**OF**  
**SUBSTANCES**  
**AND ARTICLES**

## NOTES TO THE INDEX

1. This index is an alphabetical list of the substances and articles which are listed in numerical order in the Dangerous Goods List in Chapter 3.2.
2. For the purpose of determining the alphabetical order the following information has been ignored even when it forms part of the proper shipping name: numbers; Greek letters; the abbreviations “sec” and “tert”; and the letters “N” (nitrogen), “n” (normal), “o” (ortho) “m” (meta), “p” (para) and “N.O.S.” (not otherwise specified).
3. The name of a substance or article in block capital letters indicates a proper shipping name.
4. The name of a substance or article in block capital letters followed by the word “see” indicates an alternative proper shipping name or part of a proper shipping name (except for PCBs).
5. An entry in lower case letters followed by the word “see” indicates that the entry is not a proper shipping name; it is a synonym.
6. Where an entry is partly in block capital letters and partly in lower case letters, the latter part is considered not to be part of the proper shipping name.
7. A proper shipping name may be used in the singular or plural, as appropriate, for the purposes of documentation and package marking.
