PUBLIC-PRIVATE PARTNERSHIP BENEFITS

- Prevent fraud and increase security by allowing early detection

- Transit Facilitation
  - Enhance Risk Management
  - Reduce border crossing clearance times

⇒ MUTUAL BENEFITS for TIR Holders, Customs Authorities and Guarantee Chain
Real Time SafeTIR:

The association can issue in security

The Customs can take into charge the TIR Carnet in security knowing that the association has issued it in security

The status of the TIR Carnet is:
Valid (with the following details:
  Holder ID, validity date, Issuing Association name)
Invalid
Not issued/False/other situations
RESULTS

From several thousands of irregularities per year in the past

Down to dozens of enquiries today

Less thefts
Less fraud
Less claims
Real Time SafeTIR
Next Steps

- Under tests in Ukraine
- Under developments in Belarus
- Under preparation in Kazakhstan
- Under discussion with Turkey
Conclusion

- The IRU is committed to work in partnership with the Customs Authorities to implement up-to-date IT technologies to ensure the TIR sustainability.

- The IRU counts on the support of the WCO and the European Commission to promote these tools and to implement them efficiently to further facilitate trade and transport, as provided by UNECE Multilateral Conventions.
The TIR System is a facilitation tool answering the needs of both Public and Private sectors: Customs, trade, transport.
Working together for a better future since 1948
