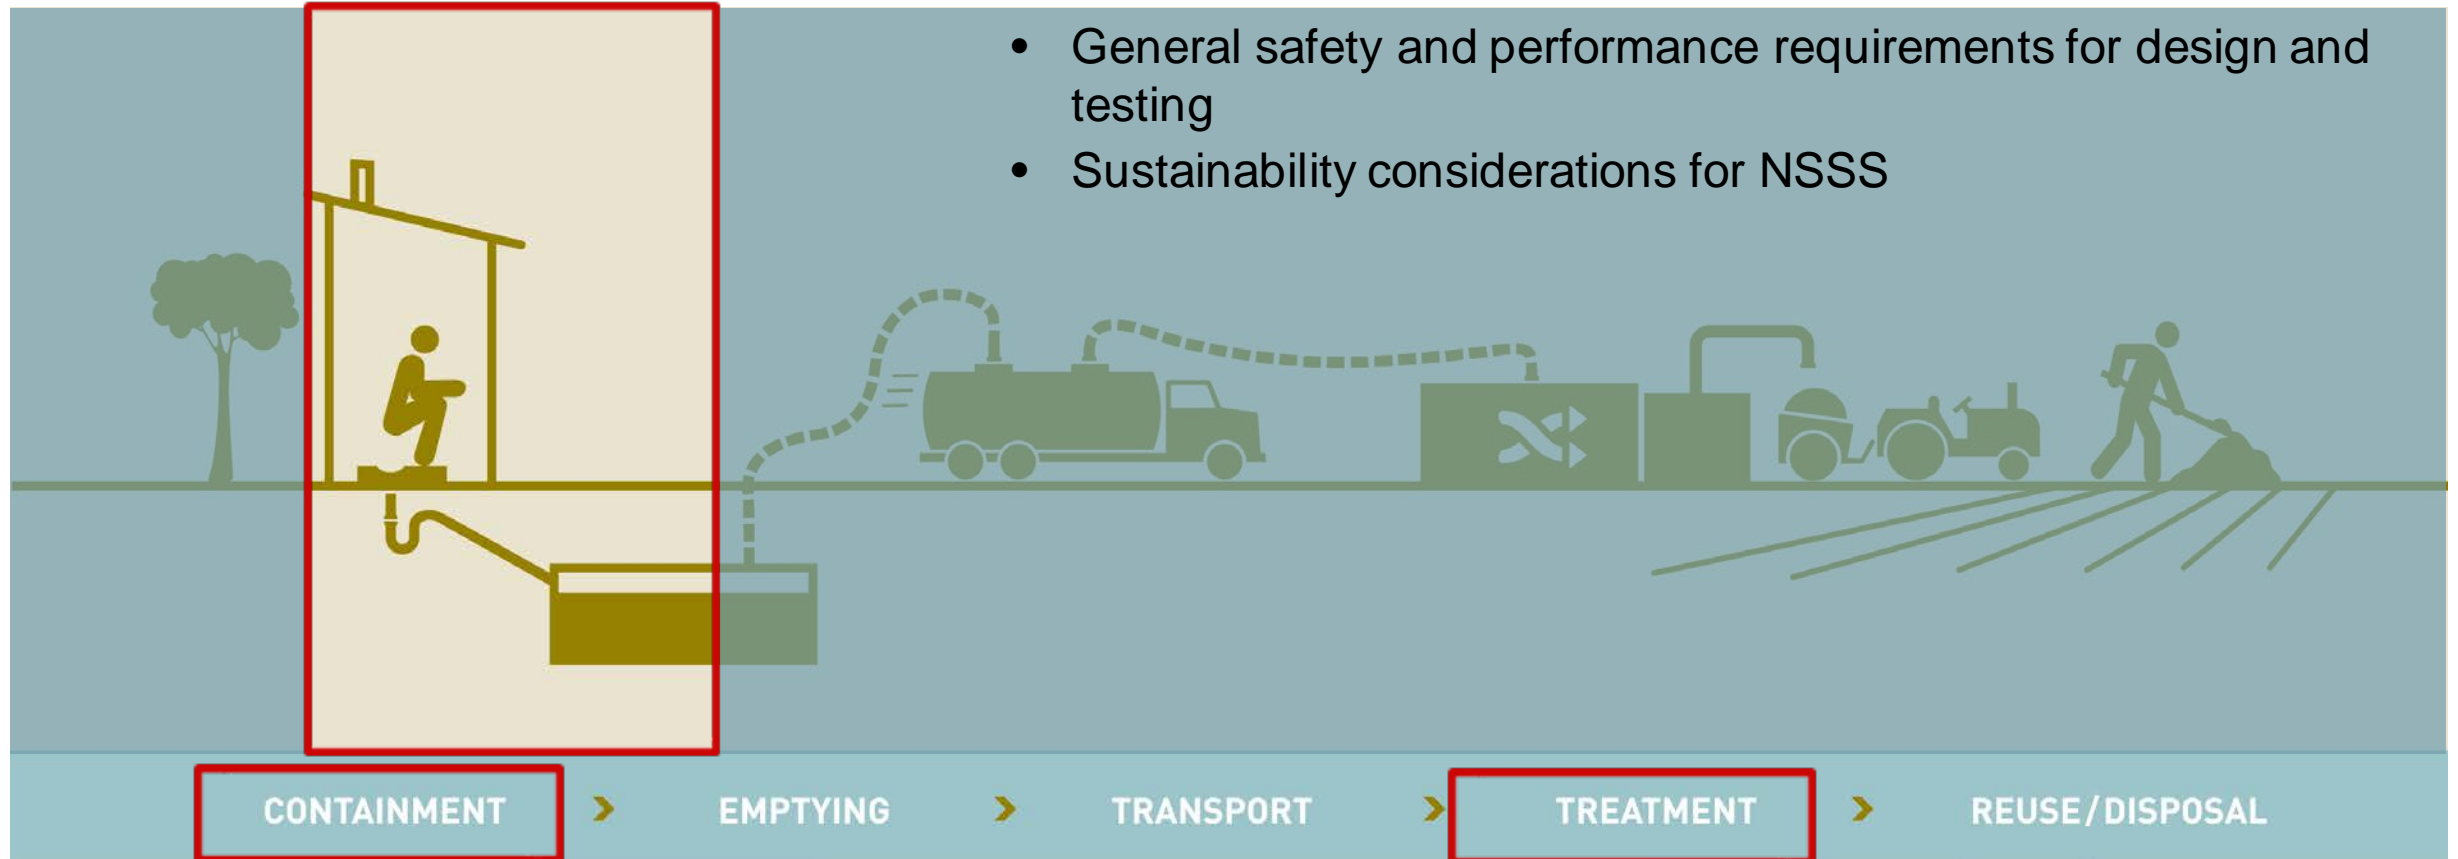

- **Imprisonment by daylight**
 - In many cultures, the only time available for women or girls to defecate is after dark.
- **Reduced school enrollment and attendance**
 - The lack of safe, separate and private sanitation and washing facilities particularly during menstruation.
- **Burden of caring for the sick**
 - Caring for sick children adds to the already heavy workload.
- **Impact on pregnant women**
 - About 44 million pregnant women have sanitation-related hookworm infections that pose a considerable health burden in developing societies.

