

Proposed text from Belgium and Norway regarding the new text for 1.1.3.6.3 after the discussions on document 2006/14:

Proposal

1. Change text under the table in 1.1.3.6.3 to read:

“- In the above table, "quantity " means the net mass of the substance in kilograms or the nominal capacity of the receptacles in litres as appropriate”.

2. If the Joint Meeting can not accept this all encompassing text, the following text is proposed as a new second indent, in line with the original proposal:

“- for dangerous goods in machinery and equipment, the net quantity of dangerous goods in kilograms or litres as appropriate.”
