OICA PROPOSAL FOR A DRAFT ADDENDUM TO THE PROPOSAL FOR DRAFT REGULATION ON HEATING SYSTEMS

Document TRANS/WP29/GRSG/2002/11/Add.1

A. PROPOSAL

Annex 5, amended paragraph 2, delete the words “or passenger”, i.e. amend to read:

“2. The surface temperature of any part of the heating system likely to come into contact with any driver or passenger of the vehicle during normal road use shall be measured with a contact thermometer. No such part or parts shall exceed a temperature of 70 °C for uncoated metal or 80 °C for other materials.”

Annex 5, amended paragraph 2.1, amend to read:

“2.1. In the case of exposed part or parts of the heating system outside the passenger compartment behind the driver’s seat, and in the case of overheating, the temperature shall not exceed 110°C.”

B. JUSTIFICATION

Alignement on EC Directive 2001/56/EC