Non-sewered Sanitation value chain

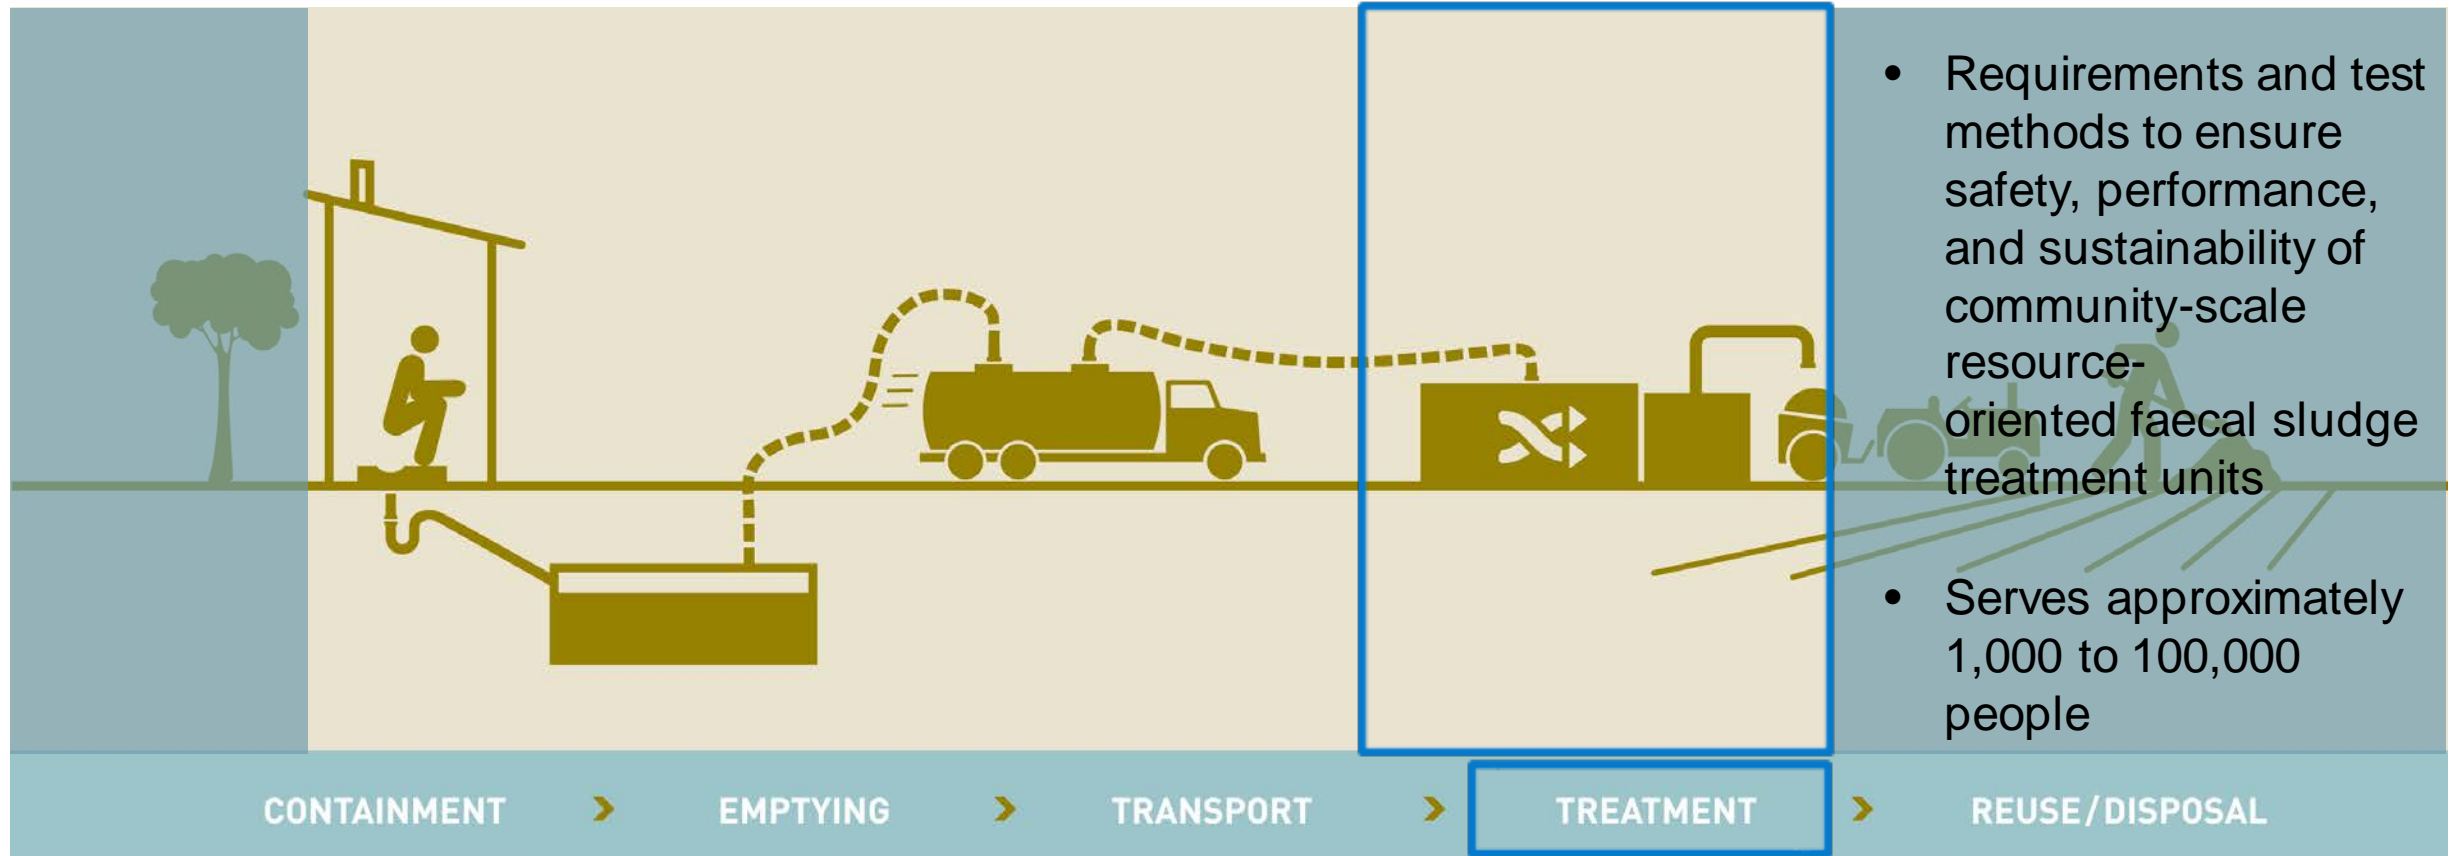

ISO PC 305 - Non-sewered Sanitation Systems – on site containment & treatment (ISO 30500)

ISO PC 318 - Community scale resource oriented sanitation treatment systems (ISO 31800)

Fecal Sludge Processor

Means of implementation for SDG 6: launch and expand the Non-Sewered sanitation industry

Enabling environment

Collaborate with local Governments to enhance demand for sanitation

Support implementation of quality standards

Marketplace readiness

Foster a supportive regulatory environment

Leverage relationships with development banks to facilitate access to financing
