

**Draft Proposal on Roof Clearance for Tip Forward Seat Backs
(OICA)**

Add the following to the text of paragraphs 5.1.1.2 and 5.1.1.4:

"In the case of seats which tip forward and/or displace to enable entry and exit of rear seat passengers, the 25 mm limit applies to the minimum gap achieved between the head restraint and roof, roof lining, sun visor, front windscreen, or opening roof, with the seat system and any adjustment position for normal driving and the seat back to and/or seat moved from the normal position of use through to the entry/exit displacement position."

NOTE: Appropriate changes will also need to be made to the test procedure paragraphs, 6.2.1.1.2 and 6.2.1.2.2.
