EXPLOSIVES, SELF-REACTIVE SUBSTANCES AND ORGANIC PEROXIDES

New formulation for the list in 2.4.2.3.2.3

Transmitted by the expert from Japan

A new formulation for self-reactive substances as mentioned hereunder meets the criteria of UN 3228, type E. The Data Sheet and the Test Report are attached hereto as annexes 1 and 2 respectively. Approval for maritime transport of the products has already been granted by Japanese Ministry of Land, Infrastructure and Transport.

The products have been transported from Japan to the United States of America and China for some years without any incident or accident.

It is proposed to add the formulation for self-reactive substances in the list in 2.4.2.3.2.3 in order to allow transport in the appropriate conditions.

Proposal

Add the following formulation in the list of currently assigned self-reactive substances in 2.4.2.3.2.3:

Self-reactive Substance:	ACETONE-PYROGALLOL COPOLYMER 1,2-NAPHTHOQUINONEDIAZIDO-5-SULFONATE
Concentration(%) :	100
Packing Method :	OP8
Control Temperature :	None
Emergency Temperature :	None
UN Generic entry :	3228
Remarks :	None
