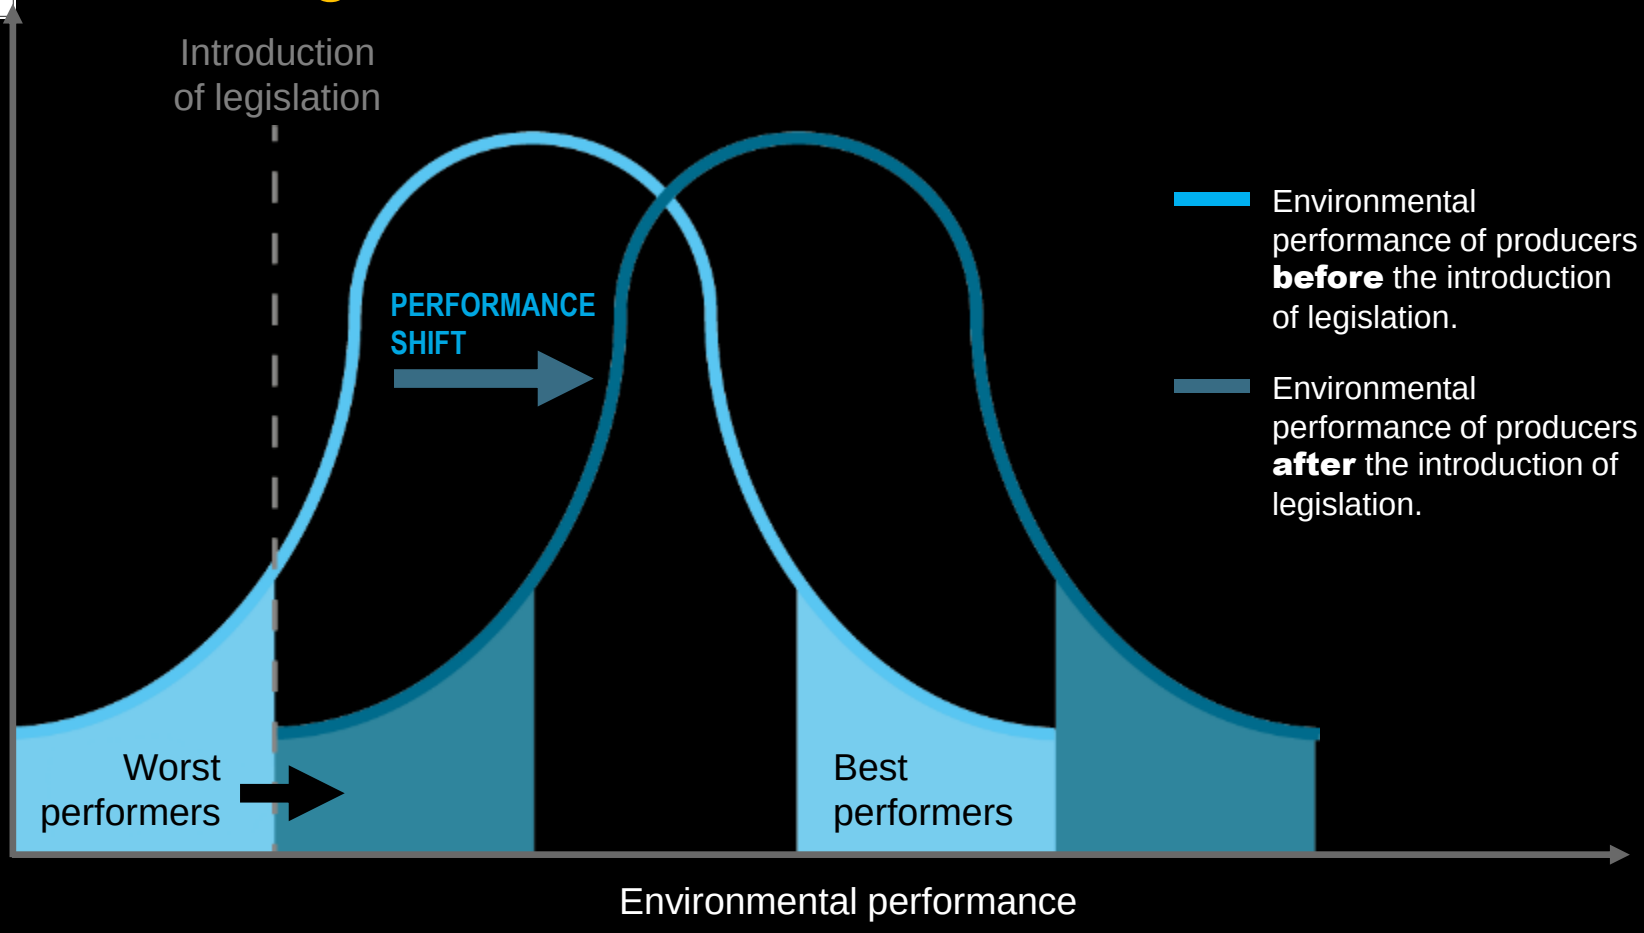
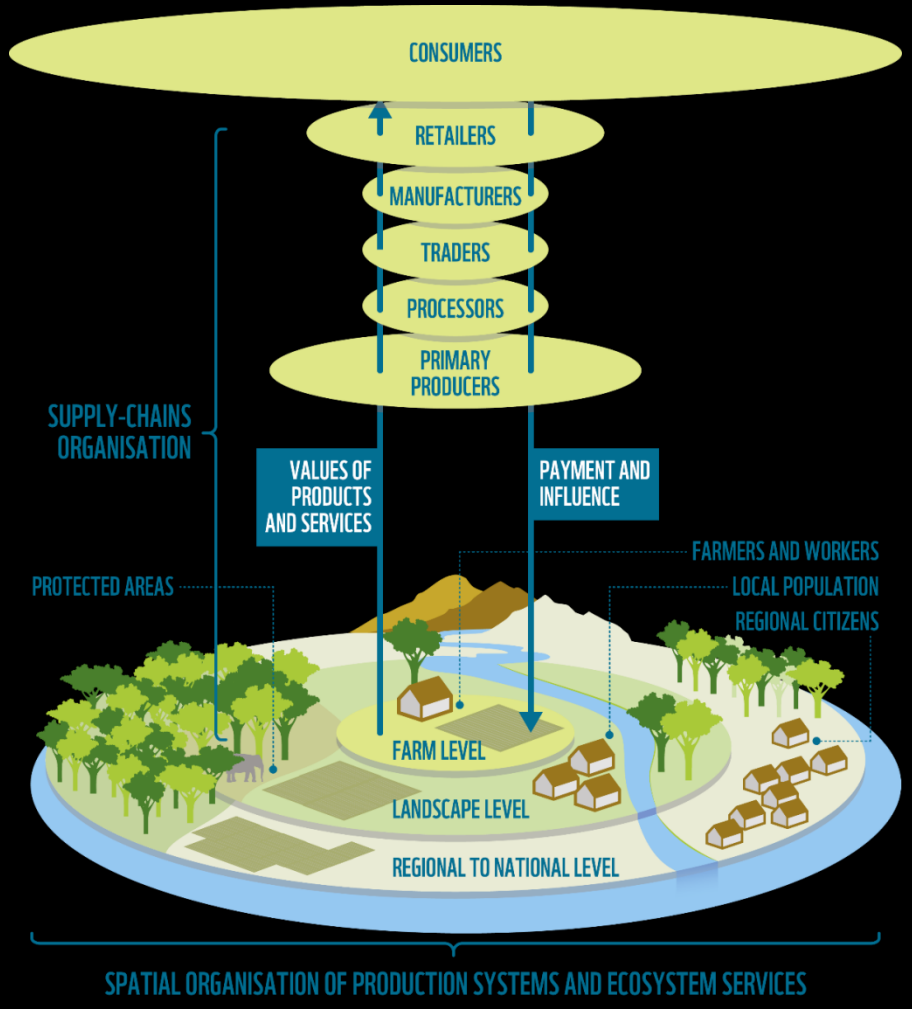
# Making Better Production Common Practice



Take impact beyond the production unit, through the value chain to the lanscape level



Voluntary sustainability standards pionier **better practices**

Governments and policy-makers make it **common practice**

Create an enabling environment for better production and consumption including support (financial or capacity building) to supply-chain actors

Embrace credible certified goods – recognised ‘gold standards’

In public procurement policies, reference credibly certified goods

Align trade policies, subsidies and overseas development aid to support sustainable production giving preference to credible certified goods

WWF
together possible.
