A. INTRODUCTION

1. At its one-hundredth-and-third session, the Working Party considered the amendment proposals transmitted by Latvia concerning the introduction in the Convention of a control system for TIR Carnets (TRANS/WP.30/2003/5 - TRANS/WP.30/AC.2/2003/5).

2. The Working Party, in general, considered that the proposal would contribute to improving the exchange of information between Customs authorities and guaranteeing associations and international organizations issuing TIR Carnets and would strengthen the security of the TIR system. The Working Party considered that the Convention should only make a generic reference to the international organization (and its control system) authorized to print and guarantee TIR Carnets. The Working Party invited Contracting Parties to submit their amendment proposals to the
secretariat as soon as possible, with the aim that the secretariat could prepare an amended proposal for the forthcoming session of the Working Party (TRANS/WP.30/206, para. 36).

4. The Working Party endorsed the assessment, made by the secretariat regarding these improvements and requested it to prepare a document for discussion and possible adoption at the thirty-fifth session of the TIR Administrative Committee in September 2003, based on the Latvian proposal, and taking into account the textual improvements and addressing the issue of the introduction of a control system in a generic way, without making specific reference to the international organization and its control system contained in the above-mentioned amendment proposals (TRANS/WP.30/208, paras. 33-34).

5. In line with the request by the Working Party, underlying document contains draft amendments on the introduction of a control system for TIR Carnets, for discussion and, possibly, adoption by the Administrative Committee.
