

Proposal for draft amendments to Regulation No. 66

(Re-insertion of the footnote */ in the scope of the Regulation)

Note: On the 89th session of GRSG Spain raised the question whether the footnote from the scope of Regulation No. 66.01 had been deleted and why it is missing. GRSG asked the Chairman of the informal expert group to clarify the question.

A. PROPOSAL

Paragraph 1., re-insert the footnote */, to read:

"/ Nothing in this Regulation shall prevent the Contracting Parties from restricting its scope to particular categories of vehicles."

B. JUSTIFICATION

The expert group did not get authorization from GRSG to modify the scope of Regulation No. 66 except to follow the modification made meanwhile in the scope of Regulations Nos. 52 and 36 (to increase the passenger capacity from 16 to 22)

The expert group did not discuss the question of the footnote and did not make a proposal to GRSG to delete it.

The abrogation of the footnote could be an editorial mistake, which was not observed by the Chairman of the expert group, the members of the group and also by GRSG.
